Table No. 2 shows the main results of the Industrial Census taken at the time of the Population Census of 1911. A caveat, however, should be added regarding the possibility of obtaining an industrial census from a population census. Experience has proved that one cannot hope for an industrial census from a population census, especially in India, for several reasons as explained in Appendix K to the "Report on the Enquiry into the Rise of Prices in India." The chief reasons are: (1) change of means of livelihood with the season; for instance, the same man at one time may be a field-worker, at another an earthdigger, and again a porter, saltpetre worker, paddy husker, *palki*-bearer, firewood-collector, etc., so that the head under which he will appear in the occupation table depends on the date fixed for the enumeration. (2) Combination of occupations; a worker frequently combines several occupations wholly unconnected with one another, so that at the census he is unable to say which is his chief means of support. (3) Mixed occupations; for instance, money-lending and grain-dealing are in many parts merely different aspects of the same business. (4) Confusion of thought between a man's caste which connotes his traditional occupation, and the means of livelihood by which he actually subsists; for instance, a man of the barber caste will often call himself a barber even when his income is derived from agriculture or some other employment. It may be noted that this difficulty of classification according to occupation from a population census is not confined to India alone. In the United States and in Germany, it has been held that a population census cannot be expected to give the requisite information regarding occupation, and that a comprehensive industrial survey obtained by detailed investigation and spread over a considerable time is to be preferred. In the report of the census of England and Wales for 1891 it is said: "A census * * does not supply data which are suitable for minute classification or admit of profitable examination in detail. The most that it is reasonable to expect from data so collected is that they shall give the means of drawing such a picture of the occupational distribution of the people as shall be fairly true in its main lines, though little value can be attached to the detailed features. It is not wise to demand from a material a result for the production of which it is unsuited."

LARGE INDUSTRIAL ESTABLISHMENTS

[For Tables, see pages 6 to 51]

Factory laws

The conditions of factory labour until 1st July, 1912, were regulated by the Indian Factories Act, XV of 1881, as amended by Act XI of 1891. The chief provisions of the amended Act were: Local Governments were empowered to appoint inspectors of factories, and certifying surgeons to certify as to the age of children. A midday stoppage of work was prescribed in all factories, except those worked on an approved system of shifts, and Sunday labour was prohibited, subject to certain exceptions. The hours for employment for women and children were fixed with intervals of rest; and provision was made for the fencing of machinery and for the promulgation of rules as to water supply, ventilation, the prevention of over-crowding, etc.

The decision to undertake further legislation was arrived at after comprehensive enquiries. An important factor in the case was the increasing use of electric light in the Bombay mills, which radically changed the conditions prevailing when the Act of 1891 was passed and had abolished the security that operatives would not be employed for more than 12 hours a day on the average. The question of the hours of employment in textile factories was brought into prominence by the period of prosperity that the cotton industry began to enjoy in the cold weather of 1904-05, a large number of operatives being regularly employed for 15 hours a day or even longer. Owing to complaints regarding the long hours worked in many mills, the Government of India in 1906 appointed a small Committee to conduct a preliminary inquiry into the conditions of labour in textile factories. The conclusions arrived at by this Committee formed the basis of an investigation, extending to all factories in India by a representative Commission. The recommendations of the Committee and of the Commission having been considered by the Government of India and the Local Governments, a Bill was introduced in July, 1908, to amend

Definitions of the term "factory"

and consolidate the law relating to factories, and was finally passed into law as Act XII of 1911. The new Act, which came into force on 1st July, 1912, defines the term "factory" as any premises wherein, or within the precincts of which, steam, water or other mechanical power or electrical power is used in aid of any process for, or incidental to, making, altering, repairing, ornamenting, finishing or otherwise adapting for use, for transport or for sale any article or part of an article. The term does not apply to (*a*) any mine subject to the operation of the Indian Mines Act, or (*b*) any electrical generating or transforming station, or (*c*) any indigo factory, or (*d*) any factory situated on and used solely for the purposes of a tea or coffee plantation, or (*e*) any factory wherein on no day in the year are more than forty-nine persons simultaneously employed: provided that the Local Government may apply all or any of the provisions of this Act to any factory or class of factories wherein any specified number of persons, not being less than twenty, are on any day simultaneously employed. The Act has limited the hours within which children and women may be employed, and has further restricted the employment of women by night except in certain cases. It also contains a number of new provisions for securing the health and safety of the operatives, making inspection more effective, and securing generally the better administration of the Act.

Tables Nos. 3, 4, 5, and 6 deal not only with factories, as defined above, which come under the operation of the Indian Factories Act, but also include concerns which do not come under the operation of the Act but which are considered to be of sufficient industrial importance, excluding mines, electrical generating stations, indigo factories, and factories situated on and used for the purposes of tea and coffee plantations. Tables Nos. 7, 7-A, 8 and 9 deal only with factories coming under the operation of the Act. Industrial concerns owned by Government, State Darbars, and local bodies are dealt with in table No. 3. Those owned by companies or individuals are dealt with in tables Nos. 4, 5, and 6, factories worked by mechanical or electrical power and those not so worked being shown separately in tables Nos. 5 and 6.

Number of concerns

The total number of factories and industrial concerns of all classes dealt with in these tables was 4,868 in 1917 as against 4,619 in 1916. From the reports on the working of the Indian Factories Act it appears that in 1917 there were within the scope of the Act 127 factories, belonging to the State and to local bodies, such as municipalities and port trusts, as against 122 in 1916. Among these there were 29 printing presses, 18 railway workshops, 17 canal and engineering workshops, and a considerable number of military arsenals and factories. In addition to these 127 factories, there were 33 more concerns which did not come within the operation of the Indian Factories Act. The total number of factories owned by Government and local bodies in British India thus comes to 160 in 1917 as against 161 in 1916, the important of these being shown in the margin. These figures do not include factories situated in Indian States and owned by State Darbars. So far as reports have been received, the total number of factories owned by State Darbars was 17.

	1916	1917
Printing presses	32	32
Railway workshops	19	19
Canal and Engineering workshops	18	19
Waterworks	10	10
Dairy farms	7	8
Municipal workshops	10	7
Arsenals	8	7
Clothing agencies	7	7
Forage presses	7	6
Arms and ammunition	6	6

Of the factories owned by companies or individuals, those worked by mechanical or electrical power numbered 3,933 in 1917 as against 3,877 in 1916; the more important of these are stated in the margin. These represent about 88 per cent. of the total number of factories worked by mechanical or electrical power in all India (including those in Indian States so far as reported). The factories created by the cotton industry exist principally in Bombay and those relating to the jute industry in Bengal; while rice mills and saw mills are naturally mostly in Burma. Of the other factories there are none largely assigned to any particular province. Besides these, there were 758 concerns not worked by mechanical or electrical power, including 306 tanneries, 115 tile and brick factories, 53 lac factories, 43 stone factories, 17 metal works, and 13 silk filatures.

	1916	1917
Cotton gins and presses	1,709	1,770
Rice mills	528	563
Cotton mills	275	277
Oil mills	134	135
Saw mills	127	127
Jute presses	124	118
Printing presses	112	108
Jute mills	72	74
Engineering workshops	65	68
Tile and brick factories	58	68
Railway workshops	65	65
Iron and brass foundries	62	49
Flour mills	48	48

Persons employed

The daily average number of persons employed in all the factories in India, whether worked by mechanical or electrical power or not so worked, and whether owned by Government or local bodies or by companies or individuals, was 1,238,238 in 1917 as against 1,212,375 in 1916, and 1,135,183 in 1915. Of these the number employed in factories under the Act was 1,076,201 as against 1,061,409 in 1916, and 1,004,106 in 1915. Of this total 410,769 (being 38 per cent) were employed in factories in Bengal, and 295,391 (about 27 per cent) in Bombay, these two provinces employing nearly two-thirds of the factory labour of India.

		1916	1917
Adults	Males	839,438	857,221
	Females	158,453	158,644
Children	Males	52,147	49,882
	Females	11,371	10,454

Accidents

There were 4,992 accidents, causing death or bodily injury to operatives, reported in 1917, as against 5,223 in 1916. Of these 144 were attended with fatal results, 53 occurring in Bengal and 28 in Bombay. Bengal also had the largest number of serious accidents, namely, 445, against 100 in the United Provinces, 89 in Bihar and Orissa, 77 in Burma, 75 in Bombay, 40 in the Central Provinces and Berar, and 38 in the Punjab. The largest number of minor accidents—1,053 out of a total of 3,961—occurred in Bengal, Bombay coming in next with 793.

Convictions

There were 154 convictions in respect of offences against the Factories Act in 1917. Of these 70 were for the employment of persons in contravention of the Act, 29 for neglect to fence machinery, etc., and 23 for neglect to send notices or returns.

BREWERIES

[For Table, see page 52]

According to the statistics of 1917, there are 16 breweries in operation in British India. Nine of the breweries are located at stations in the Himalayas from Murree to Darjeeling. The largest brewery is the one at Bangalore; the Kasauli, Murree, Yellanhalli, Solon, Rawalpindi, Quetta, Mandalay, Ootacamund, Naduvakarai, and Aravanghat breweries standing next in the order shown.

The marginal table compares the production in Indian breweries with the imports of foreign beer during the last five years. Production was largest in 1902, since when it tended to decline, while imports of foreign beer increased proportionately. In the year 1907, the process was reversed, internal production having advanced slightly and imports decreased. Since then until 1916 there was a steady decrease in the production, while the imports, after declining up to 1911 (with a small set-back in 1910), recovered appreciably in 1912, and rose higher in 1913. From 1914 the imports have decreased, owing to the difficulty in obtaining freight, the absence of a large portion of the British Regular Army from India, and the shortage of light German beer. In 1916, the production showed an appreciable increase, while the imports were practically the same (2,889,000 gallons) as in 1915. In the year under report (1917) the production rose further to 6,217,000 gallons, the highest on record since 1904, while the imports decreased by about 36 per cent as compared with those in the previous year.

	Production gallons.	Imports gallons.
1913	3,655,000	4,634,000
1914	3,434,000	4,213,000
1915	2,533,000	2,818,000
1916	4,103,000	2,889,000
1917	6,217,000	1,842,000

COTTON MILLS

[For Tables, see pages 53 to 73]

The Indian cotton industry dates as far back as 1851, when the first mill was started, but complete statistics were not reported until 1879-80. The following statement shows quinquennial averages from that year to 1913-14 and annual figures for each of the years from 1914-15 to 1917-18. The figures in brackets represent the variations for each period taking the average of the quinquennium from 1879-80 to 1883-84 as 100: (Sterling capital has been converted into rupees at the rate of R15 to £1)

	Number of mills at work	Authorised Capital (in lakhs of R) as far as reported	Number (in thousands) of		
			Persons employed	Looms	Spindles
1879-80 to 1883-84	63 (100)	657·6 (100)	51·0 (100)	14·5 (100)	1,610·6 (100)
1884-85 to 1888-89	93 (148)	887·9 (135)	75·7 (148)	18·2 (126)	2,296·8 (143)
1889-90 to 1893-94	127 (202)	1,161·7 (177)	116·1 (228)	25·3 (175)	3,263·8 (203)
1894-95 to 1898-99	156 (248)	1,419·5 (216)	150·0 (294)	36·6 (253)	4,046·1 (251)
1899-1900 to 1903-04	195 (310)	1,687·9 (257)	171·6 (336)	42·0 (290)	5,000·9 (310)
1904-05 to 1908-09	218 (346)	1,878·7 (286)	216·4 (424)	60·0 (414)	5,549·1 (345)
1909-10 to 1913-14	257 (408)	2,243·3 (341)	243·8 (474)	88·1 (608)	6,406·4 (398)
1914-15	255 (405)	2,220·3 (338)	260·4 (511)	103·3 (712)	6,598·1 (410)
1915-16	267 (424)	2,276·2 (346)	275·9 (541)	108·4 (748)	6,675·7 (414)
1916-17	267 (424)	2,305·8 (351)	277·3 (544)	110·8 (764)	6,670·2 (414)
1917-18	269 (427)	2,466·3 (375)	284·0 (557)	114·8 (792)	6,614·3 (411)

It will be seen that the number of persons employed and of looms and spindles in operation have increased to a larger extent than the amount of authorised capital, which, however, has not been reported from many private mills.

Number of mills

At the end of 1917-18 there were in India 269 cotton mills, containing 114,805 looms and 6,614,269 spindles. Of this number, 72 were exclusively spinning mills; 33 were exclusively weaving mills; one was a dyeing and bleaching mill; and in 163 mills both spinning and weaving were carried on. They employed a daily average number of 284,054 persons: 209,326 men, 48,282 women, and 26,446 children.

Capital

The authorised capital of the mills, as far as this information has been furnished, is R24,66,31,966, including the sterling capital of £518,400; of the rupee capital, R20,84,91,010 is paid-up and of the sterling capital £458,888 is paid-up. There are, further, rupee debentures to the value of R2,95,57,100 issued by 39 companies. The aggregate of the authorised capital and debentures is thus arrived at nearly R28 crores, and of this R21 crores or £14 millions is paid-up.

The mills are located as follows:—

	Number	Authorised capital (R)
Bombay, Island	32	10,28,31,500
„ Ahmedabad	64	2,94,01,250
„ elsewhere	27	1,99,75,000
Bengal, almost all near Calcutta	14	1,33,00,000 / £200,000
Madras, city	3	41,00,500
„ elsewhere	10	84,70,000
United Provinces: Cawnpore	7	1,18,00,000
„ „ Agra	5	38,00,000
„ „ Aligarh	3	20,75,000
„ „ Mirzapur	2	10,00,000
„ „ Lucknow	1	5,00,000
„ „ Moradabad	1	4,12,603

Mysore: Bangalore	2	22,00,000
Cochin State: Trichur	1	3,00,000
French India: Pondicherry	4	£318,400

The Bombay Presidency possesses 69 per cent of the mills, 76 per cent of the spindles, and 78 per cent. of the looms.

Production of yarn

The total production of yarn in the mills in British India, as far as reported, and the figures of exports, are as follows (lbs) :

	Nos. 1 to 25	Above No. 25	Wastes	Total Production	Total Exports
Average 1896-97 to 1900-01 .	423,906,898	20,082,852	..	443,989,750	198,002,463
„ 1901-02 to 1905-06 .	537,379,018	39,935,969	..	577,314,987	270,818,888
„ 1906-07 to 1910-11 .	555,373,854	53,392,346	160,175	608,926,375	228,318,890
„ 1911-12 to 1915-16 .	576,997,945	59,245,835	633,907	636,877,687	178,684,648
„ 1913-14 to 1917-18 .	577,535,774	64,831,828	474,718	642,842,320	165,021,279
1914-15 . . .	557,092,101	57,389,499	475,216	614,956,816	142,447,897
1915-16 . . .	624,474,474	58,029,663	650,562	683,154,699	168,107,016
1916-17 . . .	574,746,279	69,354,685	345,937	644,446,901	177,468,937
1917-18 . . .	548,699,280	77,877,951	223,279	626,800,510	130,223,130

In the last quinquennium the average annual outturn of yarn has exceeded 642,000,000 lbs. In 1917-18 the output was about 627 million lbs. as against 644 million lbs. in 1916-17.

The spinning of yarn is in a large degree centred in Bombay, the mills of that province producing nearly 75 per cent of the quantity produced in British India. The United Provinces and Madras produced about 6·6 per cent. and 6·9 per cent., respectively ; while Bengal and the Central Provinces produced about 5·2 per cent. and 5·3 per cent., respectively. Elsewhere the production is as yet very limited.

The production of yarn of counts higher than No. 25 has increased almost steadily, the production in 1917-18 amounting to 78 million lbs, which is 12 per cent of the whole production. In the Central Provinces, Bengal, the United Provinces, and the Punjab the mills spin hardly any yarn above No. 25, yarn of that count and lower numbers representing 95, 92, 99, and 98 per cent., respectively, of the whole production. In Bombay, however, the spinning of the higher counts (above 25) is 13 per cent of the whole, and in Madras it is over 24 per cent. Using Egyptian and other imported cotton, the Bombay mills are now spinning in appreciable quantity yarns of No. 40 and upwards. In 1909-10 the production in British India of the finer yarns—Nos. 31 to 40—decreased to 15·5 million lbs. from 20 million lbs in 1908-09, but since then there has been an improvement, the output in 1917-18 being above 23 million lbs.

It is interesting to note that the imports of yarn from the United Kingdom and other places are about 6 per cent of the total production in British India. The figures are (*lbs*) :

	Nos. 1 to 25	Above No. 25	Unspecified descriptions	Total Imports (including unspecified descriptions)
Average 1896-97 to 1900-01 . . .	5,654,194	38,315,540	2,317,358	46,287,092
„ 1901-02 to 1905-06. . .	3,571,768	29,095,637	2,602,569	35,269,974
„ 1906-07 to 1910-11 . .	2,608,278	31,574,481	3,680,680	37,863,439
„ 1911-12 to 1915-16 . .	1,999,767	35,961,784	5,929,759	43,891,310
„ 1913-14 to 1917-18. . .	1,385,180	28,143,062	5,750,246	35,278,488
1913-14	2,150,213	35,202,454	6,818,500	44,171,167

1915-16	1,338,356	33,126,170	5,962,398	40,426,924
1916-17	1,892,043	22,285,765	5,351,761	29,529,569
1917-18	732,064	14,236,889	4,431,486	19,400,439

Production of woven goods

The production of woven goods in the mills in British India, as far as reported, has been as follows (*lbs*) :

	Grey and bleached piece-goods	Other kinds	Total
Average 1896-97 to 1900-01	80,557,484	11,295,465	91,852,949
„ 1901-02 to 1905-06 . . .	109,884,271	25,009,554	134,893,825
„ 1906-07 to 1910-11 . . .	154,123,927	40,007,307	194,131,234
„ 1911-12 to 1915-16 . . .	205,088,072	67,957,638	273,045,710
„ 1913-14 to 1917-18 . . .	228,358,839	83,526,272	311,885,111
1914-15	198,253,599	59,926,785	258,180,384
1915-16	249,628,930	81,224,045	330,852,975
1916-17	255,850,480	98,957,420	354,807,900
1917-18	249,610,594	109,567,700	359,178,294

In 1917-18 the total production reached 359 million lbs, the highest on record, the increase over the preceding year being 1·2 per cent.

Weaving is concentrated in the Bombay mills to an even greater degree than spinning, the mills of that province producing about 86 per cent of the whole quantity woven in British India. The United Provinces produce about 4 per cent, and the Central Provinces and Madras about 5 per cent. each. The goods woven are mainly grey and bleached piece-goods, these representing nearly 70 per cent of the whole production.

The most important kinds of grey and bleached piece-goods woven in the mills are specified below (in lbs)

	Average 1901-02 to 1905-06	Average 1906-07 to 1910-11	Average 1911-12 to 1915-16	Average, 1913-14 to 1917-18	1915-16	1916-17	1917-18
Shirtings and longcloth .	38,611,145	50,679,465	72,662,981	82,455,403	93,200,209	90,597,089	93,170,287

The proportion of woven goods other than grey and bleached piece-goods was highest in Madras, where in 1917-18 it was about 70 per cent. In the Central Provinces the proportion was about 25 per cent. and in Bombay 39 per cent.

Figures of imports are not readily comparable with those of production, because the former are recorded in yards and the latter up to the year 1906 were recorded in lbs, with the exception of grey and bleached piece-goods : the figures of grey and bleached piece-goods are as follows (in millions of yards) : Comparison of piece-goods imported and produced

	Imported	Produced	Percentage of production to importation
Average 1896-97 to 1900-01	1654·21	319·55	19·3
„ 1901-02 to 1905-06	1741·6	457·38	26·3
„ 1906-07 to 1910-11	1749·45	676·19	39·2
„ 1911-12 to 1915-16	2032·80	871·03	42·8
„ 1913-14 to 1917-18	1715·26	958·60	35·0
1914-15	1924·46	820·70	42·6
1915-16	1759·65	1024·34	58·2

1914-15	494·77	241·20	48·7
1915-16	358·74	331·50	92·4
1916-17	454·96	426·53	93·8
1917-18	395·59	462·24	116·8

To the figures given above for mills in British India, may be added the production in Berar prior to the 1st October, 1903, and in the Indian States, which is stated below (in lbs). The States are Mysore, Indore, Baroda, Nandgaon, Bhavnagar, Hyderabad, Wadhwan, Travancore (Quilon), Kishengarh, Gwalior (Ujjain) and Kolhapur. The production of one mill in Pondicherry has been reported from April, 1909 : Production in Indian States

JUTE MILLS

[FOR TABLES SEE PAGES 74 TO 76]

Progress of Jute mills

The record of the jute industry, as disclosed by these tables, may well be said to be one of uninterrupted progress. The following statement shows quinquennial averages from the earliest year for which complete information is available with actuals for 1914-15, 1915-16, 1916-17, and 1917-18, and the figures in brackets represent the variations for each period, taking the average of the quinquennium from 1879-80 to 1883-84 as 100. It will be seen that the number of looms and spindles in operation and that of persons employed have increased to a very much larger extent than either the number of mills at work or the amount of capital employed.

	Number of mills at work	Authorised capital (in lakhs of ₹)	Number (in thousands) of Persons employed	Looms	Spindles
1879-80 to 1883-84 (average)	21 (100)	270·7 (100)	38·8 (100)	5·5 (100)	88 (100)
1884-85 to 1888-89 „	24 (114)	341·6 (126)	52·7 (136)	7 (127)	138·4 (157)
1889-90 to 1893-94 „	26 (124)	402·6 (149)	64·3 (166)	8·3 (151)	172·6 (196)
1894-95 to 1898-99 „	31 (148)	522·1 (193)	86·7 (223)	11·7 (213)	244·8 (278)
1899-1900 to 1903-04 „	36 (171)	680 (251)	114·2 (294)	16·2 (295)	334·6 (380)

1909-10 to 1913-14 „	60 (286)	1,200 (443)	203·4 (537)	33·5 (609)	691·8 (786)
1914-15	70 (333)	1,394·3 (515)	238·3 (614)	38·4 (698)	795·5 (904)
1915-16	70 (333)	1,322·6 (488)	254·1 (655)	39·9 (725)	812·4 (923)
1916-17	74 (352)	1,395·5 (516)	262·6 (677)	39·7 (722)	824·3 (937)
1917-18	76 (362)	1,428·5 (528)	266 (686)	40·6 (738)	834 (948)

Production. Exports of manufactures

The production of the mills has increased to a still greater extent. The following figures show the exports of jute manufactures and the declared values for the same periods. The combined value of gunny bags and gunny cloth exported by sea in 1917-18 is over thirty-four times as great as the average value of the export in the period 1879-80 to 1883-84.

	Exports of Jute manufactures: Gunny bags in millions of number	Gunny cloths in millions of yards	Value in lakhs of ₹
1879-80 to 1883-84 (average)	54·9 (100)	4·4 (100)	124·9 (100)
1884-85 to 1888-89 „	77 (140)	15·4 (350)	162·9 (130)
1889-90 to 1893-94 „	111·5 (203)	41 (932)	289·3 (232)
1894-95 to 1898-99 „	171·2 (312)	182 (4,136)	518 (415)
1899-1900 to 1903-04 „	206·5 (376)	427·2 (9,709)	826·5 (662)
1904-05 to 1908-09 „	257·8 (469)	698 (15,864)	1,442·7 (1,154)
1909-10 to 1913-14 „	339·1 (618)	970 (22,045)	2,024·8 (1,621)
1914-15	397·6 (724)	1,057·3 (24,030)	2,582 (2,067)
1915-16	794·1(1,447)	1,192·3 (27,098)	3,797·8 (3,041)
1916-17	805·1 (1,466)	1,230·9 (27,975)	4,167·2 (3,336)
1917-18	758·4 (1,381)	1,196·8 (27,200)	4,284·3 (3,430)

Exports of raw jute

Until the outbreak of war the exports by sea of raw jute were marked by increases from year to year although the improvement was not so rapid as in the case of manufactures. In the years 1914-15 to 1917-18 there was a decrease in exports, as compared with the last quinquennium (1909-10 to 1913-1914).

	Jute, raw, tons.
1879-80 to 1883-84 (average)	375,000 (100)
1884-85 to 1888-89 „	445,000 (119)
1889-90 to 1893-94 „	500,000 (133)
1894-95 to 1898-99 „	615,000 (164)
1899-1900 to 1903-04 „	635,000 (169)
1904-05 to 1908-09 „	755,000 (201)
1909-10 to 1913-14 „	765,000 (204)
1914-15	505,000 (135)
1915-16	600,000 (160)
1916-17	540,000 (144)
1917-18	278,000 (74)

Prices

The price of raw jute reached its highest point in 1913-14, the rate being ₹76-12-0 per bale; in 1917-18 it dropped to ₹38-8-0. The following are the quinquennial average prices per bale (400 pounds) of ordinary jute and per 100 yards of gunny cloth, calculated from the prices current published by the Bengal Chamber of Commerce :—

	Price of raw jute (ordinary), per bale of 400 lbs. ₹ a. p.	Price of Hessian cloth (10½ oz. 40″) per 100 yds. ₹ a. p.
1879-80 to 1883-84 (average)	23 8 0 (100)	10 7 11 (100)
1884-85 to 1888-89 „	23 3 2 (99)	8 0 7 (77)
1889-90 to 1893-94 „	32 6 5 (138)	10 6 6 (99)
1894-95 to 1898-99 „	30 12 0 (131)	9 11 8 (93)
1899-1900 to 1903-04 „	32 1 7 (137)	10 2 10 (97)
1904-05 to 1908-09 „	44 13 6 (191)	11 14 1 (112)
1909-10 to 1913-14 „	51 0 10 (217)	12 12 2 (122)
1914-15	54 8 0 (232)	12 4 0 (117)
1915-16	48 4 0 (205)	20 10 0 (197)
1916-17	50 12 0 (216)	17 6 0 (166)
1917-18	38 8 0 (164)	33 8 0 (319)

PAPER MILLS

[FOR TABLES, SEE PAGES 77 AND 78]

The number of paper mills in India in 1917 was ten, four in the Bombay Presidency, three in Bengal, one in the United Provinces, one in the Travancore State, and one in the Gwalior State. The estimated authorised capital of these mills, as far as information is available, was about R52½ lakhs. The value of the output reported rose from R1,25 lakhs in 1916 to R1,88 lakhs in 1917 and was the highest on record.

In 1913 the value of the paper manufactured in India and that of imported paper were R80 lakhs and R1,59 lakhs, respectively. In 1917 the corresponding figures were R1,88 lakhs and R2,03 lakhs, the value of the imports having increased in the meantime by 28 per cent., and the internal production by 134 per cent. The values of country-made and imported paper during the last five years are given in the margin. The increase in 1917, both in internal production and in imports, is noticeable. Owing to the war and the resulting absence of competition from enemy countries, the Indian paper industry is comparatively prosperous, notwithstanding the increased cost of wood pulp and of chemicals required in the process of manufacture and the inability to secure new machinery.

	Produced in Indian mills	Imported
	R	R
1913	80,37,000	1,59,00,000
1914	82,12,000	1,42,00,000
1915	89,62,000	1,34,00,000
1916	1,24,85,000	2,28,00,000
1917	1,87,86,000	2,03,00,000

WOOLLEN MILLS

[FOR TABLES, SEE PAGES 79 AND 80]

Of the six woollen mills in India, one is in the Mysore State, and of the remaining five, three represent a paid-up capital of R1,41,50,000 (£943,333), while the capital of the other two, which are private mills at Calcutta and at Bombay, is not stated. Two of the mills, that is, the one at Cawnpore in the United Provinces, and the other at Dhariwal in the Punjab, have between them a paid-up capital of R1,35 lakhs (£900,000) or 86 per cent. of the whole, and produce 68 per cent. of the total outturn of Indian mills. They weave cloth for the use of the army and the police, and articles of generally superior quality.

There was an increase during the year under review in the number of looms as well as of spindles. In 1906 and 1907, there was a considerable shrinkage in production; since then there has been a steady increase, the statistics for 1916 surpassing all previous records. In 1917, there was a decrease in quantity but an increase in value of the production. Up to 1914, the imports of woollen goods into India were very much greater than the production of Indian mills. In 1915 the order was reversed, and the production much exceeded the imports. In 1916 there was a sharp recovery in the imports which were nearly equal to the production in Indian mills, and in 1917 the imports exceeded the production. Piece-goods and shawls, mostly from the United Kingdom, make up the bulk of the imports. The values of country-made and imported woollen goods compare as shown in the marginal table. There are in various places factories for the weaving of carpets and rugs, and of *pattu* and *páshmina*, but although these industries are in the aggregate extensive, they are individually small, and weaving is done by hand-looms.

	Produced in Indian mills	Imported
	R	R
1913	61,66,000	3,84,12,000
1914	80,09,000	2,15,35,000
1915	1,23,01,000	86,05,000
1916	1,66,59,000	1,64,04,000
1917	2,01,10,000	2,28,00,000

The exports of woollen goods from India consist almost entirely of carpets and rugs. The value of Indian carpets and rugs exported during the last five calendar years is stated in the margin. The exports gradually declined up to 1914; the decline was arrested in 1915, and in 1916 there was a marked increase. In 1917 the export again declined.

	R
1913	22,29,000
1914	18,18,000
1915	19,57,000
1916	26,25,000
1917	19,09,000

MINERAL PRODUCTION

[FOR TABLES, SEE PAGES 81 TO 87]

The minerals for which figures are recorded in these tables are those comprised in Group I of the minerals dealt with in the Records of the Geological Survey of India, that is, those minerals for which approximately accurate and full returns are obtainable.

Salt.—Statistics are supplied annually by all Local Governments and Administrations. Full details of the production and consumption of salt and the administration of the salt revenue are contained in **Volume II (Financial) of the Statistics of British India.**

Coal.—The figures are compiled chiefly from the statutory returns of the output furnished to the Chief Inspector of Mines in India by the Managing Agents of mines regulated by the Indian Mines Act, VIII of 1901. Figures for mines situated in Indian States and for mines not coming within the operation of the Indian Mines Act are furnished by the Director, Geological Survey of India. Details regarding the coal mining industry in India are given separately in the next section relating to Coal Mines.

Gold.—The figures are supplied by the Director, Geological Survey of India. About 93 per cent. of the total output of gold in 1917 was derived from the Kolar gold field in Mysore, the quantity won being 536,559 ounces, valued at R3,10,13,115. The production of this field reached its highest point in 1905 when

616,758 ounces were raised. The Anantapur mines in Madras come next, but at a respectable distance, to the Kolar gold field. The output in 1917 was 20,529 ounces, valued at R13,05,989, or 3·6 per cent of the total output of Indian gold. These mines gave their first output of gold during the year 1910, the amount being 2,332 ounces, valued at R1,51,800, and the output has almost steadily increased. Gold mining was carried on in the North Arcot district of Madras from 1893 till 1900, the highest yield (2,854 ounces) having been obtained in the year 1898. The Nizam's mines at Hutti in Hyderabad closely follow the Anantapur mines, the yield in 1917 being 13,467 ounces, valued at R7,80,202. Other gold mines of minor importance exist in Burma and Bihar and Orissa. The Kyaukpazat mine in Upper Burma was worked until 1903, when the paychute was lost and the mine closed down. In 1902 dredging operations were started on the Irrawaddy river near Myitkyina, and 216 ounces of gold were obtained in 1904; the amount steadily increased from year to year and reached 8,445 ounces in 1909, but fell to 1,606 ounces in 1917, the dredging operations not having been so successful as had been hoped for. In Bihar and Orissa 450 ounces of gold were for the first time extracted in 1915 from the Singhbhum mines in Chota Nagpur. The output rose from 864 ounces in 1916 to 2,462 ounces in 1917. The small quantity of gold produced in the Punjab and the United Provinces is obtained by washing. Gold washing is carried on in a great many districts in India, but there is no complete record of the amount obtained in this way. The average earnings of the workers are very small, and the gold thus won is used locally for making jewellery.

Petroleum.—Figures of production are supplied by the Director, Geological Survey of India. Petroleum is found in India in two distinct areas—one on the east, which includes Assam, Burma, and the islands off the Arakan coast. This belt extends to the productive oil fields of Sumatra, Java, and Borneo. The other area is on the west, and includes the Punjab and Baluchistan, the same belt of oil-bearing rocks being continued beyond the borders of British India to Persia. Of these two, the eastern area is by far the most important, and the most successful oil fields are found in the Irrawaddy valley. Yenangyaung is the oldest and most developed of these fields. Native wells have been at work here for over a century, and in 1886, prior to the annexation of Upper Burma, the output is estimated to have averaged over 2 million gallons a year. Drilling was begun in 1887. The output of the field rose to 10 million gallons in 1894, and to 40 million gallons in 1902. Since then progress has been more rapid, and the output reached a little over 200 million gallons in 1913, surpassing all previous records. In 1916, the output amounted to about 199 million gallons but fell to about 177 million gallons in 1917. The Yenangyat field yielded a very small supply of petroleum before 1891, in which year drilling was started by the Burma Oil Company. For some years progress was slow, but in 1903 the production reached 22 million gallons. Since then the output has decreased, and it was about $6\frac{2}{3}$ million gallons in 1917. Singu now holds the second place among the oil fields of India. Petroleum was struck at the end of 1901, and in 1903, 5 million gallons were obtained. In 1907 and 1908 the production of this field was about 43 million gallons, and, after a fall to $31\frac{1}{2}$ million gallons in 1910, it rose to about 86 million gallons in 1917. Several of the islands off the Arakan coast are known to contain oil deposits, but their value is uncertain. About 11,000 gallons were obtained from the Eastern Barongo Island near Akyab, and about 47,000 gallons from Ramri Island in the Kyaukpyu district during 1917. Oil was struck at Minbu in 1910, the production for that year being 18,320 gallons, which increased in 1912 to a little under 4 million gallons but fell to about $3\frac{1}{2}$ million gallons in 1917. The existence of oil in Assam has been known for many years, and an oil spring was struck at Digboi near Makum in 1867. Nothing more, however, was done, until 1883, and from that year to 1902 progress was slow. Since that year the annual production has been between $2\frac{1}{2}$ million and $6\frac{1}{2}$ million gallons. A new field at Badarpur in Assam has been opened up and it produced nearly 3 million gallons in 1917.

On the west, oil springs have been known for many years to exist in the Rawalpindi and other districts in the Punjab, but the output was insignificant until the discovery of the Khaur field which produced $\frac{1}{4}$ million gallons in 1915. The total output of the province in 1915 amounted to 251,500 gallons but fell to 183,800 gallons in 1916. In 1917 the production, however, increased more than threefold, the total output being 619,500 gallons. In Baluchistan, geological conditions are adverse, and although some small oil springs have been discovered, attempts to develop them have not hitherto been successful.

The consumption of kerosene in India (excluding Burma) is rapidly increasing and has risen from about 79 million gallons in 1900-01 to about 139 million gallons in 1917-18. The enormous increase in the output of the Burma oil fields has reversed the position formerly held by foreign and Indian oil in the market. In 1908-09, however, the proportion of foreign oil consumed was a little higher than that of Burma oil as a result of a contraction in her shipments concurrently with a large increase in imports from foreign countries, but from 1909-10 Burma oil has regained its position.

Chromite.—The exploitation of the chromite deposits in Baluchistan, which were discovered by the Geological Survey of India in 1901, was begun in 1903. In 1906 the output amounted to 4,375 tons, which rose in 1917 to 15,659 tons, the highest on record, valued at R2,34,885. At present the ore is raised entirely for export. The opening up of the Mysore chromite deposit commenced in 1907 with an initial output of 11,029 tons, valued at R2,20,580. Owing to low prices the production declined, and nothing was produced from 1910 to 1912. In 1913 the production was 1,414 tons, rising in 1917 to 8,136 tons, valued at R1,11,684. The year 1913 showed for the first time in the Singhbhum district (Bihar and Orissa) an output of 848 tons of chromite, valued at R6,784; the output rose in 1917 to 3,266 tons, valued at R46,657. The changed conditions resulting from the war and the consequent difficulties which have interfered with the industry in New Caledonia and Rhodesia have stimulated chromite mining in India.

Copper-ore.—The output of copper-ore in Singhbhum increased from 2,173 tons, valued at R48,885, in 1916, to 20,108 tons, valued at R4,52,430, in 1917. The output of the Cape Copper Co., it is hoped, will be considerably increased in the near future.

Diamonds.—Diamonds are produced in the mines of the Vindhyan belt which stretches through the Central Indian States of Panna, Charkhari, Ajaigarh, and Bijawar. The production in this field was 44

carats, valued at R7,133, in 1911, falling considerably in 1912 to 9 carats, valued at R5,997. In 1913 it showed an increase to 79 carats, valued at R26,536, but fell again in 1917 to 18 carats, valued at R27,396. In 1909, 111 carats were obtained from Banganapalli, Madras, but the production in 1911 was insignificant, being 9 carats only. In 1913, 37 carats were obtained from the Karnul district, but in the following four years no output was recorded in the Madras Presidency.

Graphite.—Graphite occurs in the Travancore State under geological conditions similar to those of the richer deposits worked in Ceylon. The production in 1911 was 3,993 tons, the highest on record. Owing to the difficulties of working, the mine has been shut down since 1912. Some 54 tons of the mineral were obtained from the Vizagapatam mine in Madras in 1911, but no output has been recorded since 1912. Since the closing down of the Travancore mines attention has been paid to the graphite deposits in Bihar and Orissa and in Rajputana. At present the industry is only in its infancy, the total output of the year 1917 being 42 tons in Merwara (Rajputana) and about 61 tons in Kalahandi (Orissa).

Iron-ore.—The production of the Tata Iron and Steel Co.'s mines in Maurbhanj (Orissa) appeared in the statistics for the first time in 1911, the amount being 300,000 tons, valued at R3,00,000. The output rose in 1912 to 471,232 tons, valued at R4,71,232, but fell to 195,621 tons, valued at R2,54,205, in 1917. The Bengal Iron and Steel Works obtain their ores from Bengal and Chota Nagpur, the major portion of the output now coming from Singhbhum in Chota Nagpur. Elsewhere in India, namely, in the Central Provinces, the United Provinces, Madras, Central India, Hyderabad, Mysore, Rajputana, Burma, and the Punjab, operations are carried on, on a very small scale, for use in the small native furnaces. The value reported for the ore raised in Orissa, Chota Nagpur, and Bengal works out to an average of R1·2 per ton. Elsewhere the reported values are higher, about R4 per ton.

Jadestone.—The substance which passes as jadestone is mainly the mineral jadeite, which occurs in an altered igneous dyke in serpentine in the Myitkyina district of Upper Burma and also in the form of boulders in a tertiary conglomerate and in alluvium. It is worked in an unadministered tract, and there are no reliable figures of production. The figures given in the tables are those of the exports by sea from Rangoon, together with the exports overland to China.

Lead and Silver.—The smelting of lead slags and lead ore at Bawdwin by the Burma Mines, Ld., resulted in a production in 1910 of 12,896 tons of lead and 49,680 ounces of silver worth R24,23,137 and R74,520, respectively. The output during 1917 amounted to 16,962 tons of lead and 1,580,557 ounces of silver, valued at R76,32,960 and R35,56,253, respectively. 1.281 ounces of silver were obtained in 1917 as a by-product in the extraction of gold at Anantapur in Madras by the Jibutil Gold Mines of Anantapur, Ld.

Magnesite.—This mineral is worked in the Chalk Hills near Salem in the Madras Presidency. The output in 1917 was 18,192 tons, as against 17,540 tons in 1916. From 1913, this mineral has been worked also in Mysore, but there was no production in 1915, and only 10 tons in 1917.

Manganese-ore.—This industry commenced about twenty-six years ago by quarrying the deposits of the Vizagapatam district, and from an output of 674 tons in 1892, the production rose rapidly to 92,008 tons in 1900 when the richer deposits in the Central Provinces were also attacked, and are now yielding a larger quantity of ore than the Vizagapatam mines. The manganese-ore industry suffered from severe depression during the years 1914 and 1915, the output having fallen from 815,047 tons, valued at R1,81,65,515, in 1913, to 682,898 tons, valued at R1,31,58,965, in 1914, and 450,416 tons, valued at R1,39,43,187, in 1915. The output in 1916 rose to 645,204 tons, valued at R2,23,05,393, the increase in value being due to the abnormal conditions of the manganese market caused by the war. In 1917 the output was 590,813 tons, valued at R2,25,16 201.

The ore raised in the Central Provinces is of a very high grade, ranging from 49 to 54 per cent. of the metal, and in consequence of its high quality is able to pay the heavy tax of freight over 500 miles of railway, besides the shipment charges to Europe and America, for almost the whole of the ore is exported to be used principally in steel manufacture in the United Kingdom, France, Italy, and the United States. The largest proportion of ore is raised in the Balaghat and the Nagpur districts, the Chhindwara and the Bhandara districts ranking next. Mining operations are also in progress in the Panch Mahals, Chota Udepur, and Belgaum in Bombay, in the Vizagapatam district in Madras, in the Mysore State, and in the Singhbhum district and the Gangpur State in Bihar and Orissa.

Mica.—The chief centres of production are the Nellore district in Madras, the Hazaribagh and Gaya districts of Bihar and Orissa, and certain States in Rajputana. Prospecting has been carried on in various districts of Madras, the Central Provinces, Upper Burma, and Assam, and in the Kishengarh State. The output of mica in 1917 was 10,907 cwts. as against 43,400 cwts in 1916. The mica industry declined in 1915, but subsequent demand in the United Kingdom led to a considerable increase in its production during the years 1916 and 1917.

Monazite.—This mineral has now taken an important place in the list of minerals, of economic value produced in India. At present it is worked in Travancore by the London Cosmopolitan Mining Co. The output, which amounted in 1911 to 832 tons, valued at R3,60,660, rose in 1917 to 1,940 tons, valued at R8,47,335.

Platinum.—Four ounces of this mineral, valued at R287, were won in 1917, during the course of the gold dredging operations at Myitkyina in Burma, as against 9 ounces, valued at R694, in 1916.

Rubies.—The figures in the tables represent the quantity and value of rubies raised by the Burma Ruby Mines, Ld., in the Ruby Mines district of Upper Burma. There are no statistics available of the quantity and value of rubies raised by Indian miners in the district. Rubies are also found in the Mandalay and Myitkyina districts, but the production is on a very small scale. The large decrease in output and value in 1908 was due to a slump in the ruby market, but there was a slight recovery from 1909 to 1912. Since then the output of this mineral has decreased again, the quantity reported to have been raised in 1917 amounting to 198,200 carats, valued at R7,77,467.

Saltpetre (*Nitrate of Potash*).—This article is largely produced for export. It is mainly produced in the United Provinces, the Punjab, and Bihar. The production of saltpetre was 443,635 cwts in 1917, as against 513,435 cwts in 1916. The demand for saltpetre for the manufacture of explosives has given a considerable impetus to the industry.

Tin-ore.—Tin-washing is carried on in the Tenasserim Peninsula, and also in the Bawlake State of Karenni, chiefly by Chinese immigrants in an uncertain and unsystematic way. The production of tin-ore in 1911 was 1,943 cwts, rising to 13,321 cwts in 1917. In addition 2,818 cwts of block tin was produced in 1917, as against 2,257 cwts in 1916.

Wolfram (*Tungsten-ore*).—The great activity displayed in prospecting for wolfram in Tavoy and to a lesser extent in Mergui in Burma resulted in the output of 396 tons in 1910, rising to 2,645 tons, valued at R44,51,592, in 1915. The demand for the manufacture of high-speed steel gave an impetus to the wolfram industry of Tavoy from the latter part of 1915. The quantity of the ore produced in India in 1916 was 3,692 tons, valued at R74,60,955. In 1917 the output was 4,542 tons, valued at R93,46,110.

Zinc-ore.—The ore is found in association with galena in the Bawdwin mines in Burma, large ore-bodies being composed of the latter mineral and zinc-blende. In 1914, 8,553 tons of zinc-ore, valued at R1,61,430, were produced, as against 3,871 tons, valued at R73,065, in 1913. In 1915 the output fell considerably to 87 tons, valued at R2,610, but rose to 3,198 tons, valued at R87,396, in 1916. No output has, however, been recorded in 1917.

COAL MINES

[For Tables, see pages 88 to 94]

Sources of Statistics

All returns of production in the case of mines under the Indian Mines Act, VIII of 1901, are sent direct by the Managing Agents of mines to the Chief Inspector of Mines, who forwards them to this Department. The Director, Geological Survey of India, supplements them by the returns sent to him by Local Governments and Political Agents for non-Act and Indian States mines. Information regarding the imports and exports of coal has been taken from the Seaborne and Railborne Trade Accounts published by this Department. As regards consumption of coal, data have been specially obtained from the Railway Board, the Coal Controller, the Steamer Companies, the Port Trusts, mills and factory owners, and other consumers of coal. Additional information regarding foreign countries has been obtained from the British Board of Trade, British Consuls, and also from other official sources.

Production

The quantity of coal produced in each province in India from 1878 to 1917 is given in table No. 29. Although production and consumption have shown a steady increase, which has been specially noticeable since 1906, the development of the coal resources of the country is as yet incomplete.*

The total production in 1917 amounted to 18,213,000 tons or about 5·6 per cent more than was produced in the previous year. To this may be added some 364,000 tons estimated to have been taken out from the mines by miners for their own use. The total production in 1917 would thus come to some 18,577,000 tons, but for purposes of comparison the figure 18,213,000 tons should be adopted.

In the Raniganj field, output decreased by 159,000 tons. There was also a decrease in the production of the Giridih fields and of the mines of Rajputana and Sambalpur. The Jherria field on the other hand showed a large increase of over 826,000 tons, which went greatly to more than counterbalance the decrease elsewhere. A substantial increase was also marked in the coal-fields of Ramgarh-Bokarot (Hazaribagh) and the Central Provinces. The output of the mines in Hyderabad, Assam, the Punjab, and of the coal-fields of Jainty (Santhal Parganas) and Daltonganj (Palamau) also showed some increase.

Coal-fields

The coal-fields that have been worked in recent years are classified below, with the quantity produced in 1917, according as they belong geologically to the Gondwana system of strata, chiefly composed of sandstones and shales deposited in fresh water and by rivers, or to Tertiary (or Cretaceous) beds :—

Gondwana Coal-Fields—	1917 tons	Per cent of total	Tertiary Coal-Fields—	1917 tons	Per cent of total
Bengal and Bihar and Orissa—			*Baluchistan*—		
Daltonganj	79,600	·44	Khost	29,500	·16
Giridih	824,000	4·52	Sor Range, Mach, etc.	11,300	·06
Jherria	9,783,800	53·72	*Assam*—		
Jainty	86,900	·48	Makum, etc	301,500	1·66
Ramgarh-Bokaro	360,800	1·98			
Raniganj	5,376,000	29·52	*North-West Frontier Province*—		
Sambalpur	52,900	·29	Hazara	200	..
Central India—					
Umaria (Rewah)	198,400	1·09	*Punjab* (*Salt Range*)—		
Central Provinces—			Jhelum District	40,300	·28
Mohpani	71,700	·39	Mianwali ,,	2,900	
Pench Valley	204,500	1·12	Shahpur ,,	6,600	
Ballarpur (Chanda)	95,300	·52			
Hyderabad—			*Rajputana*—		
Singareni	680,600	3·74	Bikaner	6,100	·03
Total	17,814,500	97·81	Total	398,400	2·19

About 97·8 per cent of the coal supplies of India it will be seen, is obtained from the Gondwana coal-fields and 2·2 per cent from Tertiary beds.

The Raniganj field and the Jherria field are in the Damodar Valley and produce 83 per cent of the total output of Indian coal. The Raniganj field (where the first Indian coal mine was opened in 1820) held the first place as regards production up to 1905, but since then has stood second, its yield in 1917 being 5,376,000 tons

* "Of the numerous coal-fields of proved value in India 18 are actually being worked, but only 7 are of any considerable importance, whilst 89 per cent of the total output is produced in the Raniganj and Jherria fields. The reason for this state of things is not far to seek. Most of the coal-fields are too remote from the ports and centres of manufacturing industry to render it possible for their produce to be carried to places where it would have to compete with fuel from the premier coal-fields of Bengal," Ball and Simpson, Coal-fields of India, 1913—Memoirs of the Geological Survey of India, Vol XLI.

or 29·5 per cent of the year's total production. It lies chiefly within the district of Burdwan (Bengal), but stretches also across the boundaries of the district into Bankura (Bengal), Manbhum, and the Santhal Parganas (Bihar and Orissa). The Jherria field in Bihar and Orissa, which was opened in 1893, went ahead of Raniganj in 1906, and it has succeeded in maintaining the lead since that date, the output in 1917 being 9,783,800 tons (that is, 54 per cent of the total production). Of the remaining fields in Bihar and Orissa, the Giridih field, a small isolated patch to the north of the Damodar Valley, produced, in 1917, 824,000 tons or 5 per cent of the total. The Daltonganj field, further west in the Palamau district, was opened in 1901; it yielded 79,600 tons in 1917. The Jainty field, near Giridih, which was opened in 1914, produced 86,900 tons in 1917. In the Ramgarh-Bokaro field, lying immediately to the west of Jherria in the Damodar Valley, mining was begun in 1908, and its yield in 1917 was 360,800 tons. The Sambalpur field was opened for the first time in 1909, and its production amounted to 52,900 tons in 1917. These seven coal-fields accounted for 91 per cent of the coal raised in India in 1917.

Outside Bengal and Bihar and Orissa, the most important mine is the Singareni near Yellunda in the Hyderabad State. Work was begun at Singareni in 1887, and progress has been more rapid than in any other place outside Bengal and Bihar and Orissa, the average annual production during the last ten years being some 537,000 tons. Its output in 1917 was 680,600 tons. The Umaria mine in the Rewah State in Central India was started in 1884. Its progress was steady up to the year 1903, when the production was 193,300 tons; thereafter there was some retrogression until 1916 when the maximum output of 200,300 tons was reached. In 1917, the output fell to 198,400 tons. In the Central Provinces, the Ballarpur mine, lying in the Wardha Valley in the Chanda district, was opened in 1904 and the work of extracting coal began seriously in 1908. The output of this mine in 1917 was 86,300 tons. The Mohpani and Pench Valley fields lie, respectively, at the northern and southern fringes of the Satpura range. The former is situated in the Narsingpur district in the south of the Nerbudda alluvial valley and has been worked by the Great Indian Peninsula Railway Company since 1904; its output was, in 1917, 71,700 tons. The Pench Valley field in the Chhindwara district was opened in 1905; its yield rose from 1,100 tons in 1905 to 204,500 tons in 1917.

Next with reference to Tertiary or Cretaceous coal-beds. The most important of these are in north-east Assam, where the Makum coal-fields have been worked since 1882, and the coal obtained has a remarkably low percentage of ash and a high calorific value. The output was 301,500 tons in 1917. Next in rank of importance come the Salt Range mines of the Punjab and the Khost mines on the Sind-Pishin Railway in Baluchistan. Both of these have been worked for the past 31 years, but their production in 1917 was only 49,900 tons and 29,500 tons, respectively. The coal produced at Palana in the Bikaner State is really a dark brown lignite, and the production in 1917 was 6,100 tons, as compared with 13,800 tons in the previous year.

Value of coal at the pit's mouth

The value of the coal produced in India is reported annually by mine-owners. It represents the actual or estimated wholesale price of coal at the pit's mouth. The average value, of all the coal produced in each province in India in each of the last fifteen years is given in table No. 30. In 1917 the average value was R3-11 per ton. The lowest value, namely, R2-8 per ton, was that of 1905 and the highest (R3-15) was reached in the boom of 1908, when demand kept ahead of supply. The marginal table compares the average value at pit's mouth of Indian coal with the declared export value per ton in each of the last five years. The declared export value is 2½ times the value at the pit's mouth. The total estimated value of the output in 1917 was R6,77 lakhs, as against R5,82 lakhs in 1916.

AVERAGE VALUE OF COAL

	Declared export value per ton	Value at the pit's mouth per ton
	R a.	R a.
1913	9 13	3 8
1914	8 13	3 9
1915	9 3	3 5
1916	9 2	3 6
1917	9 5	3 11

Prices

The comparative average prices per ton of Bengal coal at Calcutta and of Indian and Welsh coal at Bombay and Karachi from 1903 are shown in table No. 31. In 1917 prices of Indian coal rose at all the three ports.

Freights

In order to get an idea of the comparative prices of Bengal coal in the principal centres of industry in India, the freight has to be added to the f.o.r. prices. The marginal table shows the freight (including 2 annas terminal charges on the E. I. Railway per ton of coal by rail for full wagon loads at owners' risk (owners to load and unload) from the Raniganj and Jherria fields in 1917. It is interesting to note that the transport of coal forms an important item in the earnings of the Railway Companies, especially the East Indian and the Bengal-Nagpur systems, which serve the coal fields of Bengal and Bihar, and Orissa.

	From Raniganj			From Jherria		
	R	a.	p.	R	a.	p.
To Calcutta	2	6	0	3	4	0
„ Cawnpore	6	6	0	6	1	0
„ Jubbulpore	7	1	0	6	13	0
„ Delhi	8	6	0	8	1	0
„ Lahore	10	3	0	9	15	0
„ Bombay	12	2	0	12	2	0
„ Karachi	13	9	0	13	5	0

The average rates of freight per ton of coal by sea from Calcutta during 1915, 1916, and 1917 were as stated in the margin. The rates in 1917 to Madras and Rangoon were very much higher than those in 1916. Coal Freight from Calcutta to Bombay and Karachi during 1916 and 1917 was unobtainable, and all coal for those ports was carried by rail.

	1915			1916			1917		
	R	a.	p.	R	a.	p.	R	a.	p.
To Bombay	10	4	0	..			..		
„ Karachi	10	4	0	..			..

Labour

Table No. 32 shows the total number of men, women, and children employed in coal mines in India during each of the last fifteen years. This number represents the "average daily attendance" throughout the year, and is obtained by dividing the total number of attendances by the number of working days in each year. Coal-mining employs more labour than any other *mining* industry, and will probably continue to do so for many years. In 1917, 167,272 persons were employed as against 156,554 in 1916, or an increase of

10,718 persons or 6·8 per cent. Details for the provinces for 1917 are given below :—

Province	Men	Women	Children	Total	Per cent of total	Output per person employed
Bihar and Orissa	63,420	40,865	2,286	106,571	63·71	111·96
Bengal	24,260	13,887	438	38,585	23·07	120·03
Hyderabad	8,995	2,571	..	11,566	6·91	58·84
Central Provinces	3,234	912	99	4,245	2·54	87·51
Assam	2,433	457	62	2,952	1·77	102·1
Central India	1,048	196	..	1,244	·74	159·49
Punjab	1,001	..	32	1,033	·62	48·27
Baluchistan	929	3	23	955	·57	42·7
Rajputana (Bikaner)	88	11	8	107	·07	76·5
North-West Frontier Province	14	..	..	14	..	15·35
TOTAL	105,422	58,902	2,948	167,272	100	105·88

The labour employed in the coal-fields of Bihar and Orissa showed an increase of 14,500 persons, while that in the Bengal coal-fields a decrease of 4,500 persons. The classes from which the colliery labour is recruited being largely agricultural, a favourable monsoon results in a shortage, since the miner leaves the collieries to cultivate his fields and only returns when his work is completed and his savings exhausted.

The *per capita* output of coal in India in 1917 is compared in the marginal statement with the results of the immediately preceding four years. The Indian miner is still to some extent a miner by caprice, and as stated above, in a year of agricultural prosperity the scarcity of labour is much felt. Epidemics of cholera and other diseases are not infrequent and cause a shortage of labour. As the workings get deeper, the need of a mining population, which specialises in mining, will become greater. The total number of fatal accidents during 1917 was 172, giving a death rate of one per 1,000 persons employed. There has been a great advance in the use of electricity in the coal mines of Bengal and Bihar for haulage, pumping, lighting, and ventilation. There is, however, little or no coal-cutting by machinery. Occasionally a plant is put down for the purpose of making long connections underground rapidly, but as long as labour conditions remain as they are, there will not be much headway in the introduction of mechanical coal-cutters.* It is stated in the report of the Chief Inspector of Mines that during the year under review the effects of scarcity of machinery and plant and the inability to obtain replacements and additions for development from Europe began to be felt in the larger and deeper mines.

	Above and below ground Tons	Below ground only Tons
1913	111·8	172·2
1914	108·7	166·7
1915	106·8	160·2
1916	110·2	169·4
1917	108·9	173·5

Imports

The quantities of foreign coal imported into India from the principal countries during the last twenty seven years are given in table No. 33. For the first fifteen years quinquennial averages only have been given. The figures represent only private merchandise and do not include Government stores, the imports of which amounted to 1,600 tons in 1917, as against 3,600 tons in 1916. The largest quantity imported in any one year of the series was some 820,000 tons, valued at ₹1,47,00,000, in the year 1894. The statistics for succeeding years are marked by considerable fluctuations. The largest quantity imported in recent years was in 1913, when 645,000 tons, valued at ₹1,22,00,000, were imported. In 1917 the imports were 44,800 tons, or an increase of 32 per cent as compared with the previous year. Bombay has naturally been the largest importer and Burma the second. The United Kingdom has usually supplied by far the greatest part of imported coal, but in 1916 and 1917 the largest quantity came from Australia. On the average of the twenty-seven years of the series, Australia holds the second place and Japan the third. The United Kingdom sent to India 6,903 tons in 1917 as against 5,492 tons in the previous year. The imports from Australia, which in 1912 amounted to 92,000 tons, declined to 22,554 tons in 1917. The imports from Japan in 1917, were only 448 tons. The imports from Natal were insignificant until 1907, the largest quantity imported being 136,700 tons in 1913. Natal's share in 1916 was 10,799 tons, and in 1917, 3,857 tons. The only other country from which coal is now imported into India in any considerable quantities is Portuguese East Africa. In 1917 the imports from Portuguese East Africa amounted to 9,080 tons as against 3,587 tons in 1916.

The provincial shares of imported coal in 1917 were : Bombay, 48 per cent of the total imports ; Burma, 34 per cent ; Bengal 16 per cent ; and Madras 2 per cent.

Exports

The total quantity of Indian coal exported from India during the last twenty-seven years and the share of each of the principal importing countries are shown in table No. 34. As in the case of statistics of imports, quinquennial averages only are given for the first fifteen years. Bunker coal and Government stores are not included in this statement, which relates only to coal shipped as private merchandise to foreign ports. The exports rose in proportion to the expansion in production up to the year 1906 ; thereafter there was a progressive decline in the ratio up to 1909. This decline was arrested in 1910, but there has again been a contraction in subsequent years. On the average of the seven years 1900 to 1906, the exports were 8 per cent of the total production of Indian coal, as against 6 per cent on the average of the succeeding seven years 1907 to 1913. In 1914 the ratio was 3·5 per cent and in 1915, 4·4 per cent, in 1916, 5·1 per cent, and in 1917, 2·2 per cent. That is to say, exports in 1917 were in the proportion of only one ton to about 45 tons produced. The bulk of the production is thus consumed in the country. Almost all the coal shipped as private merchandise from India is sent from Calcutta. Ceylon and the Straits Settlements are the two principal markets for Indian coal, and of the total quantity shipped in 1917, 73·4 per cent was for Ceylon† and 19·7 per cent for the Straits. Sumatra is now India's third best customer (2·1 per cent). From 1902 to 1906 the total exports abroad increased rapidly and reached 1,003,000 tons in 1906 ; but from 1907 the exports have not shown that expansion which might have been anticipated in view of the increased production. In 1917 the shipments fell

* *Vide* Record of the Geological Survey of India, Vol. XLVI, 1915

† For use of steamers as well as for exports abroad

to 408,000 tons. From 1914, the exports were specially handicapped by high ocean freight rates consequent on the very great shortage of tonnage due to the war. There was thus a considerable decrease in the coastwise exports of coal by sea to Indian ports, and the railways accordingly made special arrangements to carry the supplies to Bombay, Karachi, and Madras. The exports of coal from Bengal and Bihar and Orissa to Bombay Port during the four years ending 1917 were as follows :—

	1914	1915	1916	1917
	Tons	Tons	Tons	Tons
Shipped from Bengal (mainly Calcutta)	788,000	328,000	1,000	..
Carried by East Indian Railway	713,500	421,300	1,036,600	1,722,000
„ „ Bengal Nagpur Railway	42,000	210,200	498,700	757,300

Distribution

In table No. 35 is shown the total available supply of coal (Indian and Foreign) in India, which is arrived at by adding imports to the total production and subtracting exports therefrom. In 1917 the figure stood at 17,849,000 tons, as compared with 16,406,000 tons in 1916 and 16,094,000 tons five years ago. From this figure the consumption of coal per head of population comes to ·05 ton or about one cwt a year.

Tables Nos. 36 and 37 give the distribution of coal produced in the country and imported from abroad, and the agencies by which it is distributed. Calcutta uses Bengal and Bihar and Orissa coal almost exclusively. The province of Bihar and Orissa is self-supporting, although it takes a small quantity of Bengal coal. Bombay city derives its supplies by sea from foreign countries and by rail from Bengal and Bihar and Orissa, partly for its own consumption and partly for diffusion throughout the Bombay Presidency, which also receives considerable quantities by rail from Bengal, Bihar and Orissa, and Hyderabad. Madras imports most of its coal from Bengal and Bihar and Orissa, but also draws part of its supply from Hyderabad. Sind draws its supply mainly from Bengal and Bihar and Orissa. Assam, the United Provinces, the Punjab, the Central Provinces, Rajputana, and Central India import the bulk of the coal they require by rail and river from Bihar and Orissa and Bengal. Most of the coal consumed in Mysore comes mainly from the Hyderabad and Bihar and Orissa mines. Burma gets its supply from Bengal and Bihar and Orissa, and from foreign countries.

Consumption

The supply available in the cities of Calcutta and Bombay and in each province is given in table No. 38. The quantity available in Calcutta in 1917 was about $2\frac{1}{4}$ million tons, while that in the city of Bombay was $2\frac{1}{2}$ million tons.

The statement in the margin gives the quantity of coal (Indian and foreign) consumed during 1917, with detailed figures of consumption in different classes of industries, railways, etc. (both Goverment and private). The sources of information on which the statistics are based are stated in the following paragraphs. About a third of the total quantity of coal produced in India is consumed by railways.

	Estimated consumption Tons	Per cent of total
Railways	5,620,000(*a*)	31·5
Bunker coal	1,514,000	8·5
Admiralty and Royal Indian Marine Shipping Accounts.	1,429,000	8·0
Jute mills	1,026,000	5·7
Cotton mills	927,000	5·2
Iron and brass foundries (including Engineering workshops)	807,000	4·5
Inland steamers	508,000	2·8
Brick and tile factories (including potteries and cement works)	358,000	2·0
Cotton gins and presses and jute presses	294,000	1·6
Tea gardens	248,000	1·4
Flour and rice mills	225,000	1·3
Port Trusts and Dockyards	201,000	1·1
Arms and ammunitions (including arsenals and gun-carriage factory)	178,000	1·0
Paper mills	170,000	1·0
Oil mills	160,000	·9
Water works	124,000	·7
Electric supply works	96,000	·5
Tramway works	85,000	·5
Gold mines	84,000	·5
Sugar factories	77,000	·4
Gas works	63,000	·4
Lime works	61,000	·3
Breweries and distilleries	54,000	·3
Petroleum refineries	51,000	·3
Consumption at collieries and wastage	2,186,000	12·2
Other forms of industrial and domestic consumption†	1,303,000	7·4
TOTAL	17,849,000	100

Consumption on railways.—Table No. 39 shows the total quantity of Indian and foreign coal and of wood and oil fuel consumed on all the railways in India in each of the last twenty-eight years, according to statistics obtained from the Railway Board. At the beginning of this period (1890) the total consumption of coal was about 858,000 tons, of which foreign coal constituted nearly one-fourth. Ten years later (1895) the total consumption was $1\frac{2}{3}$ million tons, and Indian coal represented nearly 95 per cent, thus marking a rapid and vigorous displacement of foreign coal. In 1917-18 the total consumption was $5\frac{2}{3}$ million tons and practically the whole quantity was Indian coal, as compared with 5 million tons in the pre-war year of 1913-14. The railway consumption of Indian coal averaged 33 per cent of the total quantity of coal produced in India in the ten years ending 1899, 30 per cent in the ten years ending 1909, 31 per cent in the six-years ending 1915-16, 32 per cent in 1916-17 and 31 per cent in 1917-18*. The consumption of wood as fuel on railways decreased almost steadily from 1904 to 1914-15; since then there has been a gradual increase. In 1917-18, the quantity used was 243,000 tons as compared with 119,000 tons in 1916-17. This amount may be

(*a*) For the official year 1917-18

* The percentages for the last ten years are :—

Year	1908	1909	1910	1911	1912	1913-14	1914-15	1915-16	1916-17	1917-18
Percentage of Railway consumption of Indian Coal to total production	28	31	32	33	31	29	30	30	32	31

† Domestic consumption in Calcutta and its neighbourhood is estimated by the Coal Controller at 200,000 tons per year

regarded as equivalent to 97,000 tons of coal, reckoning 2½ tons of wood as equal to 1 ton of coal. Wood is still used largely on the Burma, the North-Western, and the Bombay, Baroda and Central India Railways. Besides coal and wood, 29,300 tons of oil fuel were used on Indian Railways in 1917-18 which are equivalent to 53,300 tons of coal reckoning ·55 ton of oil fuel as equal to 1 ton of coal. The consumption of coal in relation to the total mileage of Indian railways is compared with that of certain foreign countries in the marginal statement.

	Total mileage of railways	Total consumption of coal in tons	Consumption of coal per mile in tons
India (1917-18) .	36,785	5,620,245	153
United Kingdom (*a*)	23,691	13,576,623	573
Russia in Europe (*b*)	34,700	5,348,000(c)	154
Japan (1917) .	8,030	1,961,423	244

*Bunker coal.**—Statistics relating to the shipment of bunker coal have been obtained from the different Custom Houses. The total shipments in 1917 amounted to 1,514,000 tons. The details are :—Calcutta 486,000 tons, Bombay and Karachi 931,000 tons†, Madras 44,000 tons, and Rangoon 53,000 tons.

Consumption on Admiralty and Royal Indian Marine Shipping Accounts.—Figures were supplied by the Coal Controller. The consumption in 1917 was 1,429,000 tons, including about 480,000 tons supplied to the vessels carrying cargo coal for the Admiralty and Royal Indian Marine.

Industrial consumption.—A special census was undertaken in 1918, as in the preceding year, by this Department with regard to the consumption of coal in the various industrial establishments in India during 1917. Circular letters were issued to the owners or managing agents of all industrial establishments, etc., whose names and addresses were available, asking for statements of their actual consumption of coal in 1917. The statistics of consumption, given above for jute mills, cotton mills, iron and brass foundries (including engineering workshops), inland steamers, brick and tile factories (including potteries and cement works), cotton gins and presses and jute presses, tea gardens, flour and rice mills, port trusts and dockyards, arms and ammunition factories (including arsenals and a gun-carriage factory), paper mills, oil mills, water works, electric supply works, tramway works, gold mines, sugar factories, gas works, lime works, breweries and distilleries and petroleum refineries, are based on the returns thus obtained from the consumers. The figures in some cases may, however, be regarded as approximate, since returns were not furnished by some of the concerns, especially several brick and tile factories, a number of cotton gins and presses, and certain rice and oil mills. With regard to tea gardens, it may be noted that on many estates wood is the only or the chief fuel employed. Paddy husk is used in many rice mills in place of coal, especially in Burma.

Consumption at collieries and wastage.—Twelve per cent of the total production has been taken for consumption at collieries and wastage.

Other forms of industrial and domestic consumption.—A large part of the balance of 1·3 million tons must also be debited to industrial consumption and only a small part to domestic consumption ; for, besides the important classes of industries mentioned above, there are numerous other classes of establishments and factories which are worked by steam, the principal amongst which are, ice, mineral and aërated water factories, mints, municipal workshops, stone works, woollen mills, mining works (other than coal), chemical works, dye works, indigo and lac factories, glass works and rope works.

Attention has already been drawn to the fact that railways over a long period have consumed about a fixed percentage of the coal produced. It would seem from this, that railway development is a large factor in this country in regard to the development of the coal industry.

Capital employed

The growth of the coal-mining industry may be roughly gauged from the marginal table, showing the number of Joint Stock Coal Companies and their total paid-up capital. The total amount of capital employed in the coal-mining industry cannot be stated, as reports relating to capital are received only from Joint Stock Companies, and the capital employed by private individuals and syndicates is not known. There were 166 Joint Stock Coal Companies at work in Bengal and Bihar and Orissa on the 31st March, 1918. These Companies accounted for 72 per cent of the total output of the Bengal and Bihar and Orissa coal-fields in 1917. Outside Bengal and Bihar and Orissa, there were only seven Joint-Stock Companies at work during the year. Seven of the Coal Companies at work on the 31st March, 1918, have a paid-up capital (exclusive of debentures) of ₹15,00,000 (£100,000) or more, as shown in the margin. There are twenty-three others, each of which has a paid-up capital of ₹7,50,000 (£50,000) or above but less than ₹15,00,000 (£100,000).

India and Japan

The production, imports, exports, and the balance left for consumption of coal in India and Japan from 1891, are compared in table No. 40. In the first quinquennium period, the production of coal in Japan averaged about a million tons more than that of India. Since then the production of Japan has gone ahead, and, in 1917, it exceeded that of India by 7,725,000 tons. As regards the foreign import trade, India, as already noted, diminished her imports from abroad steadily till 1905 when a revival took place, but from 1915 the imports again declined (45,000 tons in 1917). Imports into Japan, under normal conditions, were inconsiderable in compari-

(*a*) For 1913, later figures not being available

* Bunker coal is not included in the figures of export

† Excluding about 480,000 tons of coal supplied to vessels carrying cargo coal for the Admiralty and Royal Indian Marine.

son with India until 1908; since then there has been a steady increase, and the imports in 1917 were nearly 702,000 tons. Production in Japan has always exceeded the requirements of internal consumption, leaving a considerable surplus for export; whereas, India has little to spare after meeting her own requirements; the net exports from Japan in 1917 amounted to over 2 million tons, as compared with less than half a million tons from India. The quantity left for internal consumption was about the same (nearly 11 million tons) in both the countries in 1907. In 1908 India retained about two-thirds of a million tons more than did Japan, but from 1909 the quantity retained for consumption in Japan has always exceeded that in India, the excess in 1917 amounting to 6 million tons. The marginal table shows the estimated internal consumption of coal in Japan in the years 1915 and 1917. The figures exclude bunker coal. These figures may be compared with the estimates of the consumption of coal in India given on the preceding page. From a comparison it will be seen that the consumption of coal on railways in India is nearly three times that in Japan. The freight per mile for coal carried by Indian railways to the places mentioned on page xi is about 2 pies per ton per mile, except in the case of Howrah (in close proximity to Calcutta) where the rate comes to 3½ pies per mile. The average rate of freight for coal on Japanese railways is about 3 pies per ton per mile.

	1915 tons	1917(*a*) tons
Railways	1,884,978	1,961,423
Production of salt	812,989	824,902
Factories	8,002,023	10,258,517
Other forms of consumption(*b*)	7,207,000	10,823,000

Table No. 41 gives comparative statistics of the average value of coal in the coal-mining industry in the different parts of the British Empire and in the principal foreign countries for a series of years so far as available. **British Empire and Foreign countries**

JOINT STOCK COMPANIES

[FOR TABLES, SEE PAGES 95 to 119]

The statistics are compiled from reports and returns prepared by the Registrars of Joint Stock Companies in British provinces under the Indian Companies Act, IV of 1882 (repealed by Act VII of 1913, which came into force on the 1st April, 1914), the Indian Life Assurance Companies Act, VI of 1912, and the Provident Insurance Societies Act, V of 1912, and in the State of Mysore under the Mysore Companies Regulation, III of 1895 (repealed by Regulation VIII of 1917). **Source of statistics**

The main features of the year are not difficult to summarise. The number of newly registered companies (both public and private) continued to increase in the year under review, the fourth year of war, the increase being no less than 50 per cent as compared with the preceding year. The authorised capital of new companies also increased from ₹17,26 lakhs to ₹32,21 lakhs, an increase of 87 per cent, but the paid-up capital in the same period decreased by 71 per cent, namely, from ₹100 lakhs to ₹29 lakhs. As will be seen from the marginal table, company flotation was still on a smaller scale than in the pre-war year. The Indian Companies Restriction Act, 1918 (XII of 1918), restricting the registraton of *public* companies without license from Government, stimulated the growth of companies classed as "private," a class of company which is already growing in popularity. The number of private companies registered in 1917-18 was 85 as against 32 in 1916-17. The companies (both private and public) that were formed were as follows:— **Main features of the year.**

	Companies registered Number	Authorised capital ₹(1,000)	Paid-up Capital ₹(1,000)
1913-14 (pre-war year)	356	66,91,53	76,94
1914-15	112	4,43,19	28,24
1915-16	131	7,20,49	66,82
1916-17	184	17,25,90	99,59
1917-18	276	32,20,55	28,79

Other Companies	16,78	47,91	1,74,64
TOTAL	66,91,53	17,25,90	32,20,55

(*a*) Figures for 1916 are not available
(*b*) Rough estimates

In the year under review (1917-18), 118 companies ceased to do business as against 147 in the preceding year.

Companies limited by shares incorporated in India

The total number of companies limited by shares, which have been incorporated in India up to 1917-18 under the laws relating to the registration of companies, is 7,593. Of these, 2,668 companies were working at the end of the year 1917-18, most of the remainder having been either wound up, or otherwise discontinued or never having commenced business, so that about 65 per cent of the companies registered have ceased working. Some companies were before the war taken off the Indian register to be reconstructed as companies under the English law with their head offices in London, while, after the outbreak of war, some companies incorporated in the United Kingdom were taken off the English register and reconstructed as companies under the Indian Act. All the companies registered in India have a rupee capital with the exception of the Hongkong and Shanghai Banking Corporation, which was registered in Calcutta in 1869 with a capital in Hongkong dollars of which the rupee equivalent is stated in the tables. The number of all companies at work and the capital invested in them stood as follows at the end of each of the last three years :—

		1915-16	1916-17	1917-18
Companies	Number	2,476	2,513	2,668
Authorised capital	R(1,000)	1,84,20,90	2,00,04,22	2,34,18,84
Paid-up capital	R(1,000)	85,02,45	90,89,56	99,09,72

There was thus an increase in the year of 155 in the number of companies, as against the previous year, or an increase of 6 per cent, of R34,14,62,000 in the authorised capital, or an increase of 17 per cent, and an increase of R8,20,16,000 in the paid-up capital, or 9 per cent.

Changes during the year

The changes in the year, which produced the results shown above, were :—

(1) 118 companies, with an authorised capital of R3,95,70,000 and a paid-up capital of R1,23,99,000 and 6 hostile companies with an authorised capital of R22,50,000 and a paid-up capital of R20,87,000 ceased to do business ;

(2) 276 new companies, with an authorised capital of R32,20,55,000 and a paid-up capital of R28,79,000 were registered during the year ; and three companies with an authorised capital of R2,20,000 and a paid-up capital of R32,000 revived under order of the court ;

(3) the authorised capital of 75 companies was increased by R6,21,36,000, while that of six companies was reduced by R11,29,000 ;

(4) the paid-up capital of 614 companies was increased by R9,58,48,000, while that of 91 companies was reduced by R22,57,000.

Distribution according to provinces

The following statement shows the number of companies at work, and the amount of paid-up capital, in each of the provinces at the end of the last two years :—

Province	Number of Companies		Paid-up Capital		Increase + or decrease — per cent in capital in 1917-18	Provincial proportion of paid-up capital to total paid-up capital in 1917-18
	1916-17	1917-18	1916-17	1917-18		
			R(1,000)	R(1,000)	per cent	per cent
Bengal	1,075	1,176	37,25,78	42,95,18	+15·3	43·3
Bombay	551	569	33,33,03	34,38,37	+3·2	34·7
Madras	332	356	5,98,27	6,36,90	+6·5	6·4
United Provinces	147	143	4,65,56	4,93,97	+6·1	5·0
Burma	105	113	5,66,15	5,71,89	+1·01	5·8
Punjab	80	83	2,19,42	2,61,97	+19·4	2·6
Delhi	14	16	19,67	53,32	+171·07	·5
Assam	55	58	24,72	27,38	+10·8	·3
Bihar and Orissa	37	33	15,59	15,26	—2·1	·2
Central Provinces and Berar	27	25	46,31	38,46	—17·0	·4
Ajmer-Merwara	14	13	18,43	17,84	—3·2	·2
Bangalore (Civil and Military Station)	8	9	6,73	7,44	+10·5	·08
North-West Frontier Province	2	2	2,28	2,32	+1·8	·02
Coorg	1	1	24	24	..	..
Mysore State	65	71	47,38	49,18	+3·8	·5
TOTAL	2,513	2,668	90,89,56	99,09,72	+·9	100

The total net increase in paid-up capital was R8,20,16,000; Bengal accounting for R5,69,40,000; Bombay R1,05,34,000; and Madras R38,63,000. Bengal and Bombay between them have 78 per cent of the whole paid-up capital of joint stock companies in British India and Mysore.

Average capital per company

The number of companies registered in Bengal is over two-fifths of the total number registered throughout India, but the average paid-up capital per company is highest in Bombay. In this respect Burma occupies the second place and Bengal the third, as will be seen from the subjoined table showing the average paid-up capital of a company in each province in the last two years :—

	Average Capital of a Company	
	1916-17	1917-18
	R	R
Bombay	6,04,000	6,04,000
Burma	5,40,000	5,06,000
Bengal	3,46,000	3,65,000
United Provinces	3,16,000	3,45,000
Delhi	1,40,000	3,33,000
Punjab	2,74,000	3,16,000
Madras	1,80,000	1,79,000
Central Provinces and Berar	1,73,000	1,54,000
Ajmer-Merwara	1,32,000	1,37,000
North-West Frontier Province	1,14,000	1,16,000
Bangalore (Civil and Military Station)	84,000	83,000
Mysore State	73,000	69,000
Assam	45,000	47,000
Bihar and Orissa	42,000	46,000
Coorg	24,000	24,000

Classification of companies

The comparatively low place of Madras in respect of the average capital, in spite of its occupying the third place in respect of the number of companies, is to be found in the extremely large application of the Companies Act to the business of small money-lending societies (*nidhis*). No less than 185 out of the 485 "banking and loan" companies in all India have been registered in Madras, with a paid-up capital of R2,21,73,000, or R1,20,000 per company.

The statement below shows the distribution of the aggregate capital in the principal classes of joint stock enterprise at the end of 1917-18, as compared with that at the end of the preceding year :—

Class of Companies	Number		Authorised Capital		Paid-up Capital	
	1916-17	1917-18	1916-17	1917-18	1916-17	1917-18

Banking, loan, and insurance

The total amount of paid-up capital invested in banking, loan, and insurance companies is R10,71,08,000, of which 38 per cent is in companies registered in Bengal and 21 per cent in Madras. There is a striking contrast between the authorised and the paid-up capital of insurance companies. Most of these are the so-called provident or mutual aid societies registered in Bengal, where no less than 90 out of the 121 insurance companies are registered.

Trading

Trading companies account for a paid-up capital of R29,76,17,000, of which R13,18,64,000, or over 44 per cent, is invested in railways and tramways. Bombay represents about R6,85,40,000 or 52 per cent of the total capital invested in railways and tramways and Bengal R6,19,88,000 or 47 per cent.

Mills and presses

About three-eighths (R35,31,43,000) of the aggregate paid-up capital are invested in mills and presses, chiefly for working or pressing cotton, jute, wool, and silk. A great number of the mills and presses are registered in Bombay, that presidency representing nearly 44 per cent (R15,63,54,000) of this sum, most of it being invested in cotton mills and presses. Mills and presses (mainly jute) registered in Bengal represent about three-fourths (R12,72,51,000) of the capital invested in mills and presses in Bombay.

Planting

In tea, coffee, and other plantations, R6,05,64,000 of paid-up capital are invested, and of this amount R5,12,99,000 are held in Bengal, the majority of the tea companies owning gardens in north-eastern India being registered in Calcutta.

Mining and quarrying

The capital of mining and quarrying companies is R12,41,44,000, of which over 56 per cent (R6,93,83,000) is invested in companies registered in Bengal. Most of it represents capital invested in coal mines.

Summary

In the year under review there was a substantial increase in the paid-up capital applied to the manufacture of jute, and to banking and loan. The increase in the capital applied to land and building, to the manufacture of wool and cotton, to railways and tramways, to tea and other planting, to coal mining, and to navigation was also considerable. In flour mills, and in cotton and jute screws and presses, there was a decrease. In most other directions, it may be noted, there has been an augmentation of capital.

New registration

As stated above, 276 new companies were registered during the year 1917-18, with an authorised capital of R32,20,55,000 and a paid-up capital of R28,79,000, as compared with 184 companies with an authorised capital of R17,25,90,000 and a paid-up capital of R99,59,000 registered in 1916-17. The following statement gives a classification of the new companies registered in 1916-17 and 1917-18 according to the amount of their authorised capital :—

Grades of new companies according to capital

Authorised Capital	Number of Companies 1916-17	1917-18
Under R1,000	1	1
R 1,000 and under R 5,000	2	1
R 5,000 „ „ R 10,000	2	2
R 10,000 „ „ R 20,000	3	10
R 20,000 „ „ R 50,000	35	40
R 50,000 „ „ R 1,00,000	20	23
R 1,00,000 „ „ R 2,00,000	25	58
R 2,00,000 „ „ R 3,00,000	22	42
R 3,00,000 „ „ R 4,00,000	15	16
R 4,00,000 „ „ R 5,00,000	7	7
R 5,00,000 „ „ R 7,50,000	17	26
R 7,50,000 „ „ R 10,00,000	4	4
R 10,00,000 and above	31	46
	184	276

From the above it appears that a representative company is that which has an authorised capital of about R1,50,000.

Debenture capital

It should be noted that the capital dealt with in the foregoing paragraphs represents share capital only, while several companies have issued debentures, the total value of which at the close of the half-year ending June, 1918, amounted to R12,26,93,000, of which R6,32,10,000 belong to Bengal, R5,08,67,000 to Bombay, R19,47,000 to the United Provinces, R34,71,000 to Madras, and R31,65,000 to the Punjab. The value of cotton mill debentures was R2,95,57,000, of jute mill debentures R3,70,75,000, and of paper mill debentures R22,00,000.

Companies limited by guarantee and associations not for profit

At the close of the year 1916-17, there were 215 companies limited by guarantee, not having a share capital (including associations not for profit), incorporated in India under the Indian Companies Act. Of these, 12 ceased to work and 12 new companies were registered during the year 1917-18, giving a total of 215 companies at work on the 31st March, 1918.

Companies incorporated outside India

Statistics have been collected, so far as possible, regarding companies which are incorporated elsewhere than in India, chiefly with sterling capital, but which carry on work in India. The total number of such companies working at the end of 1917 for which returns are available is 607, and the paid-up capital thereof amounts to £417,759,000, besides £126,978,000 being the amount issued as debentures. Railways represent £69,607,000 of the paid-up capital and £69,448,000 of the debentures. Of the remainder, the sterling share capital invested in the tea industry is £18,420,000 and in jute mills £1,994,000. The gold fields in Southern India are chiefly worked by companies formed in the United Kingdom, the paid-up sterling capital being £2,323,000. It should, however, be borne in mind that in the case of most of the banking and insurance companies and of some of the navigation and other trading companies incorporated outside India, only a portion, sometimes a very small portion, of the capital shown above is invested in India, as these companies work also in other countries besides India, and information regarding the portion of their capital invested in India is not available.

Fees collected

The amount of fees, for both registration and copying, realised by the provincial Registrars of Joint Stock Companies in connection with the registration of companies in the year under review amounted to R1,22,796, as compared with R97,228 in the preceding year.

PATENTS AND DESIGNS

[For Table, see page 120]

The laws for granting exclusive privileges to inventors and for protecting patterns and designs were amended and consolidated by the passing of the Inventions and Designs Act, V of 1888. This Act has since been repealed by the Indian Patents and Designs Act, II of 1911, which came into force on the 1st January, 1912, but certain applications made under the repealed Act of 1888, which were pending at the close of 1911, were disposed of in 1912. The year 1912 was, therefore, one of transition during which two methods of procedure were in force, so that the figures and details from that year are not strictly comparable with those of earlier years. The statistics presented in this table summarise the working of the law for the last ten years.

The inventions for the use of which exclusive privileges have been sought or acquired during recent years relate in the main, so far as the subjects are enumerated, to bicycles and similar vehicles, the manufacture of tea, railway material, lamps and burners, the treatment of metals, electrical contrivances, spinning and weaving machines, water-lifts and pumps, sugarcane and other mills, chemical appliances and preparations, improvement in building and building materials, flying machines, and talking machines. The number of applications made in 1917, under section 3 of the Indian Patents and Designs Act of 1911 for the grant of a patent, was 602. In the year 1913 before the war, the number of applications for patents was 705. It fell gradually to 442 in 1916, so that the figure 602 in 1917 shows a satisfactory revival. Patents

Of the 602 applications for the grant of a patent presented in 1917, 418 were accepted and 184 were pending. Of the applications 243 were made by residents in India, of whom 114 were Indians and 129 other residents. The remaining 359 came from outside India.

The number of patents in force at the end of 1917 was 2,546. These include 1,849 patents out of 2,496 sealed on 3,460 applications under the Act of 1911, together with 57 of the 148 patents converted under section 81 of that Act. The balance 640 consists of exclusive privileges remaining under the Act of 1888.

The number of applications for registering copyright in designs during the year shows a decrease—there were 1,591 in 1917 as compared with 1,773 in 1916. Of the 1,591 applications made, 1,561 were registered, only 13 of them being from residents in India. The number of applications since the Act of 1888 came into force now stands at 7,738. Designs

The income increased from R77,609 in 1916 to R90,846 in 1917, the largest on record. This is mainly due to the increasing number of patents in force on which renewal fees are paid. Of the total receipts the sum of R68,000 represented continuance fees, by payment of which existing privileges are kept in force.

FOREIGN TRADE AND SHIPPING

[FOR TABLES, SEE PAGES 121 TO 156]

These tables, which include imports and exports on account of Government, exhibit, for various periods extending in many cases back to 1834-35, the progress of the foreign sea-borne trade of India generally, and of each province separately, in the principal articles of trade, and with the principal foreign countries, also the progress of shipping. They thus supplement the annual accounts of the foreign trade which exhibit the progress of the trade for only five years.

The following statement shows the variations in the imports and exports (including re-exports) from 1885-86 given in table No. 50, the annual average trade of the ten years 1904-05 to 1913-14 (*i.e.*, the decennium preceding the outbreak of war) being taken as 100 :— Progress of foreign sea-borne trade

	Imports			Exports, including re-exports		
	Merchandise	Treasure	Total	Merchandise	Treasure	Total
1885-86 to 1894-95 .	50	37	47	51	36	50
1895-96 to 1904-05 .	61	56	60	62	108	64

1917-18 . .	121	(*a*)	(*a*)	125	(*a*)	(*a*)

A full report of the trade of each year will be found in the *Review of the Trade of India* which has been published annually for the past forty-four years.

(*a*) Temporarily discontinued

The statement below shows the details of the total sea-borne trade, both private and Government, during the five years ending 1917-18 :

	1913-14	1914-15	1915-16	1916-17	1917-18
	Rupees (000 omitted)	Rupees (000 omitted)	Rupees (000 omitted)	Rupees (000 omitted)	Rupees (000 omitted)
Imports of Merchandise	191,30,80	144,93,07	138,16,93	160,24,90	164,35,49
„ Treasure	43,43,96	21,80,83	11,94,62	38,45,27	(a)
TOTAL IMPORTS	234,74,76	166,73,90	150,11,55	198,70,17	(a)
Exports of Merchandise	249,00,75	182,17,60	199,48,04	247,31,10	244,89,48
„ Treasure	7,08,29	5,28,95	8,22,58	6,41,72	(a)
TOTAL EXPORTS	256,09,04	187,46,55	207,70,62	253,72,82	(a)
TOTAL SEA-BORNE TRADE	490,83,80	354,20,45	357,82,17	452,42,99	(a)
Net Imports of Treasure	36,35,67	16,51,88	3,72,04	32,03,55	44,22,04
Net Exports of Merchandise	57,69,95	37,24,53	61,31,11	87,06,20	80,53,99
Excess of Exports over Imports	21,34,28	20,72,65	57,59,07	55,02,65	36,31,95

The imports of merchandise rose by R4 crores to R164 crores, while the total exports, including re-exports, decreased by R2 crores to R245 crores. The ratio of increase or decrease is shown below, by taking the figures for 1917-18 as equal to 100 :

	1913-14	1914-15	1915-16	1916-17	1917-18
Exports of merchandise	101·7	74·4	81·5	100·9	100
Imports „ „	116·4	88·2	84·1	97·6	100
„ Total	107·6	79·9	82·5	99·6	100

There were noticeable increases in the value of the imports from Japan (+R4·98 crores), and from the Straits Settlements (+R1·39 crores). Bombay and Sind shared the largest increase of R4·29 crores, and Bengal came next with R2·29 crores.

The principal articles showing marked variations are shown in the table below :

		Quantity (000 omitted)		Value (000 omitted)		Increase+or Decrease— per cent compared with 1916-17

Shipping

The number and tonnage of steamers and sailing vessels with cargoes and in ballast which entered from and cleared to all countries during 1917-18 were 11,459 and 10·87 million tons, as detailed below, as compared with the previous four years :—

		1913-14	1914-15	1915-16	1916-17	1917-18
Entered	Vessels	4,294	3,937	4,212	4,968	5,499
	Tons (000 omitted)	8,624	6,313	6,038	5,885	5,250
Cleared	Vessels	4,323	4,023	4,422	5,418	5,960
	Tons (000 omitted)	8,762	6,545	6,114	6,070	5,618

In 1917-18 the number of vessels under the principal flags were British and British Indian 4,884, Japanese 478, Dutch 226, Norwegian 210, Italian 193, Greek 103, Chinese 98, Swedish 48, and native craft 5,056.

WRECKS

[For Table, see page 157]

This table exhibits the number of British, British Indian, and native vessels which were totally lost in Indian waters (from Suez to Penang), the total tonnage of vessels wrecked, and the number of lives lost, in the past twenty-five years.

The number and tonnage of each class of vessels annually lost from 1877 and the proportion which the number and tonnage bear to the total number and tonnage of vessels that cleared from Indian ports, are approximately as follows :—

	BRITISH								BRITISH INDIAN				NATIVE CRAFT			
	STEAM				SAILING				SAILING							
	Number lost	Tonnage	Ratio borne to		Number lost	Tonnage	Ratio borne to		Number lost	Tonnage	Ratio borne to		Number lost	Tonnage	Ratio borne to

63 vessels were totally lost in 1917, of which 9 were British, 41 British Indian, and 13 native craft, excluding two vessels of foreign nationality. There were 28 founderings, 31 strandings, 1 collision, and 3 miscellaneous cases amongst the wrecks. In a total of 63 wrecks, 104 lives were reported to have been lost during the year.

The causes of exceptional loss of life in certain years are stated below—

1876. 400 pilgrims perished in the *Hydari*, bound from Calcutta to Jeddah.
1879. Continuous bad weather, and a cyclone, on the west coast of India in May.
1885. The *Speke Hall* foundered (58 lives lost) in the Gulf of Aden; and three vessels were wrecked (239 lives lost) in cyclones in the Bay of Bengal and on the east coast of Arabia.
1887. The *Sir John Lawrence* foundered (750 lives lost) at the mouth of the Hooghly in a cyclone.
1888. The *Vitarna* (800 lives lost) wrecked off the Káthiawár coast in a cyclone.
1891. Four vessels were wrecked in a cyclone in the Bay of Bengal.
1892. The *Deccan* foundered (214 lives lost) in the Indian Ocean.
1896. The *Luna* was wrecked (75 lives lost) in the Gulf of Aden.
1902. The *Camorta* was wrecked (781 lives lost) on the Burma Coast.
1905. The *Hashemi* foundered (74 lives lost) off the south Orissa coast in a cyclone.
1911. The *Fifeshire* was wrecked (24 lives lost) in the Gulf of Aden.
1912. The *Chinho* foundered (100 lives lost) in the Hlaing river near Tantabin (Burma).
1913. Two vessels (*Aungzeya* and *Mombai Salamat*) capsized, the former near Onbinzeik, Attaran river (Burma), and the latter in the Gulf of Cambay, the total number of lives lost being 33.
1916. The *Pobha* foundered (38 lives lost) in the Brahmaputra river above Barsolaghat, Assam.
1917. The *Jumna* and the *Mongolia* foundered, the former off Perim in the Red Sea (29 lives lost), and the latter as the result of striking a mine off the Bombay coast (25 lives lost). Four other steamers struck mines with the loss of 23 lives.

MERCHANDISE MARKS

[For Table, see page 158]

The Indian Merchandise Marks Act (IV of 1889) was passed in 1889, but its operation in the earlier years was restricted, especially in Calcutta, in consequence of the lack of adequate Customs machinery for the examination of goods. In 1894, with the introduction of the present tariff, the Customs staff was strengthened for the examination of goods for assessment to duty, and this increase enabled examination to be made at the same time for the purposes of the Merchandise Marks Act.

The Act was intended originally to prevent the fraudulent sale of goods bearing false trade marks or false trade descriptions (as of origin, quality, weight, or quantity). While the Act was before the Legislature, a provision was added to require that all piece goods should be stamped with their length in yards. In this respect these goods are an exception, for the Act does not require that other descriptions of goods should be stamped or marked, though it requires that when goods are marked the marks must be a correct description.

In 1917-18 the total number of infringements of the Act were 2,810, as against 2,938 in 1916-17. Of this Bengal reported 446, Bombay 1,778, Burma 156, Madras 207, and Sind 223 cases. The increase which chiefly occurred in Bombay is mainly due "to the fact that the war has necessitated the opening of new channels of supply; and the manufacturers of the goods which have supplanted the products of Germany and Austria are learning but slowly the requirements of the Merchandise Marks laws. Contributory causes are (i) the dislocation of labour in England and Europe generally on account of the war and consequent change of hands in the factories, and (ii) the higher percentage of examination necessitated by the various war restrictions." The majority of the infringements (2,071 out of 2,810) were cases of false trade description as to the country of origin. In many of these cases it was reported that "goods not manufactured in the United Kingdom or British India bore names of British Indian dealers or were described in such a manner as to suggest British or British Indian origin," or "deliberate attempts were made to place Japanese goods on the market under false trade descriptions" or "goods made in one foreign country bore descriptions suggestive of origin in another foreign country." Usually detained goods are released with a fine. In 1917-18, however, this procedure was followed in 1,649 cases; and in 1,154 cases the detained goods were released without the infliction of a fine, but with a warning to the importers or with orders insisting on the correction of the offending marks. Detention is but rarely followed by confiscation, and there were only 7 such cases during 1917-18.

The average number of detentions under the Act during the twenty years ending 1917-18 has been as stated in the margin. In this period of twenty years, 33 per cent of the detentions were on account of the application of false trade marks or false trade descriptions. In 47 per cent of the cases detention was ordered because the country of origin was either not stated or was falsely stated, and in 20 per cent because the provisions of the Act for the stamping of piece goods had been infringed.

Average of the five years ending	1902-03	1,411

" " " "	1917-18	2,388

POST OFFICE

[For Tables, see pages 159 to 192]

The main business of the post office is the conveyance and delivery of letters, postcards, newspapers, parcels and book-packets. The total length of mail lines over which its work is carried on is 157,606 miles. Railway and steamer services now extend over 53,599 miles of this length, and the other 104,007 miles are worked by boats, mail-carts, horses, camels, and runners. Many carriage and cart lines are, however, subsidised for the carriage of mails. The number of post offices is 19,410, of letter-boxes 49,749 (excluding those at post offices), and of village postmen 8,289. The actual number of registered articles of the letter mail and of parcels posted, added to the estimated number of unregistered articles of the letter mail given out for delivery, in 1917-18 amounted to more than 1,114 millions.

Letters and other articles carried

In 1899 the Indian Post Office joined the International Parcel Post Union; and parcels are now exchanged by post between India and almost every country in the world.

International Parcel post

In 1877 the post office undertook to collect from the addressee the declared value of a parcel or registered article and to transmit the money to the sender. The extent to which this system is used by traders and their customers is indicated by the fact that in 1917-18—that is 40 years after its introduction—the number of value-payable articles carried was 10,068,093 and the value declared for realisation was ₹14,45,14,114.

Value-payable parcels

In December, 1898, the limit to the sum for which an article could be insured was raised for registered letters and value-payable registered letters and registered parcels to ₹2,000, and the procedure in connection with the insurance of articles was simplified, the sender of an insured article being no longer required to declare its contents. The insurance fee was at first fixed at one-half per cent, but shortly afterwards it was reduced to one-quarter per cent, and in July, 1905, it was further reduced to one-eighth per cent. The gross sum for which articles were insured by the post office in 1917-18 was nearly ₹89,42,40,697.

Insurance of letters and parcels

In 1880 the Government of India transferred from the treasuries to the post office the business of the issue and payment of money orders, with the result that within a few months the number of orders issued was quadrupled. The value of inland money orders issued has increased from ₹4,57,09,000 in 1880-81 to ₹63,23,56,200 in 1917-18. Special arrangements have been made to adapt the money order system to remittances of revenue, rent, and miscellaneous Government dues, and in several provinces the system is largely used for these purposes. The commission on inland money orders is 4 annas for each complete sum of ₹25, with lower rates of 1 anna, 2 annas, and 3 annas, respectively, for any sums or remainders not exceeding ₹5, ₹10, and ₹15. Foreign money orders are also exchanged with the principal countries of the world, the maximum limit of a rupee order being ₹600 and that of a sterling order £40, except in a few cases in which the maximum limit is either £10 or £20.

Money orders

British Postal orders

In 1884 the Indian Post Office undertook the sale of British postal orders. Such orders, ranging in value from 6*d.* to 21*s.*, can now be exchanged with the greater part of the British Empire and are also used for inland remittances.

Savings banks*

In 1870 Government savings banks* were established in connection with district treasuries. In 1882 sanction was given for the opening of savings banks at post offices, and three years later the closure of the treasury savings banks was ordered. In 1882-83 the number of depositors in the postal savings banks was 39,000 and the sum at their credit R27,97,000. By the end of 1917-18 the number of depositors was 1,637,600 and the sum at their credit amounted to R16,58,46,469. The post office undertakes on behalf of depositors the purchase and sale of Government promissory notes and the transfer of such notes to the Accountant-General, Posts and Telegraphs, for custody on behalf of the purchaser.

Cash certificates

With effect from 1st April 1917 Post Office 5 years Cash Certificates are being sold at all Post Offices at which Savings Bank business is transacted.

Postal telegrams

In 1883 many post offices were made receiving offices for the transmission of inland telegrams by post to the nearest telegraph office; and telegraph work was also undertaken by the post office in a certain number of offices. The number of telegraph offices has thus been largely increased, and out of 3,539 state (non-railway) telegraph offices on the 31st March, 1918, 3,337 were postal telegraph offices. In 1917-18 the number of messages transmitted by receiving offices was 72,755 and the number of messages signalled by postal telegraph offices was 11,349,659 excluding free messages.

Postal life insurance

In 1884 sanction was given to a scheme of life insurance, whereby an officer of the postal service is enabled to obtain a policy for a sum not exceeding R4,000 on the security of Government. In 1888 the scheme was extended to the Telegraph Department. In February 1898 the scheme was extended generally to all Government servants, who are subject to civil rules, and a system of endowment assurances was added to the scheme. By the end of 1917-18, nearly 38,305 lives had been insured for the aggregate sum of R5,17,50,978.

Payment of military pensioners

In 1890 the post office undertook the payment of military pensioners in the Punjab at the post offices nearest their homes. The number of pensioners thus paid in 1917-18 was about 76,611 and the aggregate sum paid to them R53,31,750.

Rates of postage, inland and foreign

Letters and postcards.—With effect from the 1st October, 1907, the weights of letters allowed for ½ anna and 1 anna were raised from ¾ to 1 tola and from 1½ to 10 tolas,† respectively. Embossed envelopes bearing a half anna coloured impressed stamp and sold at the face value of the stamp without any charge for the envelopes were introduced in 1873. Formerly an additional charge was made for re-direction, equal to the postage paid when the letter was posted, but the additional charge was discontinued in 1877. The introduction of the inland postcard in 1879 gave a still lower rate of postage than that given by the rate of half an anna per half tola with an envelope supplied without charge. The inland posteard has from its introduction been priced at one pice (three pies) per single card and half an anna per reply card, the price in each case covering the cost of the card as well as postage.

Newspapers and packets.—A new system of "registering" publications as newspapers was introduced in January, 1897, under which a "registered newspaper" of weight not exceeding twenty tolas is carried by the inland post for half an anna. From the 1st January, 1904, the maximum weight for a registered newspaper admissible for transmission through the post for one-quarter of an anna postage was raised from 4 to 6 tolas. This weight has been further raised, since the 1st October, 1908, from 6 to 8 tolas, concurrently with an increase from 20 to 40 tolas in the maximum weight admissible for half an anna postage.

The postage on packets other than newspapers was one anna for 10 tolas until 1877, when the rate was reduced to one anna per 10 tolas for book packets and two annas per 40 tolas for book packets and patterns. In 1878 the packet rate was lowered to half an anna per 10 tolas.

Parcels.—The present rates of postage, which came into force on the 1st October, 1907, and which are applicable to all classes of parcels, are (1) in the case of parcels not exceeding 440 tolas ‡in weight, 2annas for every 40 tolas or part of that weight; and (2) in the case of parcels exceeding 440 tolas in weight, R3 for a parcel not exceeding 480 tolas in weight, and 4 annas for every additional 40 tolas.

Registration fees.—From the 1st July, 1901, the fee for the registration of a parcel was fixed at a uniform charge of 2 annas.

Official papers.—With effect from the 1st October, 1907, the postage rates for official letters, packets, and parcels are the ordinary rates for those articles.

Foreign postage.—The rates now are—for letters, 2½ annas for the first ounce and 1½ annas for every additional ounce; for post cards, single, 1 anna each; reply, 2 annas; for printed papers, half an anna per two ounces; for business papers entirely or partly in manuscript, 2½ annas for the first 10 ounces and half an anna for every 2 ounces additional; for samples, 1 anna for the first 4 ounces and half an anna for every 2 ounces additional. Since the 1st October, 1907, the rate for letters sent from British India to the United Kingdom and almost all British Possessions, as also to Egypt (including the Soudan), has been fixed at one anna§ for every ounce or fraction thereof.

---

* For detailed information regarding Post Office Savings Banks, see Vol. II of the Statistics of British India

† With effect from 1st January 1919, the weight of letters allowed for 1 anna was reduced from 10 tolas to 2½ tolas

‡ With effect from the 1st November 1918, the rate of postage on parcels exceeding 20 tolas but not exceeding 440 tolas in weight was raised to 4 annas for every 40 tolas or part of that weight. This rate was again reduced to 3 annas with effect from the 16th May 1919

§ From the 1st September 1918 this rate has been altered and the following revised rates have been introduced:—

For a letter not exceeding one ounce in weight—One and a half annas

For every additional ounce or parts of that weight—One anna

The statement below shows the annual subsidies paid under existing contracts for the carriage of mails by steamer on the Indian coasts and rivers and for the maintenance of communication with Ceylon, the Straits, and the Persian Gulf : Mail steamer subsidies

	TOTAL	12,39,582

For the lines of postal communication under contract with the Peninsular and Oriental Company an annual subsidy of £305,000 is paid by His Majesty's Government for the combined Eastern and Australian mail services. The Indian share of this subsidy has not yet been assessed.

TELEGRAPHS

[FOR TABLES, SEE PAGES 193 TO 196]

Inland tariff

On the 1st December, 1916, a revised inland tariff was introduced, and the rates* are (1) Express—one rupee for 12 words and 2 annas for each additional word, and (2) Ordinary— eight annas for 12 words and half an anna for each additional word, the address being charged for. On the 1st May, 1914, the rates for cablegrams between India and Europe were reduced from R1-8 per word *viâ* Indo or Eastern to R1-4 per word. A system of deferred telegrams in plain language at half the usual rates for private telegrams was introduced between the United Kingdom, Germany, France, Algeria, Tunis, Portugal, and the United States of America, with effect from the 1st January, 1912, and was subsequently extended to practically all European administrations, besides a number of administrations in the extra European régime. The rates between Australia on the one hand and India, Burma, and Ceylon on the other, were reduced to a uniform rate of R1-14 per word with effect from the 1st June, 1903. From the 1st May, 1914, a system of week-end cable telegrams at one-fourth the rate for ordinary telegrams, with a minimum of 20 words per telegram, was introduced between India and the principal British Possessions, Portugal, and Germany, but this was discontinued in August, 1914, on the outbreak of the European war. It was reintroduced in January, 1915, but without the minimum charge and restricted to telegrams of a social character exchanged with soldiers, sailors, and nurses serving with the Allied forces in different parts of the world.

Tariff between India and Europe, America, Australia, etc.

Tariff between India and Mesopotamia

With effect from the 1st December, 1915, a reduction of twelve annas a word was made in the rate for telegrams exchanged between India and Mesopotamia, and of two annas a word in the rates for telegrams between India on the one side and Persia and the Persian Gulf on the other. From the 15th December, 1915, a new rate of three annas a word was introduced for the exchange of press telegrams between India and Mesopotamia.

Telegraph laws

Act XIII of 1885, as amended by Act XI of 1888 and Act VII of 1914, repealing all earlier Acts (the first being XXXIV of 1854), deals with the privileges and powers of Government in respect to telegraphs, their authority to grant licenses for the establishment of telegraphs, and the regulations under which telegraphs are to be worked. They also provide and regulate the powers of the Department to place telegraph lines and posts on public and private lands, and declare the penalties for infringements of licenses, and for all other offences connected with telegraph lines, and with the transmission of telegrams. Rules and regulations for the acceptance, transmission, and custody of telegrams are published from time to time in the *Gazette of India* by the Governor-General in Council, and have the force of law.

Progress of revenue and expenditure and of messages

The revenue and expenditure of the Department and the number of messages sent, during the five years ending 1917-18, are entered in the table below :—

	Revenue R	Expenditure R	Surplus + or Deficit — R	NUMBER OF MESSAGES					
				INLAND			FOREIGN		
				State	Private	Total	State	Private	Total
1913-14 . .	1,55,50,430	1,37,01,971	+18,48,459	1,328,413	13,609,988	14,938,401	13,593	1,644,703	1,658,296
1914-15 . .	1,70,59,934	1,40,66,947	+29,92,987	1,732,490	13,186,529	14,919,019	35,688	1,235,659	1,271,347
1915-16 . .	1,85,78,406	1,42,20,653	+43,57,753	1,888,269	14,189,039	16,077,308	62,307	1,403,273	1,465,580
1916-17 . .	2,07,82,482	1,36,74,010	+71,08,472	1,877,832	15,126,819	17,004,651	84,088	1,631,097	1,715,185
1917-18 . .	2,46,85,258	1,27,22,959	+1,19,62,299	1,988,370	15,159,860	17,148,230	110,576	1,878,249	1,988,825

The total receipts of the Telegraph Department in 1917-18 amounted to R2,47 lakhs and the working revenue charges to R1,27 lakhs, as against R2,08 lakhs and R1,37 lakhs, respectively, in the preceding year. Thus the gross revenue increased by 18·8 per cent, while the expenditure decreased by 7·3 per cent. The surplus amounted to R119½ lakhs as against R71 lakhs in 1916-17. The increase in revenue is due to the increase in the unit charge for ordinary telegrams with effect from 1st December 1916, the extended use by the public of foreign fully paid cables due to the uncertainty of the mail service, and the delays to deferred traffic and to the increase in State traffic due to the war. The reduction in revenue charges is due to the substitution of lower paid staff in the place of telegraphists sent on field service. The chief items of receipts were fees on telegrams (over R1,86¾ lakhs), claims from railways and canals over (R30½ lakhs), rent for telephone connections (R12 lakhs), claims from guarantors and royalties from telephone companies over 2 lakhs.

Expenditure debitable to capital account incurred during the year 1917-18 was over 29 lakhs, bringing the grand total of such expenditure to the end of the year to R13,32½ lakhs.

The telegraph system was extended by 234 miles of line and 4,419 miles of wire and cable, and consisted on the 31st March, 1918, of 87,714 miles of line and 347,906 miles of wire and cable, of which 106,498 miles of wire and cable were used by railways, 11,034 for canals, 36,989 for telephone exchanges and private lines, and 193,385 for departmental purposes.

* On the 1st September, 1918, the rates for inland telegrams were increased to (1) Express—One rupee eight annas for 12 words and 2 annas for each additional word, and (2) ordinary—Twelve annas for 12 words and 1 anna for each additional word, the address being charged for.

The total number of inland telegrams was 17,148,230, of which 1,988,370 were State telegrams and 15,159,860 private telegrams, showing an increase of 6 per cent and 0·2 per cent, respectively. The revenue derived from them amounted to nearly R29 lakhs and about R108 lakhs, showing an increase of 7 per cent and 16 per cent, respectively. Number of telegrams

Foreign telegrams were 1,988,825 in number, realising over R44 lakhs, showing an increase of 16 per cent in number, and 29 per cent in value. State foreign telegrams, numbering 110,576, with a revenue of over R5½ lakhs, showed an increase of 31 per cent in number and 26 per cent in value. Private foreign telegrams on the other hand advanced by 15 per cent in number and 29 per cent in value.

Table No. 95 shows the general statistics of the Indo-European Telegraph Department. The total number of words telegraphed in 1917-18 was 13,037,209 and the revenue derived from messages amounted to £235,634. The total receipts of the Department amounted to £239,042 and the working revenue charges to £144,205. The expenditure debitable to capital account at the end of the year 1917-18 was £1,214,658. [These statistics have no connection whatever with those of the Indian Telegraph Department dealt with in the preceding paragraphs.] Indo-European Telegraph Department

RAILWAYS

[FOR TABLES, SEE PAGES 197 TO 203]

Railway construction began in India about the year 1850, and was for a number of years carried out through the agency of joint-stock companies under contract with the State. The companies were given a guarantee of 5 per cent on their capital outlay, with half the surplus profits in addition after the guaranteed interest for the half-year had been met at the rate of exchange of 22*d.* to the rupee. The companies were required to sell their railways to Government after 25 years at a rate specified. No capital expenditure beyond that involved by the grant of free land was entailed on the State, but the general revenues had to meet the amount by which the net receipts fell short of the guaranteed interest. The railways which were constructed on these terms have played an important part in the development of the country. Although British capital was attracted into India, without which these great works could hardly at that time have been constructed, yet for many years these railways imposed a considerable burden on Indian revenues as all expectations in regard to profits were not realised, owing to the heavy outlay incurred in the construction of the lines on a gauge of 5 feet 6 inches, to the alterations in the routes after work had been commenced, and to the outbreak of the mutiny in 1857. The increasing demands for guaranteed interest proved too much and the whole guarantee system was discontinued in 1869. All the old guaranteed companies have now been purchased by Government under their contracts. Guaranteed companies

In 1870 Government began to borrow money for railway developments by direct State Agency, but expenditure was to be met by the receipts from the guaranteed railways, and no increased charge was to be thrown on the revenues. In 1879 this system ceased, and the capital outlay was limited to what Government could borrow in India without unduly pressing the market or could spare from revenue. These restrictions would, however, have hampered the work of construction, and economic progress would have been severely checked, had not Government in 1880-81 decided again to evoke the aid of private capital under a guarantee. The system now adopted was distinguished from the old guarantee and the State Railway system, and the lines promoted were called "State lines worked by companies," but practically the only difference between these and the old guaranteed companies was that the terms were easier for Government. From that time onwards a number of companies have assisted in the development of Indian railways. The main points of difference between the systems of 1870, 1879, and 1880 are :—Prior to 1870 railway construction was carried out by companies with private capital, the companies being given by Government a guarantee of a minimum return of 5 per cent on their capital outlay coupled with the free grant of land required. Under the system of 1870, railway developments were to be made by direct State Agency from borrowed capital, instead of seeking the aid of private capital ; the system of 1879, while upholding this policy, put certain restrictions on the extent of borrowings ; but the system of 1880 again evoked the aid of private capital, under a guarantee, although the terms were easier for Government than in the old system of guaranteed companies in vogue prior to 1870. Direct State Agency — Assisted companies

By 1883, however, the finances of the country had considerably improved. The limit of borrowing was raised from R2 crores to R3½ crores annually, of which about R3 crores were assigned to railways. Railways were to be made as required but were, as a rule, to have a good prospect of repaying their interest charge, those for famine purposes being paid for, with irrigation works, from the Famine Insurance grant. Since 1885, when the first programme under the new conditions was introduced, the annual expenditure on railways has constantly increased. In 1890 the whole available balance of the Famine Insurance grant was devoted to railway construction, and in 1892 half a crore of rupees was being especially added to capital expenditure to enable companies to undertake new lines of railway and extensions with sums borrowed by Government. As the exchange continued to fall and affect seriously the finances of India, another attempt was made in 1893 to work through companies. As the guarantee involved a gold liability, a subsidy was offered instead. This took the form of a rebate or payment from the gross earnings of the main line from traffic interchanged with the company's lines, so that the total profits of the company should yield a dividend of 4 per cent. The rebate was, however, limited to 10 per cent of the gross earnings from such traffic. These conditions were not found sufficiently attractive and the terms were again revised in 1896. Companies were now offered either an absolute guarantee of 3 per cent with a share of surplus profits, or a rebate up to the full extent of the main line's net earnings in supplement of their own net earnings, the total being limited to 3½ per cent on the capital outlay. As regards railways passing through Indian States, the money has in some cases been found from the revenues of the States, in others it has been lent to the States by Government, and in others again Government has guaranteed loans made to a State by a company. Policy of advance — Indian States

Railway programme

The question how best to provide funds for a wider development of the railway system was considered and sanction was given in 1896-97 to an expenditure of nearly R30 crores spread over 3 years, but this programme could not be carried out owing to many adverse circumstances affecting the revenues of Government. Since 1896 the expenditure incurred not only by the State railways but by those guaranteed by the State has been included in the railway programme; and in 1901 it was decided to adopt the principle of regarding the needs of open lines for rolling stock, stations, goods sheds, permanent way, etc., as a first charge upon the funds available, thereafter the completion of lines in progress, and lastly the claims of new lines, and the money was proposed to be obtained by borrowing in London and India, by appropriations from the Famine Insurance grant, and by utilisation of surplus revenues and Savings Bank deposits.

Private enterprise

Though the amount made available for capital expenditure on Railways has been increased over a series of years, the balance available for Imperial funds for the construction of new lines has tended to diminish. Since 1909, when the Imperial funds devoted to new construction reached a low figure, increasing efforts have been made to augment the supply of funds from other sources. In June, 1910, more liberal terms than those previously conceded were offered, and under these terms private enterprise had two alternative forms of assistance, namely, (1) a rebate paid by the parent line from its net earnings from traffic brought to it by the feeder railway, sufficient to make up 5 per cent on the *capital outlay*, thus limiting the liability of the main line railway, but holding out a fair prospect of a 5 per cent return, and (2) a firm guarantee from Government of $3\frac{1}{2}$ per cent on capital outlay. But it has been patent that the capital raised by a company may at times be considerably more than that for the time being expended and that even under the second alternative shareholders in branch line companies were not assured of any definite return. For this reason, in November, 1913, revised terms were offered, and they differed from those of 1910 mainly in the substitution of *paid-up capital* for *capital outlay*. The guarantee terms, however, offer one very distinct advantage in so far as the shares of these companies are available for the investment of trust funds. In order to encourage investments of this class one of the modifications introduced in 1913 was a clause in the terms which rendered it possible for companies to be floated partly on the rebate and partly on the guarantee terms.

District Boards

Another agency for financing feeder railways has been found in the District Boards. These local bodies have become fully alive to the advance in the general welfare of a district which is to be anticipated from the improvement of communications. Since 1884 District Boards in Madras have been empowered to levy a special Railway cess not exceeding 3 pies per rupee of land revenue; and it has since been decided that all local Governments, who may wish to do so, may legislate for the levy of a similar cess by which means, it is hoped, much encouragement may be given to the construction of local feeder railways at the cost of local funds.

Administration and control

Up to 1905 the administration of the railways in India was controlled by the Public Works Department of the Government of India. In that year the control was transferred to an expert Railway Board, consisting of a Chairman and two members. The duties assigned to the Board were of two kinds. (1) Its deliberative functions included the preparation of the railway programme of expenditure and the discussion of the greater questions of railway policy and finance affecting all lines. As regards such questions, the ultimate decision necessarily continued to rest with the Government of India and the Secretary of State in Council. (2) Its administrative duties included the construction of new lines by State Agency, the carrying out of new works on open lines, the improvement generally of railway management, the arrangements for through traffic, the settlement of disputes between lines, and the control and promotion of the staff on State lines. The final authority in regard to these duties was delegated, subject to restrictions, to the Railway Board. In 1907 a Committee on Indian Railway Finance and Administration was appointed by the Secretary of State for India. The Committee came to the conclusion that the system under which the Railway Board worked was not satisfactory, and suggested improvements. After consideration of their recommendations, it was decided to introduce in 1908 certain changes, the Chairman of the Board becoming President with enhanced powers, and the Board being made independent of the Commerce and Industry Department Secretariat.

Sources of statistics

The tables in this volume are compiled from the statistics given in the Report on the Administration of Railways in India issued by the Railway Board, except table No. 97 (Revenue account of the railways in respect of which Government is financially responsible) which is compiled from the Finance and Revenue Accounts of the Government of India. The Administration Reports published up to 1912 had reference to the working of each calendar year. Owing to the adoption, by the principal railway administrations, of the Government financial year (1st April to 31st March) for all accounts and statistical purposes, the Administration Reports have, with effect from 1st April, 1913, been published for the financial year.

Open mileage

The number of miles of all railways open for traffic at the end of 1917-18 was 36,334 as compared with 30,809 in 1908-09, the increase in the decade being thus 5,525 miles or 18 per cent. Of this, 17,877 miles were of the standard-gauge ($5\frac{1}{2}'$), 14,988 miles of the metre-gauge ($3' 3\frac{3}{8}''$), and 3,469 miles of other gauges ($2\frac{1}{2}'$ and $2'$). Of the standard-gauge 15,505 miles, of the metre-gauge 9,415 miles, and of other gauges 1,343 miles were owned by Government.

Capital outlay

Up to the close of the year 1917-18 the capital outlay on all railway lines open for traffic amounted to R5,41,80 lakhs, as compared with R4,11,92 lakhs at the end of 1908, the increase in the decade being 32 per cent. Of this total capital outlay of R5,41,80 lakhs, the outlay on State railways amounted to R4,75,75 lakhs. The outlay incurred during 1917-18 on lines in which the State is financially interested amounted to R3,79 lakhs.

Results of working: earnings

The gross earnings of all Indian railways during the year 1917-18 amounted in round figures to R77,36 lakhs, compared with R70,68 lakhs in 1916-17, or an increase of R6,68 lakhs or 9 per cent. This total amount of R77,36 lakhs of gross earnings consisted of goods traffic R44,50 lakhs, coaching traffic R30,17

lakhs, electric telegraph R13 lakhs, steam boat R19 lakhs, and sundries R2,38 lakhs. The working expenses were R35,37 lakhs as against R33,40 lakhs in 1916-17. The net earnings thus amounted to R41,99 lakhs against R37,28 lakhs in 1916-17, or an increase of R4,71 lakhs or about 13 per cent. These net earnings yielded a return on the capital outlay (R5,41,80 lakhs) on open lines, *i.e.*, on mileage earning revenue, of 7·75 per cent, as compared with 6·96 per cent in 1916-17 and 5·99 per cent in 1915-16. Details of the results of working in 1917-18 of each railway system, which include branch lines and lines under the same management, are shown in table No. 99.

Financial results of working of State railways

Up to the end of 1898-99 the railways in respect of which Government was financially interested worked at a loss to the State, owing partly to the yearly additions of new and undeveloped lines and partly to the increased payments to certain guaranteed companies necessitated by the fall of exchange; but with the termination of the guarantee of the Great Indian Peninsula Railway and the development of traffic, the revenue has, excepting the single set-back in 1908-09, a famine year in North-Western India, exceeded the expenditure. The deficit in 1908-09 was ascribed to a fall in gross receipts combined with an increase in working expenses. The net gain to the State in 1917-18 was R14,87 lakhs as against R11,22 lakhs in 1916-17. This surplus gives a net profit to Government (after paying all charges including interest) of about 3 per cent on the capital outlay on State railways; but, as already stated above, the net earnings of all railways yielded a return to the railways of 7·75 per cent on the total capital outlay.

Passenger traffic

The total number of passengers carried by Indian railways in 1917-18 was in round numbers 430 millions as against 486 millions in the preceding year, or a decrease of about 12 per cent. This total comprised 883,000 first class passengers, 4,216,000 second class, 7,719,000 intermediate class, 381,017,000 third class passengers, and 36,434,000 for trips which the holders of season and vendors' tickets are assumed to have made on the prices paid for their tickets. The total earnings from passenger traffic amounted to R25,23 lakhs, or an increase of 9 per cent over the preceding year. Owing to the reduction of train services consequent on war conditions and also an enhancement of fares, there was a sharp drop in the number of passengers carried and at the same time an increase in the earnings.

Goods traffic

The total quantity of goods carried during the year 1917-18 was 85,472,000 tons, which is less than that of the preceding year by about one per cent; but the total earnings from goods traffic increased from R41,43 lakhs in 1916-17 to R44,50 lakhs in 1917-18, *i.e.*, by 7 per cent. The tonnage carried fell off, as the result of restrictions imposed on local short distance traffic. The increase in the earnings is mainly due to larger receipts from the carriage of troops and military stores, and from wheat and coal traffic, and to a less extent to the enhancement of freights. The average rates charged per mile per passenger of each class and per ton of goods carried during the year 1917-18 are stated in the margin as compared with those ten years ago.

		1908	1917-18
		Pies	Pies
Passengers	First class	12·95	16·58
	Second class	5·76	6·76
	Intermediate class	3·04	4·02
	Third class	2·28	2·78
	Season and vendors' ticket holders	1·39	1·50
Goods (per ton)		5·09	4·07

Rolling-stock

The total number of locomotives at the end of 1917-18 numbered 8,753, of which 1,779 were employed exclusively on passenger working, 2,673 on goods working, and 4,301 on mixed working. The number of coaching stock was 23,956 and that of goods stock 189,538.

Train mileage and earnings per train mile

The total train-mileage (including miscellaneous train miles) was 157,036,000 in 1917-18 as against 163,604,000 in the preceding year. Of this, coaching train miles numbered 44,407,000 and goods train miles numbered 72,528,000. The gross earnings per train mile worked out to R4·93, the working expenses R2·25, and the net earnings per train mile R2·68.

Railway staff

The total number of servants in railway employ at the close of the year 1917-18 was 653,965 as against 636,534 in the preceding year. Of this number, 6,796 were Europeans, 10,233 Anglo-Indians, and 636,936 Indians.

Railway accidents

The total number of persons killed by railway accidents during the year 1917-18 was 2,394, as against 2,400 in the preceding year. Of this number, 268 were passengers, 408 railway servants, and 1,718 other persons. The total number of persons injured in 1917-18 was 2,489, of whom 1,029 were passengers, 892 railway servants, and 568 other persons.

IRRIGATION

[For Tables, see pages 204 to 219]

Irrigation has been resorted to in India from time immemorial as a means of supplementing the natural rainfall and of storing water for use at critical periods. In general it may be said that the security of the harvest depends on the existence of some form of irrigation in almost all parts of India, except in tracts such as Eastern Bengal, Assam, Lower Burma, and the Malabar Coast where the average rainfall is not less than 70 inches in the year.

Types of irrigation works

Irrigation works are of three great types—lift, storage, and river works—which are represented by wells, tanks or reservoirs, and canals. The wells and smaller tanks are often the property of private individuals, but the larger tanks and the canals are generally undertaken by Government. The statistics given in this volume relate only to works constructed or maintained by Government.

Irrigation canals are not always suitable for navigation, and many canals have been constructed for navigation which do not irrigate a single acre. Not one navigable canal is directly remunerative, and in many cases

the navigation receipts do not cover the working expenses. The great rivers are navigable by steamers all the year round, and there are innumerable small rivers, tributaries, creeks, and backwaters, which are fully utilised by small craft.

Classes

Financially considered, irrigation works are classed as "major" and "minor," the former being sub-divided into (1)Productive, and (2) Protective, works. The most important irrigation works in India are those

Productive

classed as "Productive works" or works the capital cost of which has been wholly or mainly provided from borrowed money in the expectation that they will prove directly remunerative and that the net revenue derived from them will fully cover all charges for interest within a reasonable time (10 years) after their completion.

Protective

"Protective" irrigation works are those which have been sanctioned in consideration of their value in protection against famine, but without any expectation of their becoming directly remunerative. The cost of their construction has been met from the grant under Famine Relief and Insurance. Capital and revenue

Major works

accounts are kept for all major works, and the revenue due to them, whether directly in the form of water-rates and miscellaneous receipts or indirectly on account of enhancements of land revenue due to irrigation,

Minor works

is shewn in the Finance Accounts. Minor works are constructed from funds provided from the ordinary revenue of India, and, broadly speaking, consist of irrigation systems which are not sufficiently important to be treated as major works. Some of them are old works constructed by the former rulers of this country, and extended or restored by the British Government; some are works which have been constructed by the British Government; others, again, are village works originally provided by private or communal effort, the control of which the State has been obliged to assume owing to disputes between the parties interested or their inability to maintain the efficiency of the works. Minor works are of three classes, namely:—(1) Works for which capital and revenue accounts are kept. All expenditure incurred in the construction and development of minor irrigation works of this class is met from the ordinary revenue. There were 118 works so classed in 1917-18, the majority of which are in Bombay and Madras. (2) Minor works for which only revenue accounts are kept, either because the works are too small or because they have not been constructed by Government, which has simply undertaken their improvement or maintenance. They are credited with a share of the land revenue depending on their maintenance and are debited with all expenditure incurred on construction, extension, improvements, and maintenance. (3) There is a third class of minor works, chiefly existing in the Madras Presidency, for which neither capital nor revenue accounts are kept.

Results of working

Table No. 106 shows the principal results of the operations for the year 1917-18, while table No. 107 shows the mileage of canals in operation and the area irrigated. Table No. 108 gives the financial results of the works at the end of each year from 1897-98 to 1917-18. The chief features of these tables are given in the margin. At the end of 1917-18 the total mileage of major works was 49,299 and of minor works 5,012 as against 48,468 and 4,907, respectively, at the end of the previous year. The area irrigated during the year 1917-18 was 18,006,000 acres, of which productive major irrigation works covered 15,844,000 acres, minor irrigation works 1,723,000 acres, and protective major irrigation works 439,000 acres. The capital outlay to the end of the year 1917-18 was above R75 crores, divided between the last mentioned classes in the proportion of 76 per cent, 6 per cent, and 13 per cent. respectively. The net revenue realised during the same year amounted to R5,25 lakhs, namely, R4,85 lakhs from productive major irrigation works, R35 lakhs from minor irrigation works, and R1 lakh from protective irrigation works. In the last ten years the net revenue from irrigation and navigation works has increased by 44 per cent—from R3,65 lakhs in 1908-09 to R5,25 lakhs in 1917-18. Table No. 109 shows for each province the mileage of different main canals in operation and the area irrigated at the end of each year from 1913-14 to 1917-18. The details for 1917-18 are given in the margin. Madras and the Punjab account for about 12,000 and 15,000 miles of productive major irrigation works with an area of 2 million and 8 million acres, respectively. The United Provinces come next with nearly 10,000 miles and an area of about 3 million acres, and Bombay, and Bihar and Orissa each about 3,000 miles with 1,308,000 and 798,000 acres, respectively. The protective major irrigation works are the largest in the United Provinces with 1,600 miles and about 200,000 acres, Bombay and the Central Provinces accounting for about 600 and 800 miles with 70,000 and 54,000 acres, respectively. Under minor irrigation works Bombay stands foremost with 2,400 miles and 928,000 acres.

Mileage

Area irrigated

The Ganges Canal, the Lower Ganges Canal, and the Eastern Jumna Canal are the most remunerative works in the United Provinces. In the Punjab the greatest amount of net revenue is obtained on the Lower Chenab Canal, which promises developments due to recent extension. The Upper Bari Doab Canal, the Lower Jhelum Canal, the Western Jumna Canal, and the Sirhind Canal are also very remunerative. The Godavari, the Kistna, and the Cauvery Delta Systems are the most remunerative works in Madras.

Table No. 110 gives the details of irrigation and navigation in each province in each year from 1913-14 to 1917-18. The details for 1917-18 are summarised in the marginal table. Of the total irrigated area the Punjab contains about 9 million acres, Madras nearly 4 million acres, the United Provinces 3·6 million acres, Bombay 2·5 million acres, Bihar and Orissa nearly a million acre, and Burma 872,000 acres. The average water rate per acre is Rs. 5 in Ajmer-Merwara, Rs. 4 in Madras, and in the Punjab, Rs. 3, in the United Provinces, British Baluchistan, Burma, Bihar and Orissa, North-West Frontier Province, and Bombay; and about Rs. 2 in Bengal and R. 1 in the Central Provinces.

	Area irrigated	Water rate per acre	Navigation		
			Open mileage	Cargo	Passengers

INDUSTRIAL CENSUS*

No. 2.—STATEMENT showing the MAIN RESULTS of the INDUSTRIAL CENSUS in INDIA taken in 1911*

Description of Factory, etc.	Number of factories	NUMBER OF PERSONS EMPLOYED					Number of females employed per 100 males	Province or State, where chiefly found, with percentage of number of persons there employed to total number in India
		DIRECTION, SUPERVISION AND CLERICAL WORK	WORKMEN			TOTAL		
		Europeans and Anglo-Indians	Indians	Skilled	Unskilled			
I. GROWING OF SPECIAL PRODUCTS	1,687	1,627	10,346	18,446	779,988	810,407	84	
Coffee plantations	482	249	1,300	1,997	54,077	57,623	79	Madras (37); Mysore (43); Coorg (19).
Indigo plantations	121	98	2,076	2,486	26,135	30,795	16	Bihar and Orissa (100).
Tea plantations	1,002	1,150	6,543	12,074	683,818	703,585	91	Assam (70); Bengal (27).
II. MINES	562	1,164	4,911	71,695	146,317	224,087	38	
Collieries	353	326	3,846	57,068	81,637	142,977	43	Bengal (26); Bihar and Orissa (61).
Gold Mines	12	577	157	6,381	21,477	28,592	8	Mysore (88).
III. QUARRIES OF HARD ROCKS	53	22	289	1,218	10,744	12,273	29	
Stone and Marble Quarries	50	21	257	1,147	10,441	11,866	29	Bombay (32)
IV. TEXTILE INDUSTRIES	1,487	1,426	18,597	250,580	286,986	557,589	25	
Cotton	1,127	573	12,585	167,191	127,841	308,190	29	Bombay (62)
Jute, hemp, etc.	223	734	4,744	66,065	150,776	222,319	21	Bengal (97).
V. LEATHER INDUSTRIES	158	105	829	5,742	6,936	13,612	9	
Tanneries	122	41	589	3,814	4,955	9,399	7	Madras (47); Bombay (17).
VI. WOOD, ETC., INDUSTRIES	168	185	1,955	11,506	15,421	29,067	3	
Saw mills	106	120	1,535	2,869	7,966	12,490	6	Burma (79).
Timber yards	27	17	227	5,650	5,551	11,445	..	Bihar and Orissa (83).
VII. METAL INDUSTRIES	372	1,243	3,886	34,115	31,801	71,045	4	
Machinery and Engineering Workshops.	93	413	1,375	12,661	8,698	23,147	2	Bengal (51); Bombay (23).
VIII GLASS AND EARTHENWARE INDUSTRIES.	453	67	1,423	10,532	37,444	49,466	24	
Brick and tile factories	411	56	1,197	9,120	35,783	46,156	23	Bengal (48).
IX. INDUSTRIES CONNECTED WITH CHEMICAL PRODUCTS.	455	586	2,747	12,023	34,002	49,358	13	
Oil mills	208	45	978	1,959	6,763	9,745	20	Bengal 44); Madras (21).
Petroleum refineries	9	212	240	2,942	7,464	10,858	..	Burma (99).
X. FOOD INDUSTRIES	720	486	4,869	11,243	57,803	74,401	16	
Flour and rice mills	403	201	2,757	5,690	33,726	42,374	12	Burma (70).
XI. INDUSTRIES OF DRESS	90	209	663	7,263	2,054	10,189	4	
Boot and shoe factories	23	70	240	4,054	799	5,163	3	United Provinces (64); Bombay (15).
XII. FURNITURE INDUSTRIES	50	30	235	2,102	1,005	3,372	2	
Furniture factories	46	27	219	1,897	967	3,110	2	Bengal (29); Bombay (16).
XIII. INDUSTRIES CONNECTED WITH BUILDINGS.	163	82	638	3,292	18,156	22,168	30	
Lime works and kilns	53	17	230	359	7,024	7,630	39	Bombay (51); Central Provinces and Berar (23).
Stone, marble and cement works.	57	55	214	1,445	5,891	7,605	34	Bihar and Orissa (37); United Provinces (31).
XIV. INDUSTRIES CONNECTED WITH TRANSPORT.	242	1,302	4,155	80,805	38,855	125,117	1	
Railway workshops	118	834	3,064	65,460	29,365	98,723	1	Bengal (23); Bombay (16).
XV. PRODUCTION AND TRANSMISSION OF PHYSICAL FORCES.	64	262	414	4,351	3,142	8,169	16	
Gas works	14	122	176	3,165	1,217	4,680	..	Bengal (73); Bombay (23).
XVI. INDUSTRIES OF LUXURY	389	641	4,837	29,865	10,161	45,504	1	
Printing presses.	341	500	4,416	27,588	9,094	41,598	1	Bengal (30); Bombay (21). Madras (16).
TOTAL, INDIA	7,113	9,437	60,794	554,778	1,480,815	2,105,824	38	
FACTORIES IN WHICH MECHANICAL POWER IS USED.	4,569	8,369	50,597	492,576	1,252,450	1,803,992	38

(*a*) Includes Port Commissioners' workshops
(*b*) Includes Port Trust workshop and Steam Navigation Company's workshop
(*c*) Includes one saw mill and foundry
(*d*) Excluding 7 "Shipbuilding and Engineering works" included under Engineering workshops
(*e*) Including 31 factories reported from Jessore
(*f*) One remained closed

* Compiled from special official returns

(a) Production for 3 months ending 31st March, since closed (b) No brewing done

† From 1st January, 1908, the contracts with Indian breweries for the supply of malt liquor to British troops have been discontinued; each British regiment being left free to make its own arrangements to obtain the necessary supply; as a result, the figures of Army consumption are no longer readily available

‡ The quantity (in gallons) of imported beer is as follows:—

1913	4,634,000
1914	4,213,000
1915	2,818,000
1916	2,889,000
1917	1,842,000

(a) The mill is in liquidation
(b) Represent capital of 2 mills
(c) Defective in details
† Actually consists of 300 looms
(d) Represent capital (estimated) of 4 mills
(e) Represent capital of 5 mills
(f) Represent capital of one mill
(g) Details not reported
* Actually consists of 650 looms and of 36,000 spindles

* Compiled from special official returns

(a) Capital of four mills. [See also footnote (g)]

(b) The quantity produced by one of the mills was not reported.

(c) Capital of three mills only. [See also footnote (h)]

(d) Excluding 42,000 blankets for which the weight has not been given

(e) One of the mills in the Punjab was closed

(f) Excluding 150,000 blankets for which the weight has not been given

(g) Capital of five mills only. The increase in 1914 is due to the New Egerton Mill having increased its authorised capital from R12 lakhs to R1 crore

(h) Capital of four mills. The increase in 1915 is due to the Cawnpore mill having increased its authorised capital from R25 lakhs to R1,50 lakhs.

NOTE.—For figures for earlier years, see the sixth issue of the Statistics of British India, Part I

* Compiled from the annual report of the Port Officer and Registrar of Wrecks, Calcutta
‡ Incomplete, the tonnage of some vessels not being known
§ The unusually large number of British vessels lost in 1914 is due to the depredations of German cruisers in Indian waters after the outbreak of war

MERCHANDISE MARKS*

No. 74.— DETENTIONS under the INDIAN MERCHANDISE MARKS ACT in each official year from 1898-99 to 1917-18

		Number of detentions(a)				Cases in which detention was ordered on information received	Cases in which detention was followed		
		Counterfeit trade marks or false trade descriptions	Non-description or false description of origin	Unstamped or insufficiently stamped piece goods	Total		By confiscation	By release

NOTE.—The figures for letters, postcards, newspapers, and packets are estimated from the actual figures for 14 days of the year, but for parcels they represent the actual number posted during the year

(a) For earlier figures, see the 13th issue of Financial and Commercial Statistics of British India and the 1st and 6th issues of "Statistics of British India," Part III

(b) From 1899-1900 includes registered newspapers only, other newspapers being counted as packets

No. 83.—NUMBER of PAID, UNPAID, REGISTERED, INSURED, VALUE-PAYABLE, SERVICE PRIVILEGED in each CIRCLE

* The figures from 1870-71 to 1880-81 include those of Ceylon Telegraphs and those from 1882-83 to 1891-92 include Provincial Telegraphs

† The large increase in the number of free telegrams is due to a new and more correct method of numbering multiple telegrams

(a) Inclusive of 80,560 State press telegrams, value R44,699

(b) „ 150,368 „ „ „ „ R75,652

(c) „ 135,941 „ „ „ „ R72,936

(d) „ 96,975 „ „ „ „ R56,919

(e) Exclusive of 292 inland O. H. M. S. telegrams, value R1,103 handed in at Licensed Telegraph Offices

(f) „ 5,448 „ „ „ „ „ R23,615 „ „ „

* Excludes lines for which information regarding "capital outlay," "gross earnings," etc., is not available
† Capital outlay on lines open, *i.e.*, on mileage earning revenue
(*a*) Estimated
(*b*) The decrease is due to the revision of the capital outlay in consequence of the substitution of the actual expenditure incurred on the construction of lines purchased by the State from Guaranteed Railway Companies as shown in rupees in the accounts of these Railways at date of purchase for the total purchase price converted at £1=R10, which was erroneously taken in stating the Capital expenditure in previous Railway Administration Reports
Note.—From 1913-14, the financial year, 1st April to 31st March, has been adopted for reasons explained in the Introductory note

and TRAFFIC of ALL RAILWAYS, from 1853 to 1917-18

PASSENGER TRAFFIC		AVERAGE RATE CHARGED PER PASSENGER PER MILE					GOODS TRAFFIC

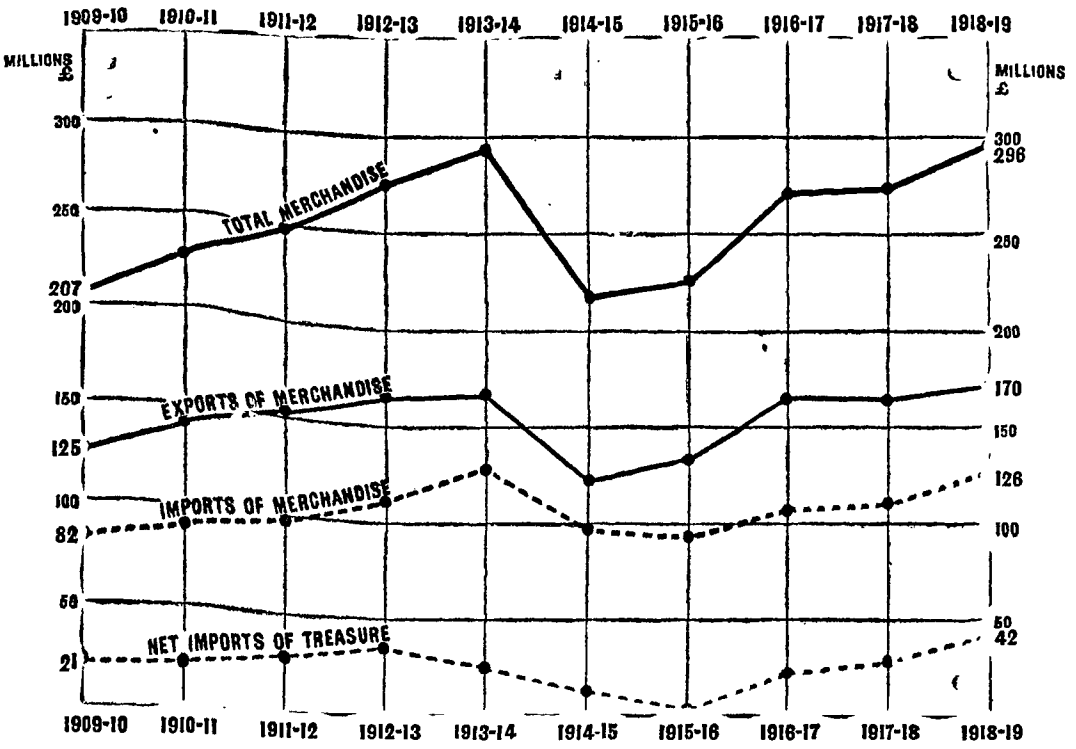
I. THE FOREIGN SEA-BORNE TRADE OF INDIA

(*a*) IN A DECADE

(1909-10 TO 1918-19)

(PRIVATE AND GOVERNMENT)

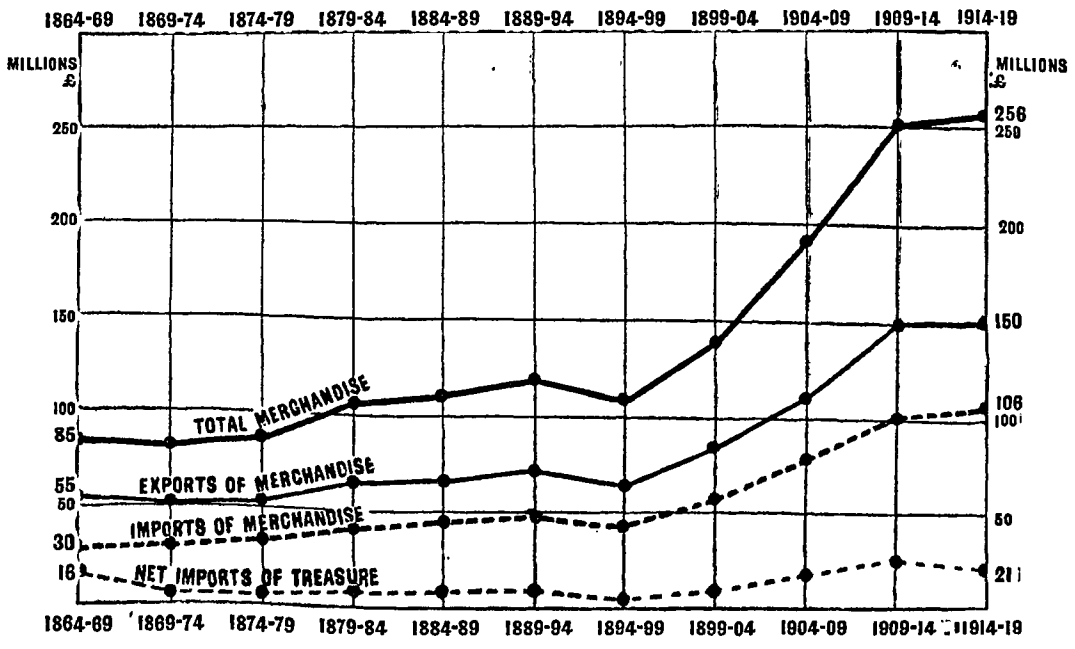


Note.—Imports and exports include both private and Government. (See footnotes.)

(*b*) DURING HALF A CENTURY

(1864-65 TO 1918-19)

(PRIVATE AND GOVERNMENT)



Note.—Imports and exports include both private and Government. (See footnotes.)

Note—1. In chart 1(*b*) the curves are based on averages for 5 years.

2. Total merchandise includes Imports and Exports, both private and Government.

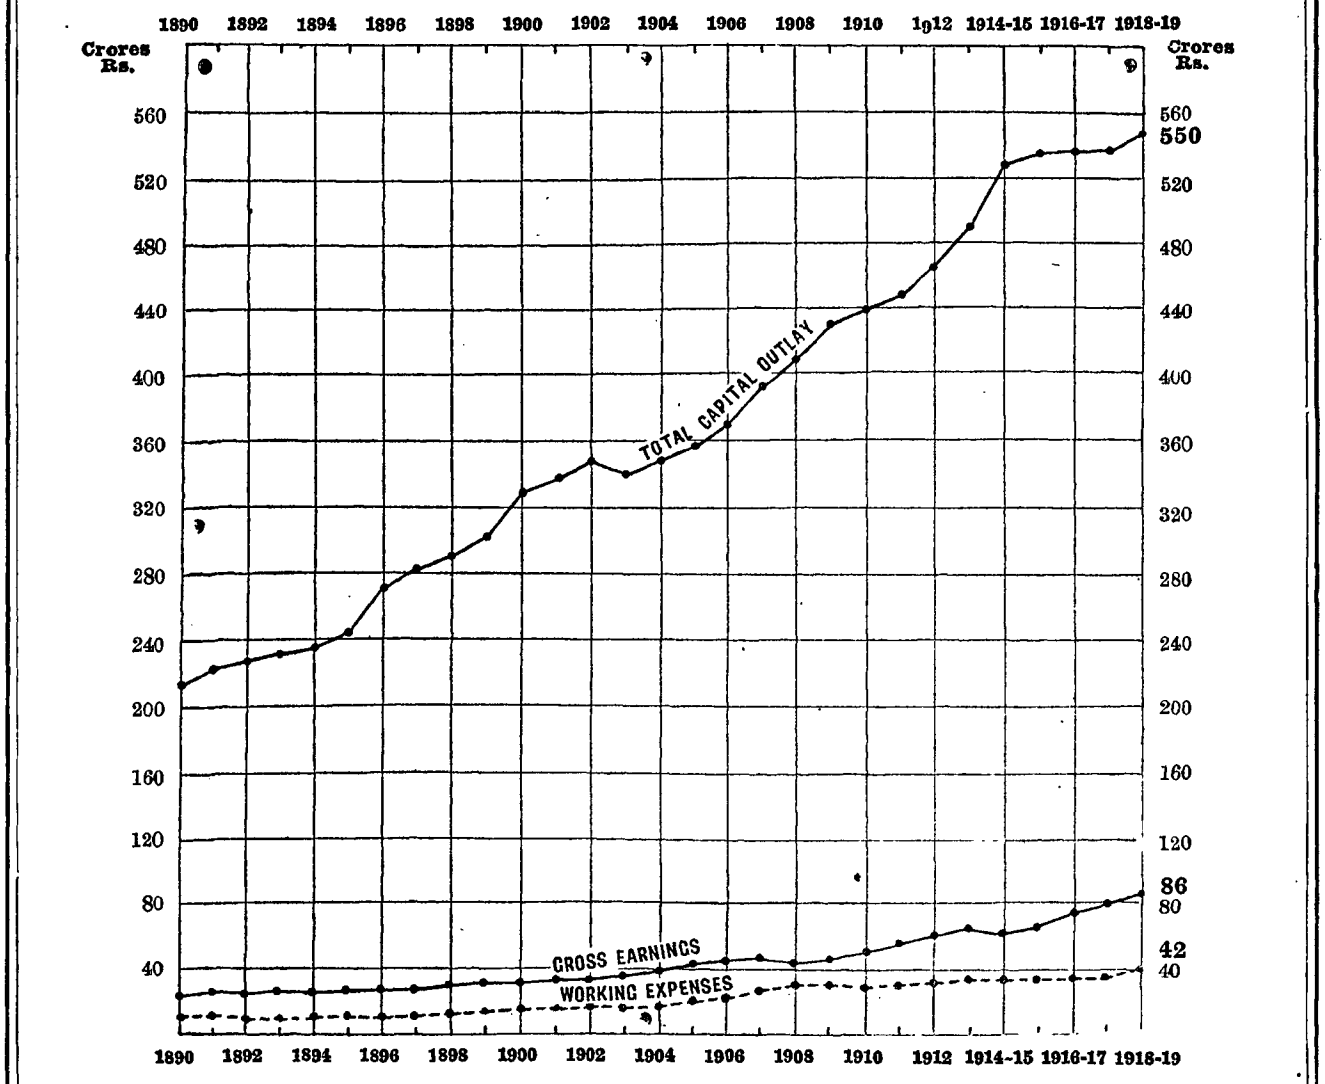
3. Imports of merchandise are inclusive of Government stores.

4. Exports of merchandise are inclusive of re-exports and Government stores.

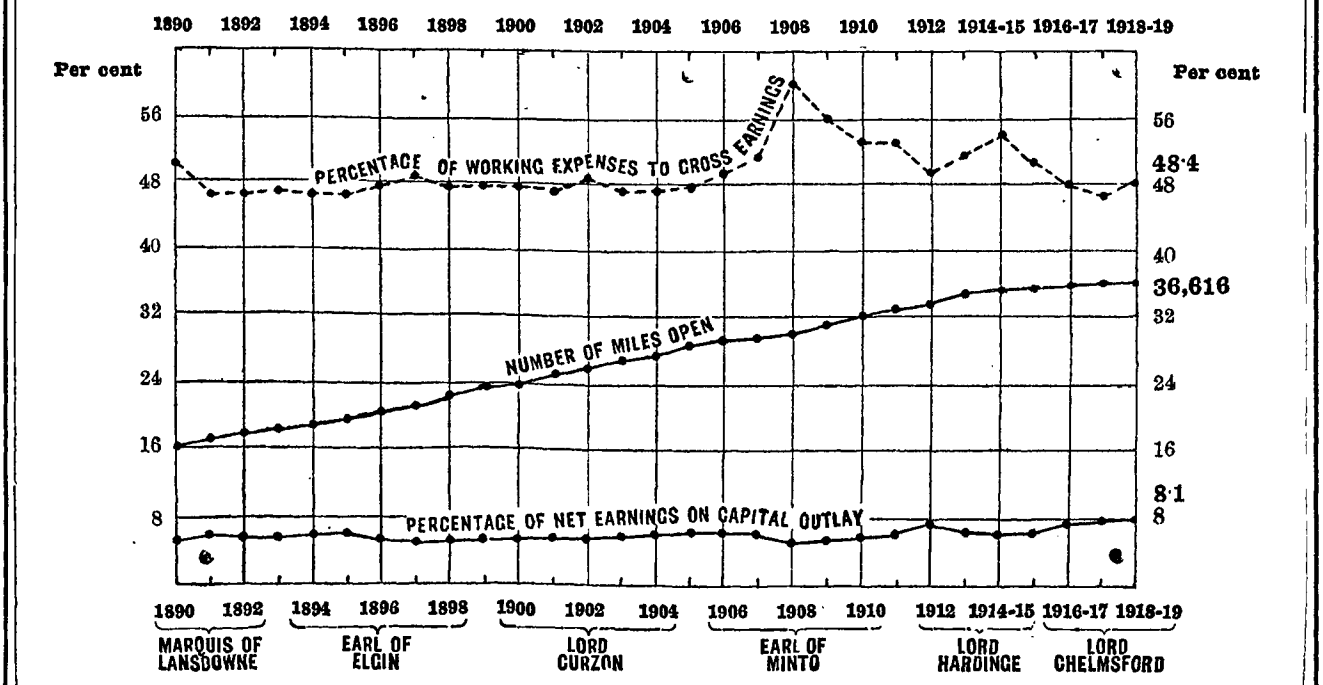
5. *Net* imports of treasure are the imports *minus* the exports of gold and silver, both private and Government. The exports of treasure are ordinarily very much less than the imports.

2(*a*). CAPITAL OUTLAY, GROSS EARNINGS, AND WORKING EXPENSES OF INDIAN RAILWAYS

(28 years—1890 to 1918-19)



2(*b*). PERCENTAGE OF WORKING EXPENSES TO GROSS EARNINGS, PERCENTAGE OF NET EARNINGS ON CAPITAL OUTLAY ON MILES OPEN AND PARTLY OPEN



Note.—The "Total Capital Outlay" is that on all Indian Railways, *viz.*, (i) open, (ii) partly or wholly under construction, and (iii) on miscellaneous items; while for the purposes of the "percentages on net earnings on capital outlay" the item (i) open lines only is reckoned.

2(c). ANNUAL GROSS EARNINGS, AND WORKING EXPENSES ON THE PRINCIPAL SYSTEMS OF RAILWAYS IN INDIA FROM 1909 TO 1918-19

Statistics of British India

Vol. I.—Commercial Statistics

INTRODUCTORY NOTE

The statistical tables in this volume deal with industries, mills, mines, joint-stock companies, foreign trade and shipping, post office, telegraphs, railways, and irrigation. Special steps were taken to bring the tables more up to date, and the statistics are therefore brought up to the period ending 31st March, 1919. Three charts showing (*i*) the growth of the Foreign Seaborne Trade of India, (*ii*) capital outlay, gross earnings, and working expenses of Indian Railways, and (*iii*) gross earnings and working expenses on the principal systems of Railways in India, have been added, with also an index for easy reference.

SUMMARY TABLE

Table No. 1 gives the salient features of each section of the Commercial Statistics included in this volume.

INDUSTRIAL CENSUS

[For Table, see page 5]

Table No. 2 shows the main results of the Industrial Census taken at the time of the Population Census of 1911. A caveat, however, should be added regarding the possibility of obtaining an industrial census from a population census. Experience has proved that one cannot hope for an industrial census from a population census, especially in India, for several reasons as explained in Appendix K to the "Report on the Enquiry into the Rise of Prices in India."

LARGE INDUSTRIAL ESTABLISHMENTS

[For Tables, see pages 6 to 51]

Factory laws

The conditions of factory labour until 1st July, 1912, were regulated by the Indian Factories Act, XV of 1881, as amended by Act XI of 1891.

The decision to undertake further legislation was arrived at after comprehensive enquiries. An important factor in the case was the increasing use of electric light in the Bombay mills, which radically changed the conditions prevailing when the Act of 1891 was passed and had abolished the security that operatives would not be employed for more than 12 hours a day on the average. The question of the hours of employment in textile factories was brought into prominence by the period of prosperity that the cotton industry began to enjoy in the cold weather of 1904-05, a large number of operatives being regularly employed for 15 hours a day or even longer. Owing to complaints regarding the long hours worked in many mills, the Government of India in 1906 appointed a small Committee to conduct a preliminary inquiry into the conditions of labour in textile factories. The conclusions arrived at by this Committee formed the basis of an investigation, extending to all factories in India by a representative Commission. The recommendations of the Committee and of the Commission having been considered by the Government of India and the Local Governments, a Bill was introduced in July, 1908, to amend and consolidate the law relating to factories, and was finally passed into law as Act XII of 1911. The new Act, which came into force on 1st July, 1912, defines the term "factory" as any premises wherein, or within the precincts of which, steam, water or other mechanical power or electrical power is used in aid of any process for, or incidental to, making, altering, repairing, ornamenting, finishing or otherwise adapting for use, for transport or for sale any article or part of an article. The term does not apply to (*a*) any mine subject to the operation of the Indian Mines Act, or (*b*) any electrical generating or transforming station, or (*c*) any indigo factory, or (*d*) any factory situated on and used solely for the purposes of a tea or coffee plantation, or (*e*) any factory wherein on no day in the year are more than forty-nine persons simultaneously employed: provided that the Local Government may apply all or any of the provisions of this Act to any factory or class of factories wherein any specified number of persons, not being less than twenty, are on any day simultaneously employed. The Act has limited the hours within which children and women may be employed, and has further restricted the employment of women by night except in certain cases. It also contains a number of new provisions for securing the health and safety of the operatives, making inspection more effective, and securing generally the better administration of the Act.

Definitions of the term "factory"

Tables Nos. 3, 4, 5, and 6 deal not only with factories, as defined above, which come under the operation of the Indian Factories Act, but also include concerns which do not come under the operation of the Act but which are considered to be of sufficient industrial importance, excluding mines, electrical generating stations, indigo factories, and factories situated on and used for the purposes of tea and coffee plantations. Tables Nos. 7, 8, 9 and 10 deal only with factories coming under the operation of the Act. Industrial concerns owned by Government, State Darbars, and local bodies are dealt with in table No. 3. Those owned by companies or individuals are dealt with in tables Nos. 4, 5, and 6, factories worked by mechanical or electrical power and those not so worked being shown separately in tables Nos. 5 and 6.

Number of concerns

The total number of factories and industrial concerns of all classes dealt with in these tables was 4,789 in 1918 as against 4,816 in 1917. From the reports on the working of the Indian Factories Act it appears that in 1918 there were within the scope of the Act 130 factories, belonging to the State and to local bodies, such as municipalities and port trusts, as against 127 in 1917. Among these there were 30 printing presses, 18 railway workshops, 22 iron foundries and canal and engineering workshops, and a considerable number of military arsenals and factories. In addition to these 130 factories, there were 31 more concerns which did not come within the operation of the Indian Factories Act. The total number of factories owned by Government and local bodies in British India is thus 161 in 1918, the same as in 1917, the important of these being shown in the margin. These figures do not include factories situated in Indian States and owned by State Darbars. So far as reports have been received, the total number of factories owned by State Darbars was 27.

	1917	1918
Printing presses	32	32
Iron foundries and Canal and Engineering workshops	23	23
Railway workshops	19	19
Waterworks	10	11
Dairy farms	8	7
Municipal workshops	7	8
Arsenals	7	7
Clothing agencies	7	8
Forage presses	6	5
Arms and ammunition	6	6

Of the factories owned by companies or individuals, those worked by mechanical or electrical power numbered 4,023 in 1918 as against 3,878 in 1917; the more important of these are stated in the margin. These represent 90 per cent of the total number of factories worked by mechanical or electrical power in all India (including those in Indian States so far as reported). The factories created by the cotton industry exist principally in Bombay and those relating to the jute industry in Bengal; while rice mills and saw mills are naturally mostly in Burma. Of the other factories there are none largely assigned to any particular province. Besides these, there were 578 concerns not worked by mechanical or electrical power, including 145 tile and brick factories, 63 lac factories, 56 tanneries, 37 metal works, 33 stone factories, 13 breweries, and 10 silk filatures.

	1917	1918
Cotton gins and presses	1,757	1,785
Rice mills	541	591
Cotton mills	273	274
Oil mills	133	149
Saw mills	126	137

Railway workshops	66	64
Iron and brass foundries	48	46
Flour mills	48	49
Sugar factories	34	32
Silk filatures	43	31

Persons employed

The daily average number of persons employed in all the factories in India, whether worked by mechanical or electrical power or not so worked, and whether owned by Government or local bodies or by companies or individuals, was 1,292,670 in 1918 as against 1,238,167 in 1917, and 1,212,375 in 1916. Of these the number employed in factories under the Act was 1,123,072 as against 1,076,201 in 1917, and 1,061,409 in 1916. Of this total 439,961 (being 39 per cent) were employed in factories in Bengal, and 296,672 (about 26 per cent) in Bombay, these two provinces employing nearly two-thirds of the factory labour of India.

		1917	1918
Adults	Males	857,221	897,619
	Females	158,644	161,343
Children	Males	49,882	53,184
	Females	10,454	10,926

Accidents

There were 5,063 accidents, causing death or bodily injury to operatives, reported in 1918, as against 4,992 in 1917. Of these 180 were attended with fatal results, 59 occurring in Bengal and 39 in Bombay. Bengal also had the largest number of serious accidents, namely, 541, against 181 in Bihar and Orissa, 128 in Bombay, 91 in Burma, 83 in the United Provinces, and 45 in the Central Provinces and Berar. The largest number of minor accidents—818 out of a total of 3,775—occurred in Bengal, Bombay coming in next with 698, closely followed by Bihar and Orissa (695) and the United Provinces (637).

Convictions

There were 195 convictions in respect of offences against the Factories Act in 1918. Of these 140 were for the employment of persons in contravention of the Act, and 15 for neglect to fence machinery, etc.

BREWERIES

[For Table, see page 52]

According to the statistics of 1918, there are 16 breweries in operation in British India. Nine of the breweries are located at stations in the Himalayas from Murree to Darjeeling. The largest brewery is the one at Solon—the Bangalore, Kasauli, Murree, Yellanhalli, Rawalpindi, Quetta, Ootacamund, Mandalay, Naduvakarai, and Aravanghat breweries standing next in importance in the order as shown here.

The marginal table compares the production of Indian breweries with the imports of foreign beer during the last five years. In 1902 the production was 6,475,000 gallons; thereafter it tended to decline, while imports of foreign beer increased proportionately. In the year 1907, the process was reversed, internal production having advanced slightly and imports decreased. Since then until 1916 there was a steady decrease in the production, while the imports, after declining up to 1911 (with a small set-back in 1910), recovered appreciably in 1912, and rose higher in 1913. From 1914 the imports decreased, owing to

	Production gallons.	Imports gallons.
1914	3,434,000	4,213,000
1915	2,533,000	2,818,000
1916	4,103,000	2,889,000
1917	6,217,000	1,842,000
1918	8,214,000	2,003,000

the difficulty in obtaining freight, the absence of a large portion of the British Regular Army from India, and the shortage of light German beer. In 1916, the production showed an appreciable increase, while the imports were practically the same as in 1915. The production continued to rise and reached the highest level, 8,214,000 gallons, in the year under report (1918), while the imports in 1917, touched a very low level of 1,842,000 gallons although it recovered slightly in 1918.

COTTON MILLS

[FOR TABLES, SEE PAGES 53 TO 73]

The Indian cotton industry dates as far back as 1851, when the first mill was started, but complete statistics were not reported until 1879-80. The following statement shows quinquennial averages from that year to 1918-19 and annual figures for each of the years from 1916-17 to 1918-19. The figures in brackets represent the variations for each period taking the average of the quinquennium from 1879-80 to 1883-84 as 100 : (Sterling capital has been converted into rupees at the rate of ₹15 to £1)

	Number of mills at work	Authorised Capital (in lakhs of ₹) as far as reported	Number (in thousands) of		
			Persons employed	Looms	Spindles
Average 1879-80 to 1883-84	63 (100)	657·6 (100)	51·0 (100)	14·5 (100)	1,610·6 (100)
„ 1884-85 to 1888-89	93 (148)	887·9 (135)	75·7 (148)	18·2 (126)	2,296·8 (143)
„ 1889-90 to 1893-94	127 (202)	1,161·7 (177)	116·1 (228)	25·3 (175)	3,263·8 (203)
„ 1894-95 to 1898-99	156 (248)	1,419·5 (216)	150·0 (294)	36·6 (253)	4,046·1 (251)
„ 1899-1900 to 1903-04	195 (310)	1,687·9 (257)	171·6 (336)	42·0 (290)	5,000·9 (310)
„ 1904-05 to 1908-09	218 (346)	1,878·7 (286)	216·4 (424)	60·0 (414)	5,549·1 (345)
„ 1909-10 to 1913-14	257 (408)	2,243·3 (341)	243·3 (474)	88·1 (608)	6,406·4 (398)
„ 1914-15 to 1918-19	265 (421)	2,417·2 (368)	277·6 (544)	110·7 (763)	6,629·8 (412)
Year 1916-17	267 (424)	2,305·8 (351)	277·3 (544)	110·8 (764)	6,670·2 (414)
„ 1917-18	269 (427)	2,466·3 (375)	284·0 (557)	114·8 (792)	6,614·3 (411)
„ 1918-19	264 (419)	2,817·6 (428)	290·3 (569)	116·1 (801)	6,590·9 (409)

It will be seen that the number of persons employed and of looms in operation have increased to a larger extent than the amount of authorised capital, which, however, has not been reported by many private mills.

Number of mills

At the end of 1918-19 there were in India 264 cotton mills, containing 116,094 looms and 6,590,918 spindles. Of this number, 72 were exclusively spinning mills ; 28 were exclusively weaving mills ; one was a dyeing and bleaching mill ; and in 163 mills both spinning and weaving were carried on. They employed a daily average number of 290,255 persons : 212,981 men, 50,029 women, and 27,245 children.

Capital

The authorised rupee capital of the mills, as far as this information has been furnished, is ₹27,69,82,217 and the sterling capital £318,400 ; of the rupee capital, ₹24,44,15,754 is paid-up and of the sterling capital, £258,888 is paid-up. There are, further, rupee debentures to the value of ₹3,35,37,204 and sterling debentures amounting to £99,000. The aggregate of the authorised capital and debentures is thus ₹31⅔ crores, and of this ₹25 crores or £16½ millions is paid-up.

The mills are located as follows :—

	Number	Authorised capital (₹)
Bombay, Island	31	14,03,09,500
„ Ahmedabad	64	2,98,31,500
„ elsewhere	27	2,16,25,000

French India : Pondicherry	4	£318,400

The Bombay Presidency possesses 68 per cent of the mills, nearly 71 per cent of the spindles, and 80 per cent of the looms.

Production of yarn

The total production of yarn in the mills in British India, as far as reported, and the figures of exports, are stated below (lbs) :

	Nos. 1 to 25	Above No. 25	Wastes	Total Production	Total Exports
Average 1896-97 to 1900-01	423,906,898	20,082,852	..	443,989,750	198,002,463
„ 1901-02 to 1905-06	537,379,018	39,935,969	..	577,314,987	270,818,888
„ 1906-07 to 1910-11	555,373,854	53,392,346	160,175	608,926,375	228,318,890
„ 1911-12 to 1915-16	576,997,945	59,245,835	633,907	636,877,687	178,684,648
Year 1916-17	574,746,279	69,354,685	345,937	644,446,901	177,468,937
„ 1917-18	548,699,280	77,877,951	223,279	626,800,510	130,223,130
„ 1918-19	507,899,448	72,430,108	231,158	580,560,714	72,480,373

In the last quinquennium the average annual outturn of yarn was 637,000,000 lbs. In 1918-19 the output was about 581 million lbs, as against 627 million lbs in 1917-18.

The spinning of yarn is in a large degree centred in Bombay, the mills of that province producing nearly 74 per cent. of the total quantity produced in British India. The United Provinces and Madras produced about 6·3 per cent and 7·3 per cent, respectively; while Bengal and the Central Provinces produced about 5·6 per cent and 6 per cent, respectively. Elsewhere the production is as yet very limited.

The production of yarn of counts higher than No. 25 has increased almost steadily, the production in 1918-19 amounting to 72 million lbs, which is 12 per cent of the whole production. In the Central Provinces, Bengal, the United Provinces, and the Punjab, the mills spin hardly any yarn above No. 25, yarn of that count and lower numbers representing 95, 93, 99, and 98 per cent, respectively, of the whole production. In Bombay, however, the spinning of the higher counts (above 25) is 14·2 per cent of the whole, and in Madras it is 16·4 per cent. Using Egyptian and other imported cotton, the Bombay mills are now spinning an appreciable quantity of yarns of No. 40 and upwards. In 1909-10 the production in British India of the finer yarns—Nos. 31 to 40—decreased to 15·5 million lbs from 20 million lbs in 1908-09, but since then there has been an improvement, the output in 1918-19 being above 18 million lbs.

It is interesting to note that the imports of yarn in 1918-19 from the United Kingdom and other countries were about 7 per cent of the total production in British India. The figures are as follows (*lbs*):

	Nos. 1 to 25	Above No. 25	Unspecified descriptions	Total Imports
Average 1896-97 to 1900-01 . .	5,654,194	38,315,540	2,317,358	46,287,092
„ 1901-02 to 1905-06 . .	3,571,768	29,095,637	2,602,569	35,269,974
„ 1906-07 to 1910-11 . .	2,608,278	31,574,481	3,680,680	37,863,439
„ 1911-12 to 1915-16 . .	1,999,767	35,961,784	5,929,759	43,891,310
Year 1916-17	1,892,043	22,285,765	5,351,761	29,529,569
„ 1917-18	732,064	14,236,889	4,431,486	19,400,439
„ 1918-19	8,450,337	25,582,777	4,062,299	38,095,413

Production of woven goods

The production of woven goods in the mills in British India, as far as reported, has been as follows (*lbs*):

	Grey and bleached piece-goods	Other kinds	Total
Average 1896-97 to 1900-01 . . .	80,557,484	11,295,465	91,852,949
„ 1901-02 to 1905-06 . . .	109,884,271	25,009,554	134,893,825
„ 1906-07 to 1910-11 . . .	154,123,927	40,007,307	194,131,234
„ 1911-12 to 1915-16 . . .	205,088,072	67,957,638	273,045,710
Year 1916-17	255,850,480	98,957,420	354,807,900
„ 1917-18	249,610,594	109,567,700	359,178,294
„ 1918-19	236,937,346	88,848,367	325,785,713

In 1918-19 the total production was 326 million lbs, or a decrease of 33 millions lbs or 9·3 per cent as against the preceding year.

Weaving is concentrated in the Bombay mills to an even greater degree than spinning, the mills of that province producing about 85 per cent of the whole quantity woven in British India. The United Provinces produce about 4 per cent, and the Central Provinces and Madras about 5 per cent each. The goods woven are mainly grey and bleached piece-goods, these representing nearly 73 per cent of the whole production.

The most important kinds of grey and bleached piece-goods woven in the mills are specified below (*in lbs*):

	Average 1901-02 to 1905-06	Average 1906-07 to 1910-11	Average 1911-12 to 1915-16	1916-17	1917-18	1918-19
Shirtings and longcloth .	38,611,145	50,679,465	72,662,981	90,597,089	93,170,287	81,482,306
Dhutis . . .	25,448,365	43,950,296	57,383,242	63,275,286	66,318,200	73,957,936
T-cloths, domestics, and sheetings . . .	19,376,545	24,817,341	27,837,660	41,943,474	26,870,665	19,941,038
Chadars . . .	13,628,457	15,678,079	22,975,225	21,181,318	16,985,563	12,276,896

The proportion of woven goods other than grey and bleached piece-goods was highest in Madras, where in 1918-19 it was about 71 per cent. In the Central Provinces the proportion was 23 per cent and in Bombay 26 per cent.

Figures of imports are not readily comparable with those of production, because the former is recorded in yards and the latter up to the year 1906 in lbs, with the exception of grey and bleached piece-goods : the figures of grey and bleached piece-goods are as follows (*in millions of yards*) : Comparison of piece-goods imported and produced

	Imported	Produced	Percentage of production to importation
Average 1896-97 to 1900-01	1654·21	319·55	19·3
„ 1901-02 to 1905-06	1741·6	457·38	26·3
„ 1906-07 to 1910-11	1749·45	676·19	39·2
„ 1911-12 to 1915-16	2032·80	871·03	42·8
Year 1916-17	1436·82	1063·98	74·0
„ 1917-18	1127·83	1067·31	94·6
„ 1918-19	870·05	999·33	114·9

The yardage of coloured piece-goods from April 1906 was as under (*in millions of yards*) :

	Imported	Produced	Percentage of production to importation
Average 1906-07 to 1910-11	519·20	152·71	29·4
„ 1911-12 to 1915-16	591·38	277·29	46·9
Year 1916-17	454·96	426·53	93·8
„ 1917-18	395·59	462·24	116·8
„ 1918-19	227·32	364·42	160·3

To the figures given above for mills in British India, may be added the production in Berar prior to the 1st October, 1903, and in the Indian States, which is stated below (in lbs). The States are Mysore, Indore, Baroda, Nandgaon, Bhavnagar, Hyderabad, Wadhwan, Travancore (Quilon), Kishengarh, Gwalior (Ujjain), and Kolhapur. The production of one mill in Pondicherry has been reported from April, 1909 : Production in Indian States

	Yarn			Woven goods		
	Nos. 1 to 25	Above No. 25	Total	Grey and Bleached	Other kinds	Total
Average 1896-97 to 1900-01	8,700,997	321,672	9,022,669	2,576,912	114,698	2,691,610

JUTE MILLS

[FOR TABLES, SEE PAGES 74 TO 76]

The record of the jute industry, as disclosed by these tables, may well be said to be one of uninterrupted progress. The following statement shows quinquennial averages from the earliest year for which complete information is available with actuals for 1917-18 and 1918-19, and the figures in brackets represent the variations in each period, taking the average of the quinquennium from 1879-80 to 1883-84 as 100. It will be seen that the number of looms and spindles in operation and that of persons employed have increased to a very much larger extent than either the number of mills at work or the amount of capital employed. Progress of Jute mills

			Number (in thousands) of		
	Number of mills at work	Authorised capital (in lakhs of ₹)	Persons employed	Looms	Spindles
Average 1879-80 to 1883-84	21 (100)	270·7 (100)	38·8 (100)	5·5 (100)	88 (100)

Production Exports of manufactures

The production of the mills has increased to a still greater extent. The following figures show the exports of gunny bags and gunny cloth and the declared values of all jute manufactures for the same periods. The value of jute manufactures, principally gunny bags and gunny cloth, exported by sea in 1918-19 is over forty-two times as great as the average value of the export in the period 1879-80 to 1883-84.

	Exports of Jute manufactures		
	Gunny bags in millions of number	Gunny cloth in millions of yards	Value in lakhs of ₹
Average 1879-80 to 1883-84	54·9 (100)	4·4 (100)	124·9 (100)
„ 1884-85 to 1888-89	77 (140)	15·4 (350)	162·9 (130)
„ 1889-90 to 1893-94	111·5 (203)	41 (932)	289·3 (232)
„ 1894-95 to 1898-99	171·2 (312)	182 (4,136)	518 (415)
„ 1899-1900 to 1903-04	206·5 (376)	427·2 (9,709)	826·5 (662)
„ 1904-05 to 1908-09	257·8 (469)	698 (15,864)	1,442·7 (1,154)
„ 1909-10 to 1913-14	339·1 (618)	970 (22,045)	2,024·8 (1,621)
„ 1914-15 to 1918-19	667·6 (1,216)	1,156 (26,273)	4,019·3 (3,218)
Year 1917-18	758·4 (1,381)	1,196·8 (27,200)	4,284·3 (3,430)
„ 1918-19	583·1 (1,062)	1,103·2 (25,073)	5,265·2 (4,215)

Exports of raw jute

Until the outbreak of war the exports by sea of raw jute were marked by increases from year to year, although the improvement was very much less than that in the case of manufactures. In the years 1914-15 to 1918-19 there was a decrease in exports, as compared with the last quinquennium (1909-10 to 1913-1914).

	Jute, raw, tons.
Average 1879-80 to 1883-84	375,000 (100)
„ 1884-85 to 1888-89	445,000 (119)
„ 1889-90 to 1893-94	500,000 (133)
„ 1894-95 to 1898-99	615,000 (164)
„ 1899-1900 to 1903-04	635,000 (169)
„ 1904-05 to 1908-09	755,000 (201)
„ 1909-10 to 1913-14	765,000 (204)
„ 1914-15 to 1918-19	464,000 (124)
Year 1917-18	278,000 (74)
„ 1918-19	398,000 (106)

Prices

The price of ordinary raw jute reached its highest point in 1913-14, the rate being ₹76-12-0 per bale; in 1917-18 it dropped to ₹38-8-0, but in 1918-19 it rose again to ₹60. The price of gunny cloth (hessian 10½ oz. 40″) rose from ₹17 per 100 yards in 1913-14 to ₹33 in 1918-19.

PAPER MILLS

[For Tables, see pages 77 and 78]

The number of paper mills in India at work in 1918 was nine, three in each of the Bombay and Bengal Presidencies and one each in the United Provinces, the Travancore State, and the Gwalior State. The estimated authorised capital of these mills, as far as information is available, was about ₹52½ lakhs. The value of the output reported rose from ₹1,88 lakhs in 1917 to ₹2,11 lakhs in 1918 and was the highest on record.

In 1914 the value of the paper manufactured in India and that of imported paper were ₹82 lakhs and ₹1,48 lakhs, respectively. In 1918 the corresponding figures were ₹2,11 lakhs and ₹2,76 lakhs, the value of the internal production having increased in the meantime by 157 per cent, and that of the imports by 87 per cent. The values of country-made and imported paper during the last five years are given in the margin.

	Produced in Indian mills ₹	Imported ₹
1914	82,12,000	1,48,00,000
1915	89,62,000	1,39,00,000
1916	1,24,85,000	2,34,00,000
1917	1,87,86,000	2,13,00,000
1918	2,11,18,000	2,76,00,000

The increase in 1918, both in internal production and in imports, is noticeable. Owing to the war and the resulting absence of competition from foreign countries, the Indian paper industry is comparatively prosperous, notwithstanding the increased cost of wood pulp and of chemicals required in the process of manufacture and the inability to secure new machinery.

WOOLLEN MILLS

[For Tables, see pages 79 and 80]

Of the seven woollen mills in India, one is in the Mysore State, and of the remaining six, three represent a paid-up capital of ₹1,41,50,500 (£943,367), while the capital of the other three, which are private mills at Calcutta and at Bombay, is not stated. Two of the mills, that is, the one at Cawnpore in the United Provinces and the other at Dhariwal in the Punjab, have between them a paid-up capital of ₹1,35 lakhs (£900,000) or 86 per cent of the whole, and produce 65 per cent of the total outturn of Indian mills. They weave cloth for the use of the army and the police, and generally articles of superior quality.

There was an increase during the year under review in the number of looms and spindles. In 1906 and 1907, there was a considerable shrinkage in production; in subsequent years there was a steady increase, the figure (quantity) for 1916 surpassing all previous records, although the value of the production was the highest on record in 1917. In 1918, there was a decrease both in quantity and value of the production. Up to 1914, the imports of woollen goods into India were very much greater than the production of Indian mills. In 1915

the order was reversed, and the production much exceeded the imports. In 1916 there was a sharp recovery in the imports which were nearly equal to the production in Indian mills, and both in 1917 and 1918 the imports slightly exceeded the production. Piece goods and shawls, mostly from the United Kingdom, make up the bulk of the imports. The values of country-made and imported woollen goods compare as shown in the marginal table. There are in various places factories for the weaving of carpets and rugs and of *pattu* and *páshmina*, but although these industries are in the aggregate extensive, they are individually small, and weaving is done by hand-looms.

	Produced in Indian mills	Imported
	R	R
1914	80,09,000	2,15,35,000
1915	1,23,01,000	86,05,000
1916	1,66,59,000	1,64,04,000
1917	2,01,10,000	2,28,00,000
1918	2,00,15,000	2,05,96,000

The exports of woollen goods from India consist almost entirely of carpets and rugs. The value of Indian carpets and rugs exported during the last five calendar years is stated in the margin. The exports gradually declined up to 1914; the decline was arrested in 1915, and there was a marked increase in 1916. Since then the exports have declined again.

	R
1914	18,18,000
1915	19,57,000
1916	26,27,000
1917	19,10,000
1918	11,43,000

MINERAL PRODUCTION

[FOR TABLES, SEE PAGES 81 TO 87]

The minerals for which figures are recorded in these tables are those comprised in Group I of the minerals dealt with in the Records of the Geological Survey of India, that is to say, those minerals for which approximately accurate and full returns are obtainable.

Salt.—Statistics are supplied annually by all Local Governments and Administrations. Full details of the production and consumption of salt and the administration of salt revenue are contained in Volume II Financial of the Statistics of British India.

Coal.—The figures are compiled chiefly from the statutory returns of the output furnished to the Chief Inspector of Mines in India by the Managing Agents of mines regulated by the Indian Mines Act, VIII of 1901. Figures for mines situated in Indian States and for mines not coming within the operation of the Indian Mines Act are furnished by the Director, Geological Survey of India. Details regarding the coal mining industry in India are given separately in the next section relating to Coal Mines.

Gold.—The figures are supplied by the Director, Geological Survey of India. 94 per cent of the total output of gold in 1918 was derived from the Kolar gold field in Mysore, the quantity won being 504,412 ounces, valued at R2,90,51,774. The production of this field reached its highest point in 1905 when 616,758 ounces were raised. The Anantapur mines in Madras come next, but at a respectable distance, to the Kolar gold field. The output in 1918 was 17,831 ounces, valued at R10,08,279, or 3·3 per cent of the total output of Indian gold. These mines gave their first output of gold during the year 1910, the amount being 2,332 ounces, valued at R1,51,800, and the output has almost steadily increased. The Nizam's mines at Hutti in Hyderabad follows the Anantapur mines, the yield in 1918 being 11,503 ounces, valued at R6,74,046. Other gold mines of minor importance exist in Bihar and Orissa and Burma. The Kyaukpazat mine in Upper Burma was worked until 1903, when the paychute was lost and the mine closed down. In 1902 dredging operations were started on the Irrawaddy river near Myitkyina, and 216 ounces of gold were obtained in 1904; the amount steadily increased from year to year and reached 8,445 ounces in 1909, but fell to 106 ounces in 1918. In Bihar and Orissa 450 ounces of gold were for the first time extracted in 1915 from the Singhbhum mines in Chota Nagpur. The output fell from 2,462 ounces in 1917 to 2,085 ounces in 1918. The small quantity of gold produced in the Punjab and the United Provinces is obtained by washing. Gold washing is carried on in a great many districts in India, but there is no complete record of the amount obtained in this way. The average earnings of the workers are very small, and the gold thus won is used locally for making jewellery.

Petroleum.—Figures of production are supplied by the Director, Geological Survey of India. Petroleum is found in India in two distinct areas—one on the east, which includes Assam, Burma, and the islands off the Arakan coast. This belt extends to the productive oil fields of Sumatra, Java, and Borneo. The other area is on the west, and includes the Punjab and Baluchistan, the same belt of oil-bearing rocks being continued beyond the borders of British India to Persia. Of these two, the eastern area is by far the most important, and the most successful oil fields are found in the Irrawaddy valley. Yenangyaung is the oldest and most developed of these fields. Native wells have been at work here for over a century, and in 1886, prior to the annexation of Upper Burma, the output is estimated to have averaged over 2 million gallons a year. Drilling was begun in 1887. The output of the field rose to 10 million gallons in 1894, and to 40 million gallons in 1902. Since then progress has been more rapid, and the output reached 204 million gallons in 1918. The Yenangyat field yielded a very small supply of petroleum before 1891, in which year drilling was started by the Burma Oil Company. For some years its progress was slow, but in 1903 the production reached 22 million gallons. Since then the output has decreased, and it was about 4¾ million gallons in 1918. Singu now holds the second place among the oil fields of India. Petroleum was struck at the end of 1901, and in 1903, 5 million gallons were obtained. In 1907 and 1908 the production of this field was about 43 million gallons, and, after a fall to 31½ million gallons in 1910, it rose to about 61 million gallons in 1918. Several of the islands off the Arakan coast are known to contain oil deposits, but their value is uncertain. About 11,000 gallons were obtained from the Eastern Barongo Island near Akyab, and about 47,000 gallons from Ramri Island in the Kyaukpyu district during 1918. Oil was struck at Minbu in 1910, the production for that year being 18,320 gallons, which increased to about 5 million gallons in 1918. For the first time the Chindwin field shows an output, amounting to nearly ½ million gallons in 1918. The

existence of oil in Assam has been known for many years, and an oil spring was struck at Digboi near Makum in 1867. Nothing more, however, was done until 1883, and from that year to 1902 its progress was slow. Since that year the annual production has been between 2½ million and 6½ million gallons. A new field at Badarpur in Assam was opened up in 1917, and it produced nearly 3 million gallons in that year and 5½ million gallons in 1918.

On the west, oil springs have been known for many years to exist in the Rawalpindi and other districts in the Punjab, but the output was insignificant until the discovery of the Khaur field, which produced ¼ million gallons in 1915. The total output of the province in 1915 amounted to 251,500 gallons but fell to 183,800 gallons in 1916. In 1917 the production, however, increased more than threefold, the total output being 619,500 gallons and in 1918 the output further rose to 750,800 gallons. In Baluchistan, geological conditions are adverse, and although some small oil springs have been discovered, attempts to develop them have not hitherto been successful.

The consumption of kerosene in India (excluding Burma) is rapidly increasing and has risen from about 79 million gallons in 1900-01 to 130½ million gallons in 1918-19. The enormous increase in the output of the Burma oil fields has reversed the position formerly held by foreign and Indian oil in the market. In 1908-09, however, the proportion of foreign oil consumed was a little higher than that of Burma oil; but from 1909-10 Burma oil has regained its position.

The following statement shows the quantity of dangerous and non-dangerous petroleum produced in Burma and Assam during the last ten years:—

Year	Burma		Assam	
	Dangerous	Non-dangerous	Dangerous	Non-dangerous
	1,000 gals.	1,000 gals.	1,000 gals.	1,000 gals.
1909	18,479	134,081	37	2,144
1910	18,246	143,387	57	2,034
1911	21,228	148,874	81	2,142
1912	23,109	161,250	121	1,906
1913	32,375	184,617	180	2,539
1914	32,282	178,314	218	2,976
1915	26,129	171,004	240	2,631
1916	33,159	176,109	367	3,056
1917	32,436	175,708	462	3,713
1918	33,086	176,621	449	8,980

Chromite.—The exploitation of the chromite deposits in Baluchistan, which were discovered by the Geological Survey of India in 1901, was begun in 1903. In 1906 the output amounted to 4,375 tons, which rose in 1918 to 22,944 tons, the highest on record, valued at R3,44,160. At present the ore is raised entirely for export. The opening up of the Mysore chromite deposit commenced in 1907 with an initial output of 11,029 tons, valued at R2,20,580. There was no production during the years 1910 to 1912. In 1913 the production was 1,414 tons, rising in 1918 to 33,740 tons, valued at R4,12,115. The year 1913 recored for the first time in the Singhbhum district (Bihar and Orissa) an output of 848 tons of chromite, valued at R6,784; the output rose in 1917 to 3,266 tons, valued at R46,657, but fell to 1,085 tons, valued at R24,666, in 1918.

Copper-ore.—The output of copper-ore in Singhbhum increased from 2,173 tons, valued at R48,885, in 1916, to 20,108 tons, valued at R4,52,430, in 1917, but in 1918 fell to only 3,619 tons, valued at R60,795. Smelting operations began at the Rakha mines during the year 1918 and resulted in the production of 13 tons of blister copper.

Diamonds.—Diamonds are produced in the mines of the Vindhyan belt which stretches through the Central Indian States of Panna, Charkhari, Ajaigarh, and Bijawar. The production in this field was 44 carats, valued at R7,133, in 1911. In 1913 it showed an increase to 79 carats, valued at R26,536, but fell in 1918 to 73 carats, valued at R39,377. In 1909, 111 carats were obtained from Banganapalli, Madras, but the production in 1911 was insignificant, being 9 carats only. In 1913, 37 carats were obtained from the Karnul district, but in the following five years no output was recorded in the Madras Presidency.

Graphite.—Graphite occurs in the Travancore State under geological conditions similar to those of the richer deposits worked in Ceylon. The production in 1911 was 3,993 tons, the highest on record. Owing to the difficulties of working, the mine has been shut down since 1912. Some 54 tons of the mineral were obtained from the Vizagapatam mine in Madras in 1911, but no output has been recorded since 1912. Since the closing down of the Travancore mines attention has been paid to the graphite deposits in Bihar and Orissa and in Rajputana. At present the industry is only in its infancy, the total output being 42 tons in 1917 and one ton in 1918 in Merwara (Rajputana) and about 61 tons and 80 tons in the respective years in Kalahandi (Orissa).

Iron-ore.—The production of the Tata Iron and Steel Co.'s mines in Maurbhanj (Orissa) appeared in the statistics for the first time in 1911, the amount being 300,000 tons, valued at R3,00,000. The output rose in 1912 to 471,232 tons, valued at R4,71,232, but fell to 338,903 tons, valued at R4,43,045, in 1918. The Bengal Iron and Steel Works obtain their ores from Bengal and Chota Nagpur, the major portion of the output now coming from Singhbhum in Chota Nagpur. Elsewhere in India, namely, in the Central Provinces, the

United Provinces, Madras, Central India, Hyderabad, Mysore, Rajputana, Burma, and the Punjab, operations are carried on, on a very small scale, for use in the small native furnaces. The value reported for the ore raised in Orissa and Chota Nagpur works out to an average of R1·3 per ton. Elsewhere the reported value is much higher, being about R4 per ton.

Jadestone.—The substance which passes as jadestone is mainly the mineral jadeite, which occurs in an altered igneous dyke in serpentine in the Myitkyina district of Upper Burma and also in the form of boulders in a tertiary conglomerate and in alluvium. It is worked in an unadministered tract, and there are no reliable figures of production. The figures given in the tables are those of the exports by sea from Rangoon, together with the exports overland to China.

Lead and Silver.—The smelting of lead slags and lead ore at Bawdwin by the Burma Mines, Ld., resulted in a production in 1910 of 12,896 tons of lead and 49,680 ounces of silver worth R24,23,137 and R74,520, respectively. The output during 1918 amounted to 19,074 tons of lead and 1,970,614 ounces of silver, valued at R67,51,842 and R44,33,881, respectively. 1,169 ounces of silver were obtained in 1918 as a by-product in the extraction of gold at Anantapur in Madras by the Jibutil Gold Mines of Anantapur, Ld.

Magnesite.—This mineral is worked in the Chalk Hills near Salem in the Madras Presidency. The output in 1918 was 5,773 tons, as against 18,192 tons in 1917. From 1913, this mineral has been worked also in Mysore, but there was no production in 1915, and since then the output has been very low, the production in 1918 being only 80 tons.

Manganese-ore.—This industry commenced about twenty-seven years ago by quarrying the deposits of the Vizagapatam district, and from an output of 674 tons in 1892, the production rose rapidly to 92,008 tons in 1900, when the richer deposits in the Central Provinces were also attacked and are now yielding a larger quantity of ore than the Vizagapatam mines. The manganese-ore industry suffered from severe depression during the years 1914 and 1915, the output having fallen from 815,047 tons, valued at R1,81,65,515, in 1913, to 682,898 tons, valued at R1,31,58,965 in 1914 and 450,416 tons, valued at R1,39,43,187, in 1915. The output rose to 645,204 tons, valued at R2,23,05,393, in 1916. In 1918 the output was 517,953 tons, valued at R2,22,26,025.

Mica.—The chief centres of production are the Nellore district in Madras, the Hazaribagh and Gaya districts of Bihar and Orissa, and certain States in Rajputana. Prospecting has been carried on in various districts of Madras, the Central Provinces, Upper Burma, and Assam, and in the Kishengarh State. The output of mica in 1918 was 54,684 cwts., as against 40,907 cwts in 1917.

Monazite.—This mineral has now taken an important place in the list of minerals of economic value produced in India. At present it is worked in Travancore by the London Cosmopolitan Mining Co. The output, which amounted in 1911 to 832 tons, valued at R3,60,660, rose in 1918 to 2,117 tons, valued at R8,82,285.

Platinum.—Four ounces of this mineral, valued at R287, were won in 1917, during the course of the gold dredging operations at Myitkyina in Burma; owing to cessation of the operations during 1918, Burma has ceased to produce platinum, the quantity recovered during the year 1918 being less than half an ounce.

Rubies.—The figures in the tables represent the quantity and value of rubies raised by the Burma Ruby Mines, Ld., in the Ruby Mines district of Upper Burma. There are no statistics available of the quantity and value of rubies raised by Indian miners in the district. Rubies are also found in the Mandalay and Myitkyina districts, but the production is on a very small scale. The total quantity of the mineral reported to have been raised in 1918 amounted to 164,115 carats, valued at R6,04,649.

Saltpetre (Nitrate of Potash).—This article is largely produced for export. It is mainly produced in the United Provinces, the Punjab, and Bihar. The production of saltpetre was 510,270 cwts in 1918, as against 443,635 cwts in 1917.

Tin-ore.—Tin-washing is carried on in the Tenasserim Peninsula, and also in the Bawlake State of Karenni chiefly by Chinese immigrants, in an uncertain and unsystematic way. The production of tin-ore in 1911 was 1,943 cwts, and rose to 15,607 cwts in 1918. In addition 2,014 cwts of block tin was produced in 1918, as against 2,818 cwts in 1917.

Wolfram (Tungsten-ore).—The great activity displayed in prospecting for wolfram in Tavoy and to a less extent in Mergui in Burma resulted in the output of 396 tons in 1910, and of 2,645 tons, valued at R44,51,592, in 1915. The quantity of the ore produced in India in 1918 was 4,431 tons, valued at R1,09,00,213.

Zinc-ore.—The ore is found in association with galena in the Bawdwin mines in Burma, large ore-bodies being composed of the latter mineral and zinc-blende. In 1914, 8,553 tons of zinc-ore, valued at R1,61,430, were produced, as against 3,871 tons, valued at R73,065, in 1913. In 1915 the output fell considerably to 87 tons, valued at R2,610, but rose to 3,198 tons, valued at R87,396, in 1916. No output has, however, been recorded since 1917.

COAL MINES

[FOR TABLES, SEE PAGES 88 TO 94]

Sources of Statistics

All returns of production in the case of mines under the Indian Mines Act, VIII of 1901, are sent direct by the Managing Agents of mines to the Chief Inspector of Mines, who forwards them to this Department. The Director, Geological Survey of India, supplements them by the returns sent to him by Local Governments and Political Agents for non-Act and Indian States mines. Information regarding the imports and exports of coal has been taken from the Seaborne and Railborne Trade Accounts published by this Department. As regards consumption of coal, data have been specially obtained from the Railway Board, the Coal Transportation

officer, the Steamer Companies, the Port Trusts, and mills and factory owners. Additional information regarding foreign countries has been obtained from the British Board of Trade, British Consuls, and also from other official sources.

Production

The quantity of coal produced in each province in India from 1878 to 1918 is given in table No. 31. Although production and consumption have shown a steady increase, which has been specially noticeable since 1906, the development of the coal resources of the country is as yet incomplete.*

The total production in 1918 amounted to 20,722,000 tons or about 13·8 per cent more than was produced in the previous year. To this may be added some 414,000 tons estimated to have been taken out from the mines by miners for their own use. The total production in 1918 would thus come to some 21,136,000 tons, but for purposes of comparison the figure 20,722,000 tons should be adopted.

Nearly all the coal producing districts shared in the increase in output in 1918. In the Jherria and Raniganj fields the output increased by 1,168,000 tons and 992,000 tons, respectively. A substantial increase was also marked in the coal-fields of Ramgarh-Bokaro (Hazaribagh) and the Central Provinces. The output of the mines in Rajputana and Central India (Rewah) and of the coal-fields of Giridih, Jainty (Santhal Parganas) and Daltonganj (Palamau) also showed some increase. There was a light decrease in the production of the mines in Hyderabad, Assam, and Sambalpur.

Coal-fields

The coal-fields that have been worked in recent years are classified below, with the quantity produced in 1918, according as they belong geologically to the Gondwana system of strata, chiefly composed of sandstones and shales deposited in fresh water and by rivers, or to Tertiary (or Cretaceous) beds:—

Gondwana Coal-Fields—	1918 tons	Per cent of total
Bengal and Bihar and Orissa—		
Daltonganj	81,800	·39
Giridih	846,600	4·09
Jherria	10,952,000	52·85
Jainty	140,400	·68
Ramgarh-Bokaro	542,000	2·62
Raniganj	6,368,500	30·73
Sambalpur	51,000	·25
Central India—		
Umaria (Rewah)	200,000	·96
Central Provinces—		
Mohpani	78,800	·38
Pench Valley	267,300	1·29
Ballarpur (Chanda)	135,400	·65
Hyderabad—		
Singareni	659,100	3·18
Total	20,322,900	98·07

Tertiary Coal-Fields—	1918 tons	Per cent of total
Baluchistan—		
Khost	29,000	·14
Sor Range, Mach, etc.	14,100	·07
Assam—		
Makum, etc.	294,500	1·42
North-West Frontier Province—		
Hazara	200	..
Punjab (Salt Range)—		
Jhelum District	39,700	·24
Mianwali „	5,200	
Shahpur „	5,600	
Rajputana—		
Bikaner	11,300	·06
Total	399,600	1·93

It will be seen from the above that about 98·1 per cent of the coal supplies of India is obtained from the Gondwana coal-fields and 1·9 per cent from Tertiary beds.

The Raniganj field and the Jherria field are in the Damodar Valley and produce about 84 per cent of the total output of Indian coal. The Raniganj field (where the first Indian coal mine was opened in 1820) held the first place as regards production up to 1905, but since then has stood second, its yield in 1918 being 6,368,500 tons or 30·7 per cent of the year's total production. It lies chiefly within the district of Burdwan (Bengal), but stretches also across the boundaries of the district into Bankura and Birbhum (Bengal), Manbhum, and the Santhal Parganas (Bihar and Orissa). The Jherria field in Bihar and Orissa, which was opened in 1893, went ahead of Raniganj in 1906, and it has succeeded in maintaining the lead since that date, the output in 1918 being 10,952,000 tons (that is, 53 per cent of the total production). Of the remaining fields in Bihar and Orissa, the Giridih field, a small isolated patch to the north of the Damodar Valley, produced, in 1918, 846,600 tons or 4 per cent of the total. The Daltonganj field, further west in the Palamau district, was opened in 1901; it yielded 81,800 tons in 1918. The Jainty field, near Giridih, which was opened in 1914, produced 140,400 tons in 1918. In the Ramgarh-Bokaro field, lying immediately to the west of Jherria in the Damodar Valley, exploration was begun in 1908, and its yield in 1918 was 542,000 tons. The Sambalpur field was opened for the first time in 1909, and its production amounted to 51,000 tons in 1918. These seven coal-fields accounted for 92 per cent of the coal raised in India in 1918.

Outside Bengal and Bihar and Orissa, the most important mine is at Singareni near Yellunda in the Hyderabad State. Work was begun at Singareni in 1887, and progress has been more rapid than in any other place outside Bengal and Bihar and Orissa, the average annual production during the last ten years being some 559,000 tons. Its output in 1918 was 659,100 tons. The Umaria mine in the Rewah State in Central India was started in 1884. Its progress was steady up to the year 1903, when the production was 193,300 tons; thereafter there was some retrogression until 1916 when the maximum output of 200,300 tons was reached. In 1918, the output was 200,000 tons. In the Central Provinces, the Ballarpur mine, lying in the Wardha Valley in the Chanda district, was opened in 1904 and the work of extracting coal began seriously in 1908. The output of this mine in 1918 was 105,700 tons. The Mohpani and Pench Valley fields lie, respectively, at the northern and southern fringes of the Satpura range. The former is situated in the Narsinghpur district in the south of the Nerbudda alluvial valley and has been worked by the Great Indian Peninsula Railway Company since 1904; its output was, in 1918, 78,800 tons. The Pench Valley field in the Chhindwara district was opened in 1905, and its yield rose from 1,100 tons in 1905 to 267,300 tons in 1918.

* "Of the numerous coal-fields of proved value in India 18 are actually being worked, but only 7 are of any considerable importance, whilst 89 per cent of the total output is produced in the Raniganj and Jherria fields. The reason for this state of things is not far to seek. Most of the coal-fields are too remote from the ports and centres of manufacturing industry to render it possible for their produce to be carried to places where it would have to compete with fuel from the premier coal-fields of Bengal". Ball and Simpson, Coal-fields of India, 1913—Memoirs of the Geological Survey of India, Vol XLI.

Next with reference to Tertiary or Cretaceous coal-beds. The most important of these are in north-east Assam, where the Makum coal-fields have been worked since 1882, and the coal obtained has a remarkably low percentage of ash and a high calorific value. The output was 294,500 tons in 1918. Next in rank of importance come the Salt Range mines of the Punjab and the Khost mines on the Sind-Pishin Railway in Baluchistan. Both of these have been worked for the past 32 years, but their production in 1918 was only 50,500 tons and 29,000 tons, respectively. The coal produced at Palana in the Bikaner State in 1918 was 11,300 tons, as compared with 6,000 tons in the previous year.

Value of coal at the pit's mouth

The value of the coal produced in India is reported annually by mine-owners. It represents the actual or estimated wholesale price of coal at the pit's mouth. The average value of all the coal produced in each province in India in each of the last fifteen years is given in table No. 32. In 1918 the average value was R4-6 per ton. The lowest value, namely, R2-8 per ton, was that of 1905 and the highest (R4-6) was reached in the year under review when demand kept ahead of supply. The marginal table compares the average value at pit's mouth of Indian coal with the declared export value per ton in each of the last five years. The declared export value is 2½ times the value at the pit's mouth. The total estimated value of the output in 1918 was R9,03 lakhs, as against R6,77 lakhs in 1917.

Average Value of Coal

	Declared export value per ton		Value at the pit's mouth per ton	
	R	a.	R	a.
1914	8	13	3	9
1915	9	3	3	5
1916	9	2	3	6
1917	9	5	3	11
1918	10	9	4	6

Prices

The comparative average prices per ton of Bengal coal at Calcutta and of Indian and Welsh coal at Bombay and Karachi from 1904 are shown in table No. 33. In 1918 prices of Indian coal at Calcutta fell, while those at Bombay and Karachi rose considerably.

Freights

In order to get an idea of the comparative prices of Bengal coal in the principal centres of industry in India, the freight has to be added to the f.o.r. prices. The marginal table shows the freight (including 2 annas terminal charges) on the E. I. Railway per ton of coal by rail for full wagon loads at owners' risk (owners to load and unload) from the Raniganj and Jherria fields in 1918. It is interesting to note that the transport of coal forms an important item in the earnings of the Railway Companies, especially the East Indian and the Bengal-Nagpur systems, which serve the coal-fields of Bengal and Bihar and Orissa.

	From Raniganj			From Jherria		
	R	a.	p.	R	a.	p.
To Calcutta	2	6	0	3	4	0
„ Cawnpore	6	6	0	6	1	0

„ Lahore	10	3	0	9	15	0
„ Bombay	12	2	0	12	2	0
„ Karachi	13	9	0	13	5	0

The average rates of freight per ton of coal by sea from Calcutta during 1916, 1917, and 1918 were as stated in the margin. The rates in 1918 for Madras and Rangoon were very much higher than those in 1916 and 1917. Coal freight from Calcutta to Karachi during the last three years was unobtainable, and all coal for that port was carried by rail.

Labour

Table No. 34 shows the total number of men, women, and children employed in coal mines in India during each of the last fifteen years. This number represents the "average daily attendance" throughout the year, and is obtained by dividing the total number of attendances by the number of working days in each year. Coal-mining employs more labour than any other *mining* industry, and will probably continue to do so for many years. In 1918, 191,325 persons were employed as against 167,272 in 1917, or an increase of 24,053 persons or 14·4 per cent. Details for the provinces for 1918 are given below :—

Province	Men	Women	Children	Total	Per cent of total	Output per person employed
Bihar and Orissa	70,341	46,314	2,194	118,849	62·12	115·1
Bengal	28,800	16,830	519	46,149	24·12	114·9
Hyderabad	8,834	2,748	..	11,582	6·05	56·9
Central Provinces	4,410	1,506	136	6,052	3·17	79·5
Assam	2,581	418	86	3,085	1·61	95·5
Central India	2,579	468	..	3,047	1·59	65·6
Punjab	1,304	3	51	1,358	·71	37·1
Baluchistan	980	2	11	993	·52	43·4
Rajputana (Bikaner)	149	33	16	198	·10	57·2
North-West Frontier Province	12	..	..	12	·01	20·0
Total	119,990	68,322	3,013	191,325	100	108·3

The labour employed in the coal-fields of Bihar and Orissa and Bengal showed an increase of 12,300 persons and 7,600 persons, respectively, with the result that the output of coal in these two provinces increased by about 2½ million tons. The classes from which the colliery labour is recruited being largely agricultural, a favourable monsoon results in a shortage, since the miner leaves the collieries to cultivate his fields and only returns when his work is completed and his savings exhausted.

Output per capita

The *per capita* output of coal in India in 1918 is compared in the marginal statement with the results of the immediately preceding four years. The Indian miner is still to some extent a miner by caprice, and as stated above, in a year of agricultural prosperity the scarcity of labour is much felt. Epidemics of cholera and other diseases are not infrequent and cause a shortage of labour. As the workings get deeper, the need of a mining population, which specialises in mining, will become greater. The total number of fatal accidents during 1918 was 212, giving a death rate of 1·11 per 1,000 persons employed. There has been a great advance in the use of electricity in the coal mines of Bengal and Bihar for haulage, pumping, lighting, and ventilation. There is, however, little or no coal-cutting by machinery. Occasionally a plant is put down for the purpose of making long connections underground rapidly, but as long as labour conditions remain as they are, there will not be much headway in the introduction of mechanical coal-cutters.* The Chief Inspector of Mines in India in his Report for 1918 remarked :— "The largely increased output would tend to show that Indian colliery owners did not suffer much from scarcity of machinery and plant from overseas. If, however, hostilities had not been suspended when they were and manufactures in the United Kingdom had not been set free to execute orders from India, many of which were long overdue, the scarcity of materials, especially in the case of wire ropes, would soon have begun to affect the output. The output in Assam was affected to a certain extent, towards the end of the year, for want of wire ropes."

	Above and below ground Tons	Below ground only Tons
1914	108·7	166·7
1915	106·8	160·2
1916	110·2	169·4
1917	108·9	173·5
1918	108·3	171·8

Imports

The quantities of foreign coal imported into India from the principal countries during the last twenty-eight years are given in table No. 35. For the first fifteen years quinquennial averages only are shown. The figures represent only private merchandise and do not include Government stores, the imports of which amounted to 13,100 tons in 1918, as against 1,600 tons in 1917. The largest quantity imported in any one year of the series was some 820,000 tons, valued at ₹1,47 lakhs, in the year 1894. The statistics for succeeding years have undergone considerable fluctuations. The largest quantity imported in recent years was in 1913, when 645,000 tons, valued at ₹1,22 lakhs, were imported. In 1918 the imports were 54,300 tons, or an increase of 21 per cent as compared with the previous year. Bombay has naturally been the largest importer and Burma the second. The United Kingdom has usually supplied by far the greatest part of imported coal, but in 1916 and 1917 the largest quantity came from Australia and in 1918 from Portuguese East Africa. On the average of the twenty-eight years of the series, Australia holds the second place and Japan the third. The United Kingdom sent to India 8,724 tons in 1918, as against 6,903 tons in the previous year. The imports from Australia, which in 1912 amounted to 92,000 tons, declined to 4,857 tons in 1918. The imports from Japan in 1918, were 3,276 tons. The imports from Natal were insignificant until 1907, the largest quantity imported being 136,700 tons in 1913. Natal's share in 1917 was 3,857 tons, and in 1918, 13,020 tons. The only other country from which coal is now imported into India in any considerable quantity is Portuguese East Africa, the imports in 1918 from there amounting to 22,680 tons, as against 9,080 tons in 1917. The provincial shares of imported coal in 1918 were : Bombay, 69 per cent of the total imports ; Burma, 26 per cent ; and Bengal 5 per cent.

Exports

The total quantity of Indian coal exported from India during the last twenty-eight years and the share of each of the principal importing countries are shown in table No. 36. As in the case of the statistics of imports, quinquennial averages only are given for the first fifteen years. Bunker coal and Government stores are not included in this statement, which relates only to coal shipped as private merchandise to foreign ports. The exports rose in proportion to the expansion in production up to the year 1906 ; thereafter there was a progressive decline in the ratio up to 1909. This decline was arrested in 1910, but there has again been a contraction in subsequent years. On the average of the seven years 1900 to 1906, the exports were 8 per cent of the total production of Indian coal, as against 6 per cent on the average of the succeeding seven years 1907 to 1913. In 1914 the ratio was 3·5 per cent and in 1915, 4·4 per cent, in 1916, 5·1 per cent, in 1917, 2·2 per cent, and in 1918, ·4 per cent. That is to say, exports in 1918 were in the proportion of only one ton to about 278 tons produced. The bulk of the production is thus consumed in the country. Almost all the coal shipped from India as private merchandise is sent from Calcutta. Ceylon and the Straits Settlements are the two principal markets for Indian coal, and of the total quantity shipped in 1918, 69·9 per cent was for Ceylon† and 13·8 per cent for the Straits. From 1902 to 1906 the total exports abroad increased rapidly and reached 1,003,000 tons in 1906 ; but from 1907 the exports have not shown that expansion which might have been expected in view of the increased production. In 1918 the shipments fell considerably to 74,500 tons from 408,100 tons in 1917 and 881,700 tons in 1916. From 1914, the exports were specially handicapped by high ocean freight rates consequent on the very great shortage of tonnage due to the war. There was thus a considerable decrease in the coastwise exports of coal by sea to Indian ports, and the railways accordingly made special arrangements to carry the supplies to Bombay, Karachi, and Madras. The exports of coal from Bengal and Bihar and Orissa to Bombay from 1914 to 1918 were as follows :—

	1914	1915	1916	1917	1918
To Bombay—	Tons	Tons	Tons	Tons	Tons
Shipped from Bengal (mainly Calcutta).	788,000	328,000	1,000	..	2,500
Carried by East Indian Railway . .	713,500	421,300	1,036,600	1,722,000	989,000
„ „ Bengal Nagpur Railway .	42,000	210,200	498,700	757,300	358,400

* *Vide* Records of the Geological Survey of India, Vol. XLVI, 1916
† For use of steamers as well as for exports abroad

Distribution

In table No. 37 is shown the total available supply of coal (Indian and Foreign) in India, which is arrived at by adding imports (minus re-exports) to the total production and subtracting exports therefrom. In 1918 the figure stood at 20,702,000 tons, as compared with 17,849,000 tons in 1917 and 16,303,000 tons five years ago. From this figure the consumption of coal per head of population comes to ·06 ton or about one cwt a year.

Tables Nos. 38 and 39 show the distribution of coal produced in the country and imported from abroad, and the agencies by which it is distributed. Calcutta uses almost exclusively Bengal and Bihar and Orissa coal. The province of Bihar and Orissa is self-supporting, although it takes a small quantity of Bengal coal. Bombay city derives its supplies by sea from foreign countries and by rail from Bengal and Bihar and Orissa, partly for its own consumption and partly for diffusion throughout the Bombay Presidency, which also receives considerable quantities by rail from Bengal, Bihar and Orissa, the Central Provinces, and Hyderabad. Madras imports most of its coal from Bihar and Orissa, but also draws part of its supply from Bengal and Hyderabad. Sind draws its supply mainly from Bihar and Orissa and Bengal. Assam, the United Provinces, the Punjab, the Central Provinces, Rajputana, and Central India import the bulk of their requirements by rail and river from Bihar and Orissa and Bengal. Most of the coal consumed in Mysore comes mainly from the Hyderabad and Bihar and Orissa mines. Burma gets its supply by sea from Bengal and foreign countries.

Consumption

The supply available in the cities of Calcutta and Bombay and in each province is given in table No. 40 The quantity available in Calcutta in 1918 was about 2⅔ million tons, while that in the city of Bombay was 1½ million tons.

The statement in the margin gives an estimate of the quantity of coal (Indian and foreign) consumed during 1918, in the different classes of industries, railways, etc., but the figures can only be regarded as approximate, and in the case of some of the heads they represent a very rough estimate.

	Estimated consumption Tons	Per cent of total
Railways	5,881,000(*a*)	28·4
Admiralty and Royal Indian Marine Shipping Accounts	1,358,000	6·6
Bunker coal	1,180,000	5·7
Jute mills	1,045,000	5·0
Cotton mills	968,000	4·7
Iron and brass foundries (including Engineering workshops)	1,307,000	6·3
Inland steamers	485,000	2·3
Brick and tile factories (including potteries and cement works)	477,000	2·3
Tea gardens	225,000	1·1
Port Trusts	163.000	·8
Paper mills	166,000	·8
Consumption at collieries and wastage	2,487,000	12·0
Other forms of industrial and domestic consumption†	4,960,000	24·0
TOTAL	20,702,000	100

Consumption on railways.—Table No. 41 shows the total quantity of Indian and foreign coal and of wood and oil fuel consumed on all the railways in India during the last twenty-nine years, according to statistics obtained from the Railway Board. At the beginning of this period (1890) the total consumption of coal was about 858,000 tons, of which foreign coal constituted nearly one-fourth. Ten years later (1899) the total consumption was 1⅔ million tons, and Indian coal represented nearly 95 per cent, thus marking a rapid and vigorous displacement of foreign coal. In 1918-19 the total consumption was about 6 million tons and practically the whole quantity was Indian coal, as compared with 5 million tons in the pre-war year of 1913-14. The railway consumption of Indian coal averaged 33 per cent of the total quantity of coal produced in India in the ten years ending 1899, 30 per cent in the ten years ending 1909, 31 per cent in the eight years ending 1917-18, and 28 per cent in 1918-19.* The consumption of wood as fuel on railways decreased almost steadily from 1904 to 1914-15 ; since then there has been a gradual increase. In 1918-19, the quantity used was 335,000 tons as compared with 243,000 tons in 1917-18. This amount may be regarded as equivalent to 134,000 tons of coal, reckoning 2½ tons of wood as equivalent to 1 ton of coal. Wood is used largely on the South Indian, the Burma, the Madras and Southern Mahratta, the North-Western, and the Bombay, Baroda and Central India Railways. Besides coal and wood, 48,000 tons of oil fuel were used on Indian Railways in 1918-19 ; this is equivalent to 87,300 tons of coal reckoning ·55 ton of oil fuel as equal to 1 ton of coal.

Consumption on Admiralty and Royal Indian Marine Shipping Accounts.—Figures have been supplied by the Coal Transportation Officer. The consumption in 1918 was 1,358,000 tons.

Bunker coal.‡—Statistics relating to the shipment of bunker coal have been obtained from the different Custom Houses. The total shipments in 1918 amounted to 1,180,000 tons. The details are :—Calcutta 378,000 tons, Bombay and Karachi 697,000 tons,§ Madras 36,000 tons, and Rangoon 69,000 tons.

Cotton and jute mills.—In the case of cotton mills, only 68 out of 265 mills have sent in reports. In the case of mills which have furnished no returns, estimates have been made on the basis of the number of looms and spindles at work. In the case of jute mills, data have been furnished by the Indian Jute Mills Association.

(*a*) For the official year 1918-19

† Domestic consumption in Calcutta and its neighbourhood was estimated by the Coal Controller at 200,000 tons per year

* The percentages for the last ten years are :—

Year	1909	1910	1911	1912	1913-14	1914-15	1915-16	1916-17	1917-18	1918-19
Percentage	31	32	33	31	29	30	30	32	31	·28

‡ Bunker coal is not included in the figures of export

§ Excluding about 404,000 tons of coal supplied to vessels carrying cargo coal for the Admiralty and the Royal Indian Marine

Iron and brass foundries (including engineering workshops).—The total reported figure comes to 943,000 tons. In the case of foundries which have not furnished returns, estimates have been made on the basis of the number of persons employed.

Port Trusts.—Statistics of consumption in the workshops, ferry steamers, etc., at the principal ports have been supplied by the different Port authorities.

Inland steamers.—The total reported figure comes to about 481,000 tons a year; there are some smaller companies which have not furnished returns and whose consumption has been estimated on the basis of the census figures of the preceding year.

Brick and tile manufacture.—On the basis of the census figures of the last two years, it is estimated that 2 to 3 per cent of the total amount of raisings is used in the brick and tile industry.

Tea gardens.—Estimates have been framed on the basis of data furnished by most of the important tea companies. On many tea estates wood is the only or chief fuel used.

Paper mills.—The consumption in 1918 is estimated at 166,000 tons on the basis of reports furnished by the millowners.

Consumption at collieries and wastage.—Twelve per cent of the total production has been taken for consumption at collieries and wastage.

Other forms of industrial and domestic consumption.—A large part of the balance of 5 million tons must also be debited to industrial consumption and only a small part to domestic consumption; for, besides the important classes of industries mentioned above, there are numerous other classes of establishments and factories which are worked by steam, the principal amongst which are, cotton gins and presses, jute presses, flour and rice mills, dockyards, oil mills, water works, electric supply works, tramway works, gold mines, sugar factories, gas works, lime works, breweries and distilleries, petroleum refineries, ice, mineral and ærated water factories, mints, municipal workshops, stone works, woollen mills, mining works (other than coal), chemical works, dye works, indigo and lac factories, glass works and rope works.

Capital employed

The growth of the coal-mining industry may be roughly gauged from the marginal table, showing the number of Joint Stock Coal Companies and their total paid-up capital. The total amount of capital employed in the coal-mining industry cannot be stated, as reports relating to capital are received only from Joint Stock Companies, and the capital employed by private individuals and syndicates is not known. There were 184 Joint Stock Coal Companies at work in Bengal and Bihar and Orissa on the 31st March, 1919. Collieries worked by Joint Stock Companies accounted for 73 per cent of the total output of the Bengal and Bihar and Orissa coal-fields in 1918. Outside Bengal and Bihar and Orissa, there were only 8 Joint Stock Companies at work during the year. Seven of the Coal Companies at work on the 31st March, 1919, have a paid-up capital (exclusive of debentures) of ₹15,00,000 (£100,000) or more, as shown in the margin. There are twenty-four others, each of which has a paid-up capital of ₹7,50,000 (£50,000) or above but less than ₹15,00,000 (£100,000).

	Number	₹ (lakhs)

„ Saltore Coal Company	15,00,000

India and Japan

The production, imports, exports, and the balance left for consumption of coal in India and Japan from 1891, are compared in table No. 42. In the first quinquennial period, the production of coal in Japan averaged about a million tons more than that of India. Since then the production of Japan has gone ahead, and, in 1918, it exceeded that of India by 6,856,000 tons. As regards the foreign import trade, India, as already noted, diminished her imports from abroad steadily till 1905 when a revival took place, but from 1915 the imports again declined (54,000 tons in 1918). Imports into Japan, under normal conditions, were inconsiderable in comparison with India until 1908; since then there has been a steady increase, and the imports in 1918 were 755,000 tons. Production in Japan has always exceeded the requirements of her internal consumption, leaving a considerable surplus for export; whereas, India has little to spare after meeting her own requirements; the net exports from Japan in 1918 amounted to nearly 1½ million tons, as compared with only 20,000 tons from India. The quantity left for internal consumption was about the same (nearly 11 million tons) in both the countries in 1907. In 1908 India retained about two-thirds of a million tons more than did Japan, but from 1909 the quantity retained for consumption in Japan has always exceeded that in India, the excess in 1918 amounting to about 5½ million tons. The marginal table shows the estimated internal consumption of coal in Japan in the years 1916 and 1917. These figures may be compared with the estimates of the consumption of coal in India given on page xiii. From this comparison it will be seen that the consumption of coal on railways in India is nearly two-and-half times that in Japan.

	1916 tons	1917 tons
Railways	1,961,423	2,361,302
Production of salt	824,902	766,611
Factories	10,258,517	12,035,540
Ships	5,235,691	5,216,796
Other forms of consumption (*c*)	1,832,000	3,491,000

British Empire and Foreign countries

Table No. 43 gives comparative statistics of the average value of coal in the coal-mining industry in the different parts of the British Empire and in the principal foreign countries for a series of years so far as available.

(*a*) The Company was registered in the United Kingdom
(*b*) The Company is also engaged in gold, diamond, etc., mining operations
(*c*) Rough estimates

JOINT STOCK COMPANIES

[For Tables, see pages 95 to 119]

Source of statistics

The statistics are compiled from reports and returns prepared by the Registrars of Joint Stock Companies in British provinces under the Indian Companies Act, IV of 1882 (repealed by Act VII of 1913, which came into force on the 1st April, 1914), the Indian Life Assurance Companies Act, VI of 1912, and the Provident Insurance Societies Act, V of 1912, in the State of Mysore under the Mysore Companies Regulation, III of 1895 (repealed by Regulation VIII of 1917).

Main features of the year

The number of newly registered companies (both public and private) increased in the year under review by 5 per cent, as compared with the preceding year, but the authorised capital of new companies decreased from R32,21 lakhs to R21,28 lakhs, or by 34 per cent, and the paid-up capital from R29 lakhs to R25 lakhs or by 14 per cent. As will be seen from the marginal table, company flotation was still on a smaller scale than in the pre-war year. The number of private companies registered in 1918-19 was 113, as against 85 in 1917-18. The companies (both private and public) that were formed were as follows :—

	Companies registered Number	Authorised capital R(1,000)	Paid-up Capital R(1,000)
1913-14 (pre-war year).	356	66,91,53	76,94
1914-15 . . .	112	4,43,19	28,24
1915-16 . . .	131	7,20,49	66,82
1916-17 . . .	184	17,25,90	99,59
1917-18 . . .	276	32,20,55	28,79
1918-19 . . .	290	21,27,55	24,67

Class of Companies	Capital (authorised)		
	1913-14 (Pre-war year)	1917-18	1918-19
	R(1,000)	R(1,000)	R(1,000)
Banking and Loan	6,26,14	12,50,75	47,39
Insurance	1,11,55	50,00	40,20
Navigation	85,20	9,00	4,50,00

Other Planting Companies	6,30	9,98	10,85
Coal Mining	16,95	66,50	97,25
Other Mining and Quarrying Companies . . .	49,50	2,33,50	86,25
Land and Building	7,00	1,01,60	6,95
Other Companies	16,78	1,74,64	50,78
Total .	66,91,53	32,20,55	21,27,55

In the year under review (1918-19), 165 companies ceased to do business, as against 118 in the preceding year.

Companies limited by shares incorporated in India

The total number of companies limited by shares, which have been incorporated in India up to 1918-19 under the laws relating to the registration of companies, is 7,883. Of these, 2,789 companies were working at the end of the year 1918-19, most of the remainder having been either wound up, or otherwise discontinued or never having commenced business, so that over 64 per cent of the companies registered have ceased working. Some companies were before the war taken off the Indian register to be reconstructed as companies under the English law with their head offices in London, while, after the outbreak of war, some companies incorporated in the United Kingdom were taken off the English register and reconstructed as companies under the Indian Act. All the companies registered in India have a rupee capital. The number of all companies at work and the capital invested in them stood as follows at the end of each of the last three years :—

	1916-17	1917-18	1918-19
Companies (Number)	2,513	2,668	2,789
Authorised capital (R1,000)	2,00,04,22	2,34,18,85	2,55,09,50
Paid-up capital (R1,000)	90,89,56	99,11,21	1,06,61,45

There was thus an increase in the year of 121 in the number of companies, as against the previous year, or an increase of about 5 per cent, of R20,90,65,000 in the authorised capital, or an increase of about 9 per cent, and an increase of R7,50,24,000 in the paid-up capital, or 7·6 per cent.

Changes during the year

The changes in the year, which produced the results shown above, were :—

(1) 165 companies, with an authorised capital of R6,83,43,000 and a paid-up capital of R1,48,97,000 ceased to do business ; the registration of 4 companies with an authorised capital of R2,25,000 and a paid-up capital of R16,000 was declared as void for want of a licence under the Indian Companies Restriction Act, 1918, and one company with an authorised and paid-up capital of R3,37,50,000 was taken off the Indian register ;

(2) 290 new companies, with an authorised capital of R21,27,55,000 and a paid-up capital of R24,67,000 were registered during the year; and one company with an authorised capital of R7,00,000 and a paid-up capital of R4,20,000 revived under order of the court;

(3) the authorised capital of 50 companies was increased by R10,73,19,000, while that of six companies was reduced by R93,91,000;

(4) the paid-up capital of 709 companies was increased by R12,47,41,000, while that of 60 companies was reduced by R39,41,000.

Distribution according to provinces

The following statement shows the number of companies at work, and the amount of paid-up capital, in each of the provinces at the end of the last two years :—

Province	Number of Companies		Paid-up Capital		Increase+ or decrease — per cent in capital in 1918-19	Provincial proportion of paid-up capital to total paid-up capital in 1918-19
	1917-18	1918-19	1917-18	1918-19		
			R(1,000)	R(1,000)	per cent	per cent
Bengal	1,176	1,264	42,95,18	43,24,98	+·6	40·6
Bombay	569	561	34,38,37	39,72,40	+15·5	37·3
Madras	356	372	6,36,90	6,63,27	+4·1	6·2
United Provinces	143	144	4,93,97	5,02,11	+1·6	4·7
Burma	113	126	5,71,89	6,58,05	+15·0	6·2
Punjab	83	76	2,61,97	3,16,52	+20·0	3·0
Delhi	16	17	53,32	56,45	+5·9	·53
Assam	58	69	27,38	32,72	+19·5	·3
Bihar and Orissa	33	33	15,26	15,32	+·4	·1
Central Provinces and Berar	25	26	38,46	40,50	+5·4	·4
Ajmer-Merwara	13	14	17,84	17,64	—1·1	·1
Bangalore (Civil and Military Station)	9	9	7,44	8,07	+8·4	·07
North-West Frontier Province	2	1	2,32	48	—79·0	..
Coorg	1	1	24	24	..	..
Mysore State	71	76	50,67	52,70	+4·0	·5
Total	2,668	2,789	99,11,21	1,06,61,45	+7·6	100

The total net increase in paid-up capital was R7,50,24,000; Bengal accounting for R29,80,000; Bombay R5,34,03,000; and Madras R26,37,000. Bengal and Bombay between them have 78 per cent of the whole paid-up capital of joint stock companies in British India and Mysore.

Average capital per company

The number of companies registered in Bengal is over two-fifths of the total number registered throughout India, but the average paid-up capital per company is highest in Bombay. In this respect Burma occupies the second place and the Punjab the third, as will be seen from the subjoined table showing the average paid-up capital of a company in each province in the last two years :—

	Average Capital of a Company	
	1917-18	1918-19
	R	R
Bombay	6,04,000	7,08,000
Burma	5,06,000	5,22,000
Punjab	3,16,000	4,16,000
United Provinces	3,45,000	3,49,000
Bengal	3,65,000	3,42,000
Delhi	3,33,000	3,32,000
Madras	1,79,000	1,78,000
Central Provinces and Berar	1,54,000	1,56,000
Ajmer-Merwara	1,37,000	1,26,000
Bangalore (Civil and Military Station)	83,000	90,000
Mysore State	71,000	69,000
North-West Frontier Province	1,16,000	48,000
Assam	47,000	47,000
Bihar and Orissa	46,000	46,000
Coorg	24,000	24,000

The comparatively low place of Madras in respect of the average capital, in spite of its occupying the third place in respect of the number of companies, is to be found in the extremely large application of the Companies

Act to the business of small money-lending societies (*nidhis*). No less than 196 out of the 493 " banking and loan " companies in all India have been registered in Madras, with a paid-up capital of R2,21,70,000, or R1,13,000 per company.

The statement below shows the distribution of the aggregate capital in the principal classes of joint stock enterprise at the end of 1918-19, as compared with that at the end of the preceding year :— Classification of companies

Class of Companies	Number		Authorised Capital		Paid-up Capital	
	1917-18	1918-19	1917-18	1918-19	1917-18	1918-19
			R(1,000)	R(1,000)	R(1,000)	R(1,000)
Banking and loan	485	493	71,90,09	65,57,94	10,19,49	8,45,38
Insurance	121	97	16,44,01	16,67,71	51,59	56,32
Navigation	23	23	4,34,90	8,83,90	1,44,45	1,49,86
Railways and tramways	56	55	16,14,40	16,13,40	13,18,64	13,46,81
Other trading companies	805	879	35,36,27	43,96,32	15,13,08	19,75,68
Cotton mills	192	192	22,67,62	25,96,12	17,07,86	18,00,78
Jute mills	45	43	13,72,71	13,69,46	10,31,66	10,52,75
Mills for wool, silk, hemp, etc.	16	14	3,70,75	3,68,75	2,38,62	2,37,66
Cotton and jute screws and presses	129	129	3,71,83	3,79,10	2,66,11	2,68,47
Rice mills	24	20	1,33,72	2,17,36	80,01	77,76
Flour mills	28	27	1,09,75	1,03,75	75,50	74,52
Other mills and presses	44	50	3,98,31	4,30,08	1,31,67	1,59,09
Tea planting	286	314	8,99,37	9,78,07	5,42,39	6,26,30
Other planting companies	39	42	1,55,39	1,46,14	63,25	79,59
Coal mining	168	187	9,03,55	9,82,37	6,75,71	7,16,76
Gold mining	8	6	36,58	24,57	24,81	17,73
Other mining and quarrying companies	64	77	10,91,23	18,84,86	5,42,41	6,16,27
Land and building	43	42	5,28,56	4,33,13	3,35,07	3,54,49
Sugar manufacture	18	20	1,14,38	1,59,88	88,55	88,00
Other companies	74	79	2,45,43	3,16,56	60,34	1,17,23
Total	2,668	2,789	2,34,18,85	2,55,09,50	99,11,21	1,06,61,45

The total amount of paid-up capital invested in banking, loan, and insurance companies is R9,01,71,000, of which 25 per cent is in companies registered in the Madras Presidency and 23 per cent each in the Bombay Presidency and in the Punjab. There is a striking contrast between the authorised and the paid-up capital of insurance companies. Most of these are the so-called provident or mutual aid societies registered in Bengal, where no less than 65 out of the 97 insurance companies are registered. Banking, loan, and insurance

Trading companies account for a paid-up capital of R34,72,35,000, of which R13,46,81,000, or about 39 per cent, is invested in railways and tramways. Bombay represents about R6,91,74,000 or 51 per cent of the total capital invested in railways and tramways and Bengal R6,41,69,000 or 47 per cent. Trading

Over one-third (R36,71,03,000) of the aggregate paid-up capital is invested in mills and presses, chiefly for working or pressing cotton, jute, wool, and silk. A great number of the mills and presses are registered in Bombay which represents nearly 46 per cent (R16,81,91,000) of the total, most of it being invested in cotton mills and presses. Mills and presses (mainly jute) registered in Bengal represent about four-fifths (R13,04,69,000) of the capital invested in mills and presses in Bombay. Mills and presses

In tea, coffee, and other plantations, R7,05,90,000 of paid-up capital are invested, and of this amount R6,01,37,000 are held in Bengal, the majority of the tea companies owning gardens in north-eastern India being registered in Calcutta. Planting

The capital of mining and quarrying companies is R13,50,76,000, of which about 56 per cent (R7,53,92,000) is invested in companies registered in Bengal. Most of it represents capital invested in coal mines. Mining and quarrying

In the year under review there was a substantial increase in the paid-up capital allotted to the manufacture of cotton, and to tea planting and coal mining. The increase in the capital invested in insurance, navigation, jute manufacture, railways and tramways, was also considerable. In banking and loan, in rice, flour, silk, and woollen mills, sugar mauufacture, and gold mining there was a decrease. In most other directions, it may be noted, there has been an augmentation of capital. Summary

As stated above, 290 new companies were registered during the year 1918-19, with an authorised capital of R21,27,55,000 and a paid-up capital of R24,67,000, as compared with 276 companies with an authorised capital of R32,20,55,000 and a paid-up capital of R28,79,000 registered in 1917-18. The following statement gives a classification of the new companies registered in 1917-18 and 1918-19 according to the amount of their authorised capital :— New registration

Grades of new companies according to capital

Authorised Capital	Number of Companies 1917-18	1918-19
Under R1,000	1	1
R 1,000 and under R 5,000	1	1
R 5,000 „ „ R 10,000	2	3
R 10,000 „ „ R 20,000	10	3
R 20,000 „ „ R 50,000	40	36
R 50,000 „ „ R 1,00,000	23	33
R 1,00,000 „ „ R 2,00,000	58	82
R 2,00,000 „ „ R 3,00,000	42	18
R 3,00,000 „ „ R 4,00,000	16	23
R 4,00,000 „ „ R 5,00,000	7	10
R 5,00,000 „ „ R 7,50,000	26	32
R 7,50,000 „ „ R 10,00,000	4	8
R 10,00,000 and above	46	40
	276	290

From the above it will be seen that a representative company is that which has an authorised capital of about R1,50,000.

Debenture capital

It should be noted that the capital dealt with in the foregoing paragraphs represents share capital only, while several companies have issued debentures, the total value of which at the close of the half-year ending June, 1919, amounted to R12,55,61,000, of which R6,24,81,000 belong to Bengal, R5,04,61,000 to Bombay, R18,38,000 to the United Provinces, R31,91,000 to Madras, and R75,55,000 to the Punjab. The value of cotton mill debentures amounted to R3,35,37,000, of jute mill debentures R3,42,90,000, and of paper mill debentures R22,00,000.

Companies limited by guarantee and associations not for profit

At the close of the year 1917-18, there were 215 companies limited by guarantee, not having a share capital (including associations not for profit), incorporated in India under the Indian Companies Act. Of these, 4 ceased to work, 12 new companies were registered and one restored to the register during the year 1918-19, giving a total of 224 companies at work on the 31st March, 1919.

Companies incorporated outside India

Statistics have been collected, so far as possible, regarding companies which are incorporated elsewhere than in India, chiefly with sterling capital, but which carry on work in India. The total number of such companies working at the end of 1918-19 for which returns are available is 597, and the paid-up capital thereof amounts to £477,108,000, besides £141,346,000 being the amount issued as debentures. Railways represent £68,860,000 of the paid-up capital and £69,375,000 of the debentures. Of the remainder, the sterling share capital invested in the tea industry is £18,126,000 and in jute mills £1,994,000. The gold fields in Southern India are chiefly worked by companies formed in the United Kingdom, the paid-up sterling capital being £2,106,000. It should, however, be borne in mind that in the case of most of the banking and insurance companies and of some of the navigation and other trading companies incorporated outside India, only a portion, sometimes a very small portion, of the capital shown above is invested in India, as these companies work also in other countries besides India, and information regarding the portion of their capital invested in India is not obtainable.

Fees collected

The amount of fees, for both registration and copying, realised by the provincial Registrars of Joint Stock Companies in connection with the registration of companies in the year under review amounted to R1,21,223, as compared with R1,22,796 in the preceding year.

PATENTS AND DESIGNS

[For Table, see page 120]

The laws for granting exclusive privileges to inventors and for protecting patterns and designs were amended and consolidated by the passing of the Inventions and Designs Act, V of 1888. This Act has since been repealed by the Indian Patents and Designs Act, II of 1911, which came into force on the 1st January, 1912, but certain applications made under the repealed Act of 1888, which were pending at the close of 1911, were disposed of in 1912. The year 1912 was, therefore, one of transition during which two methods of procedure were in force, so that the figures and details from that year are not strictly comparable with those of earlier years. The statistics presented in this table summarise the working of the law for the last ten years.

Patents

The inventions for the use of which exclusive privileges have been sought or acquired during recent years relate in the main, so far as the subjects are enumerated, to bicycles and similar vehicles, the manufacture of tea, railway material, lamps and burners, the treatment of metals, electrical contrivances, spinning and weaving machines, water-lifts and pumps, sugarcane and other mills, chemical appliances and preparations, improvement in building and building materials, flying machines, and talking machines. The number of applications made in 1918, under section 3 of the Indian Patents and Designs Act of 1911 for the grant of a patent, was 644. In the year 1913 before the war, the number of applications for patents was 705. It fell to 442 in 1916. In 1917 a revival set in and the figure rose to 602 which further increased to 644 in 1918.

Of the 644 applications for the grant of a patent presented during 1918, 411 were accepted and 233 were pending. Of the applications 232 were made by residents in India, of whom 77 were Indians and 155 other residents. The remaining 412 came from outside India.

The number of patents in force on 31st December, 1918, was 2,446. These include 1,879 patents out of 2,896 sealed on 4,104 applications under the Act of 1911, together with 43 of the 148 patents converted under section 81 of that Act. The balance 524 consists of exclusive privileges remaining under the Act of 1888.

Designs

The number of applications for registering copyright in designs during the year shows further decrease—there were 1,411 in 1918 as compared with 1,591 in 1917, and 1,773 in 1916. Of the 1,411 applications made, 1,398 were registered, only 53 of them being from residents in India. The total number of applications received since the Act of 1888, stood at 9,149 at the end of 1918.

The income increased from the record figure of R90,846 in 1917 to R95,166 in 1918. Of the total receipts the sum of R72,150 represented continuance fees, by payment of which existing privileges are kept in force.

FOREIGN TRADE AND SHIPPING

[FOR TABLES, SEE PAGES 121 TO 156]

These tables, which include imports and exports on account of Government, exhibit, for various periods extending in many cases back to 1834-35, the progress of the foreign sea-borne trade of India generally, and of each province separately, in the principal articles of trade, and with the principal foreign countries, also the progress of shipping. They thus supplement the annual accounts of the foreign trade which exhibit the progress of the trade for only five years.

Progress of foreign sea-borne trade

The following statement shows the variations in the imports and exports (including re-exports) from 1885-86 given in table No. 52, the annual average trade of the ten years 1904-05 to 1913-14 (*i.e.*, the decennium preceding the outbreak of war) being taken as 100 :—

	Imports			Exports, including re-exports		
	Merchandise	Treasure	Total	Merchandise	Treasure	Total
1885-86 to 1894-95 .	50	37	47	51	36	50
1895-96 to 1904-05 .	61	56	60	62	108	64
1905-06 . .	83	76	81	83	170	87
1906-07 . .	86	107	91	91	63	90
1907-08 . .	101	101	101	91	60	90
1908-09 . .	95	55	85	79	69	78
1909-10 . . .	90	90	90	96	70	95
1910-11 . .	98	95	98	108	78	106
1911-12 . .	106	128	111	117	114	117
1912-13 . .	123	148	129	126	117	126
1913-14 . .	141	104	132	128	78	126
1914-15 . .	107	52	94	93	58	92
1915-16 . .	102	29	85	102	90	102
1916-17 . .	118	92	112	127	70	124
1917-18 . .	121	124	122	125	83	124
1918-19 . .	139	171	146	131	99	130

A full report of the trade of each year will be found in the *Review of the Trade of India* which has been published annually for the past forty-five years.

The statement below shows the details of the total sea-borne trade, both private and Government, during the five years ending 1918-19 :

	1914-15	1915-16	1916-17	1917-18	1918-19
	Rupees (000 omitted)	Rupees (000 omitted)	Rupees (000 omitted)	Rupees (000 omitted)	Rupees (000 omitted)
Imports of Merchandise	144,93,07	138,16,93	160,24,90	164,35,49	188,56,24
„ Treasure	21,80,83	11,94,62	38,45,27	51,76,43	71,36,55
TOTAL IMPORTS .	166,73,90	150,11,55	198,70,17	216,11,92	259,92,79
Exports of Merchandise	182,17,60	199,56,24	247,36,48	244,90,39	255,32,03
„ Treasure	5,28,95	8,22,58	6,41,72	7,54,39	9,01,03
TOTAL EXPORTS .	187,46,55	207,78,82	253,78,20	252,44,78	264,33,06
TOTAL SEA-BORNE TRADE .	354,20,45	357,90,37	452,48,37	468,56,70	524,25,85
Net Imports of Treasure	16,51,88	3,72,04	32,03,55	44,22,04	62,35,52
Net Exports of Merchandise	37,24,53	61,39,31	87,11,58	80,54,90	66,75,79
Excess of Exports over Imports	20,72,65	57,67,27	55,08,03	36,32,86	4,40,27

The imports of merchandise rose by R24 crores to over R188 crores, while the total exports, including re-exports, increased by R10 crores to R255 crores. The ratio of increase or decrease is shown below, by taking the figures for 1918-19 as equal to 100 :

	1914-15	1915-16	1916-17	1917-18	1918-19
Exports of merchandise	71·3	78·1	97	96	100
Imports ,, ,,	76·9	73·3	85·0	87·2	100
Total	73·7	76·1	91·8	92·2	100

There were noticeable increases in the value of the imports from Japan (+R15·25 crores), and from the United States (+R4·34 crores); while the re-exports from the United Kingdom showed a decrease of R2·89 crores. Bombay and Sind shared the largest increase of R14·04 crores, and Bengal came next with R7·79 crores.

The principal articles showing marked variations are shown in the table below :

		Quantity (000 omitted)		Value (000 omitted)		Increase+or Decrease— per cent compared with 1917-18	
		1917-18	1918-19	1917-18	1918-19	Quantity	Value

Articles imported by post		—	—	3,08,87	4,96,35	—	+60·7

Under exports, the United Kingdom accounted for an increase of R10 crores, and the United States of America of R3 crores, Arabia and Persia of R4 crores, while the exports to Germany were *nil* as in the preceding year. The share of Bengal in the export trade advanced by R19 crores, of Madras by R3 crores and

of Burma by R4 crores, while Bombay and Sind fell by R15 crores. The principal articles which showed marked variation are shown in the appended table :

	Quantity (000 omitted)		Value (000 omitted)		Increase + or Decrease — per cent compared with 1917-18

The trade of the principal ports of India is detailed in table No. 66. Bombay shows an increase of R8·2 crores, Calcutta of R23·3 crores, Madras of R2·7 crores, and Rangoon of R3·9 crores. While Karachi shows a decrease of R10·2 crores. Trade of port

In 1918-19 the imports of treasure increased by R19·6 crores, gold showing a decrease of R26·8 crores but silver an increase of R46·4 crores. Exports of treasure increased by R1·5 crore, gold showing an increase of R3·9 crores while silver decreased by R2·4 crores. Treasure

A summary table of the imports and exports of gold and silver is given below :

	1914-15	1915-16	1916-17	1917-18	1918-19
	R (000 omitted)	R (000 omitted)	R (000 omitted)	R (000 omitted)	R (000 omitted)
Imports of gold	10,70,38	5,28,17	13,33,79	29,09,49	2,27,63
Exports of gold	3,05,64	6,39,08	10,25	3,91,63	7,84,01

Shipping

The number and tonnage of steamers and sailing vessels with cargoes and in ballast which entered from and cleared to all countries during 1918-19 were 9,504 and 10·54 million tons, as detailed below, as compared with the previous four years :—

		1914-15	1915-16	1916-17	1917-18	1918-19
Entered	Vessels	3,937	4,212	4,968	5,190	4,644
	Tons (000 omitted)	6,313	6,038	5,885	5,250	5,252
Cleared	Vessels	4,023	4,422	5,418	5,960	4,860
	Tons (000 omitted)	6,545	6,114	6,070	5,618	5,285

In 1918-19 the number of vessels under the principal flags were British and British Indian 4,476, Japanese 626, Dutch 157, Norwegian 149, Chinese 142, Italian 90, American 52, Greek 43, Russian 41, French 40, Swedish 34, and native craft 3,599.

WRECKS

[FOR TABLE, SEE PAGE 157]

This table exhibits the number of British and British Indian vessels, and native craft which were totally lost in Indian waters (from Suez to Penang), the total tonnage of vessels wrecked, and the number of lives lost, in the past twenty-five years.

The number and tonnage of each class of vessels annually lost from 1877 and the proportion which the number and tonnage bear to the total number and tonnage of vessels that cleared from Indian ports, are approximately as follows :—

	BRITISH								BRITISH INDIAN				NATIVE CRAFT			
	STEAM				SAILING				SAILING							
	Number lost	Tonnage	Ratio borne to Total number	Ratio borne to Total tonnage	Number lost	Tonnage	Ratio borne to Total number	Ratio borne to Total tonnage	Number lost	Tonnage	Ratio borne to Total number	Ratio borne to Total tonnage	Number lost	Tonnage	Ratio borne to Total number	Ratio borne to Total tonnage

73 vessels were totally lost in 1918, of which 4 were British, 58 British Indian, and 11 native craft, excluding one vessel of foreign nationality. There were 21 founderings, 44 strandings, 2 collisions, and 6 miscellaneous cases amongst the wrecks. In a total of 73 wrecks, 71 lives were reported to have been lost during the year.

The causes of exceptional loss of life in certain years are stated below—

1876. 400 pilgrims perished in the *Hydari*, bound from Calcutta to Jeddah.

1879. Continuous bad weather, and a cyclone, on the west coast of India in May.

1885. The *Speke Hall* foundered (58 lives lost) in the Gulf of Aden; and three vessels were wrecked (239 lives lost) in cyclones in the Bay of Bengal and on the east coast of Arabia.

1887. The *Sir John Lawrence* foundered (750 lives lost) at the mouth of the Hooghly in a cyclone.

1888. The *Vitarna* (800 lives lost) wrecked off the Káthiawár coast in a cyclone.

1891. Four vessels were wrecked in a cyclone in the Bay of Bengal.

1892. The *Deccan* foundered (214 lives lost) in the Indian Ocean.

1896. The *Luna* was wrecked (75 lives lost) in the Gulf of Aden.

1902. The *Camorta* was wrecked (781 lives lost) on the Burma Coast.

1905. The *Hashemi* foundered (74 lives lost) off the south Orissa coast in a cyclone.

1911. The *Fifeshire* was wrecked (24 lives lost) in the Gulf of Aden.

1912. The *Chinho* foundered (100 lives lost) in the Hlaing river near Tantabin (Burma).

1913. Two vessels (*Aungzeya* and *Mombai Salamat*) capsized, the former near Onbinzeik, Attaran river (Burma), and the latter in the Gulf of Cambay, the total number of lives lost being 83.

1916. The *Pobha* foundered (38 lives lost) in the Brahmaputra river above Barsolaghat, Assam.

1917. The *Jumna* and the *Mongolia* foundered, the former off Perim in the Red Sea (29 lives lost), and the latter as the result of striking a mine off the Bombay coast (25 lives lost). Four other steamers struck mines with the loss of 23 lives.

1918. The *Kum Chow* left Rangoon on the 4th December 1918 with a cargo consisting chiefly of timber, pig lead, and sleepers for Basra *viâ* Colombo and Bombay, but was never heard of. It is presumed that she encountered cyclonic weather and foundered somewhere in the Bay of Bengal with all hands numbering 56.

MERCHANDISE MARKS

[FOR TABLE, SEE PAGE 158]

The Indian Merchandise Marks Act (IV of 1889) was passed in 1889, but its operation in the earlier years was restricted, especially in Calcutta, in consequence of the lack of adequate Customs machinery for the examination of goods. In 1894, with the introduction of the present tariff, the Customs staff was strengthened for the examination of goods for assessment to duty, and this increase enabled examination to be made at the same time for purposes of the Merchandise Marks Act.

The Act was intended originally to prevent the fraudulent sale of goods bearing false trade marks or false trade descriptions (as of origin, quality, weight, or quantity). While the Act was before the Legislature, a provision was added to require that all piece goods should be stamped with their length in yards. In this respect these goods are an exception, for the Act does not require that other descriptions of goods should be stamped or marked, though it requires that when goods are marked the marks must be a correct description.

In 1918-19 the total number of infringements of the Act were 3,212, as against 2,810 in 1917-18. Of this Bengal reported 745, Bombay 1,832, Burma 219, Madras 226 and Sind 190 cases. The increase was chiefly in Bengal. The majority of the infringements (2,213 out of 3,212) were cases of false trade description as to the country of origin. In many of these cases it was reported that " goods not manufactured in the United Kingdom or British India bore names of British Indian dealers or were described in such a manner as to suggest British or British Indian origin," or "goods bore description either in English or in Indian languages without any counter-indication of origin" or "goods made in one foreign country bore descriptions suggestive of origin in another foreign country." Usually detained goods are released with a fine. In 1918-19, however, this procedure was followed in 2,061 cases; and in 1,146 cases the detained goods were released without the infliction of a fine, but with a warning to the importers or with orders insisting on the correction of the offending marks. Detention is but rarely followed by confiscation, and there were only 5 such cases during 1918-19.

The average number of detentions under the Act during the twenty years ending 1918-19 has been as stated in the margin. In this period of twenty years, 31 per cent of the detentions was on account of the application of counterfeit trade marks or false trade descriptions. In 50 per cent of the cases, detention was ordered because the country of origin was either not stated or was falsely stated, and in 19 per cent because the provisions of the Act for the stamping of piece goods had been infringed.

Average of the five years ending	1903-04	1,304

POST OFFICE

[FOR TABLES, SEE PAGES 159 to 192]

The main business of the post office is the conveyance and delivery of letters, postcards, newspapers, parcels and book-packets. The total length of mail lines over which its work is carried on is 157,399 miles. Railway and steamer services now extend over 53,674 miles of this length, and the other 103,725 miles are worked by boats, mail-carts, horses, camels, motors and runners. Many carriage and cart lines are, however, subsidised for the carriage of mails. The number of post offices is 19,445, of letter-boxes 49,838 (excluding those at post offices), and of village postmen 8,295. The actual number of registered articles of the letter mail and of parcels posted, added to the estimated number of unregistered articles of the letter mail given out for delivery, in 1918-19 amounted to more than 1,194 millions. Letters and other articles carried

In 1899 the Indian Post Office joined the International Parcel Post Union; and parcels are now exchanged by post between India and almost every country in the world. International Parcel post

In 1877 the post office undertook to collect from the addressee the declared value of a parcel or registered article and to transmit the money to the sender. The extent to which this system has been used by traders and their customers is indicated by the fact that in 1918-19—that is 41 years after its introduction—the number of value-payable articles carried was over 10 millions and the value declared for realisation amounted to nearly 16½ crores. Value-payable parcels

In December, 1898, the limit to the sum for which an article could be insured was raised for registered letters and value-payable registered letters and registered parcels to R2,000, and the procedure in connection with the insurance of articles was simplified, the sender of an insured article being no longer required to declare its contents. The insurance fee was at first fixed at one-half per cent, but shortly afterwards it was reduced to one-quarter per cent, and in July, 1905, it was further reduced to one-eighth per cent. The gross sum for which articles were insured by the post office in 1918-19 was about R113 crores. Insurance of letters and parcels

In 1880 the Government of India transferred from the treasuries to the post office the business of the issue and payment of money orders, with the result that within a few months the number of orders issued was quadrupled. The value of inland money orders issued has increased from R4,57 lakhs in 1880-81 to R70,48 lakhs in 1918-19. Special arrangements have been made to adapt the money order system to remittances of revenue, rent, and miscellaneous Government dues, and in several provinces the system is largely used for these purposes. The commission on inland money orders is 4 annas for each complete sum of R25, with lower rates of 1 anna, 2 annas, and 3 annas, respectively, for any sums or remainders not exceeding R5, R10, and R15. Foreign money orders are also exchanged with the principal countries of the world, the maximum limit of a rupee order being R600 and that of a sterling order £40, except in a few cases in which the maximum limit is £20. Money orders

British Postal orders

In 1884 the Indian Post Office undertook the sale of British postal orders. Such orders, ranging in value from 6*d.* to 21*s.*, can now be exchanged with the greater part of the British Empire and are also used for inland remittances.

Savings banks*

In 1870 Government savings banks were established in connection with district treasuries. In 1882 sanction was given for the opening of savings banks* at post offices, and three years later the closure of the treasury savings banks was ordered. In 1882-83 the number of depositors in the postal savings banks was 39,000 and the sum at their credit R27,97,000. By the end of 1918-19 the number of depositors was 1,677,000 and the sum at their credit amounted to R18,82,45,000. The post office undertakes on behalf of depositors the purchase and sale of Government promissory notes and the transfer of such notes to the Accountant-General, Posts and Telegraphs, for custody on behalf of the purchaser.

Cash certificates

With effect from 1st April 1917 Post Office 5-years Cash Certificates are being sold at all Post Offices at which Savings Bank business is transacted.

Postal telegrams

In 1883 many post offices were made receiving offices for the transmission of inland telegrams by post to the nearest telegraph office; and telegraph work was also undertaken by the post office in a certain number of offices. The number of telegraph offices has thus been largely increased, and out of 3,553 state (non-railway) telegraph offices on the 31st March, 1919, 3,368 were postal telegraph offices. In 1918-19 the number of messages transmitted by receiving offices was nearly 74,000 and the number of messages signalled by postal telegraph offices was 11,860,000 excluding free messages.

Postal life insurance

In 1884 sanction was given to a scheme of life insurance, whereby an officer of the postal service is enabled to obtain a policy for a sum not exceeding R4,000 on the security of Government. In 1888 the scheme was extended to the Telegraph Department. In February 1898 the scheme was extended generally to all Government servants, who are subject to civil rules, and a system of endowment assurances was added to the scheme. By the end of 1918-19, nearly 40,000 lives had been insured for the aggregate sum of R5,45 lakhs.

Payment of military pensioners

In 1890 the post office undertook the payment of military pensioners in the Punjab at the post offices nearest their homes. The number of pensioners thus paid in 1918-19 was about 83,000 and the aggregate sum paid to them R56,47,000.

Rates of postage, inland and foreign

Letters and postcards.—With effect from the 1st October, 1907, the weights of letters allowed for ½ anna and 1 anna were raised from ¾ to 1 tola and from 1½ to 10 tolas,† respectively. Embossed envelopes bearing a half anna coloured impressed stamp and sold at the face value of the stamp without any charge for the envelopes were introduced in 1873. Formerly an additional charge was made for re-direction, equal to the postage paid when the letter was posted, but the additional charge was discontinued in 1877. The introduction of the inland postcard in 1879 gave a still lower rate of postage than that given by the rate of half an anna per half tola with an envelope supplied without charge. The inland postcard has from its introduction been priced at one pice (three pies) per single card and half an anna per reply card, the price in each case covering the cost of the card as well as postage.

Newspapers and packets.—A new system of "registering" publications as newspapers was introduced in January, 1897, under which a "registered newspaper" of weight not exceeding twenty tolas is carried by the inland post for half an anna. From the 1st January, 1904, the maximum weight for a registered newspaper admissible for transmission through the post for one-quarter of an anna postage was raised from 4 to 6 tolas. This weight has been further raised, since the 1st October, 1908, from 6 to 8 tolas, concurrently with an increase from 20 to 40 tolas in the maximum weight admissible for half an anna postage.

The postage on packets other than newspapers was one anna for 10 tolas until 1877, when the rate was reduced to one anna per 10 tolas for book packets and two annas per 40 tolas for book packets and patterns. In 1878 the packet rate was lowered to half an anna per 10 tolas.

Parcels.—The present rates of postage, which came into force on the 1st October, 1907, and which are applicable to all classes of parcels, are (1) in the case of parcels not exceeding 440 tolas‡ in weight, 2 annas for every 40 tolas or part of that weight; and (2) in the case of parcels exceeding 440 tolas in weight, R3 for a parcel not exceeding 480 tolas in weight, and 4 annas for every additional 40 tolas.

Registration fees.—From the 1st July, 1901, the fee for the registration of a parcel was fixed at a uniform charge of 2 annas.

Official papers.—With effect from the 1st October, 1907, the postage rates for official letters, packets, and parcels are the ordinary rates for those articles.

Foreign postage.—The rates now are—for letters, 2½ annas for the first ounce and 1½ annas for every additional ounce; for postcards, single, 1 anna each; reply, 2 annas; for printed papers, half an anna per two ounces; for business papers entirely or partly in manuscript, 2½ annas for the first 10 ounces and half an anna for every 2 ounces additional; for samples, 1 anna for the first 4 ounces and half an anna for every 2 ounces additional. Since the 1st October, 1907, the rate for letters sent from British India to the United Kingdom and almost all British Possessions, as also to Egypt (including the Soudan), has been fixed at one anna§ for every ounce or fraction thereof.

* For detailed information regarding Post Office Savings Banks, see Vol. II of the Statistics of British India

† With effect from 1st January 1919, the weight of letters allowed for 1 anna was reduced from 10 tolas to 2½ tolas

‡ With effect from the 1st November 1918, the rate of postage on parcels exceeding 20 tolas but not exceeding 440 tolas in weight was raised to 4 annas for every 40 tolas or part of that weight. This rate was again reduced to 3 annas with effect from the 16th May 1919

§ From the 1st September 1918 this rate has been altered and the following revised rates have been introduced :—
For a letter not exceeding one ounce in weight—One and a half annas
For every additional ounce or parts of that weight—One anna

The statement below shows the annual subsidies paid under existing contracts for the carriage of mails by steamer on the Indian coasts and rivers and for the maintenance of communication with Ceylon, the Straits, and the Persian Gulf : Mail steamer subsidies

	TOTAL	12,15,582

For the lines of postal communication under contract with the Peninsular and Oriental Company an annual subsidy of £305,000 is paid by His Majesty's Government for the combined Eastern and Australian mail services. The Indian share of this subsidy has not yet been assessed.

TELEGRAPHS

[For Tables, see pages 193 to 196]

Inland tariff

On the 1st September, 1918, the rates for inland telegrams were increased to (1) express—one rupee and eight annas for 12 words and 2 annas for each additional word, and (2) ordinary—twelve annas for 12 words and 1 anna for each additional word, the address being charged for. On the 1st May, 1914, the rates for cablegrams between India and Europe were reduced from R1-8 per word *viâ* Indo or Eastern to R1-4 per word. A system of deferred telegrams in plain language at half the usual rates for private telegrams was introduced between the United Kingdom, Germany, France, Algeria, Tunis, Portugal, and the United States of America, with effect from the 1st January, 1912, and was subsequently extended to practically all European administrations, besides a number of administrations in the extra European régime. The rates between Australia on the one hand and India, Burma, and Ceylon on the other, were reduced to a uniform rate of R1-14 per word with effect from the 1st June, 1903.

Tariff between India and Europe, America, Australia, etc.

Tariff between India and Mesopotamia

With effect from the 1st December, 1915, a reduction of twelve annas a word was made in the rate for telegrams exchanged between India and Mesopotamia, and of two annas a word in the rates for telegrams between India on the one side and Persia and the Persian Gulf on the other. From the 15th December, 1915, a new rate of three annas a word was introduced for the exchange of press telegrams between India and Mesopotamia.*

Telegraph laws

Act XIII of 1885, as amended by Act XI of 1888 and Act VII of 1914, repealing all earlier Acts (the first being XXXIV of 1854), deals with the privileges and powers of Government in respect to telegraphs, their authority to grant licenses for the establishment of telegraphs, and the regulations under which telegraphs are to be worked. They also provide and regulate the powers of the Department to place telegraph lines and posts on public and private lands, and declare the penalties for infringements of licenses, and for all other offences connected with telegraph lines, and with the transmission of telegrams. Rules and regulations for the acceptance, transmission, and custody of telegrams are published from time to time in the *Gazette of India* by the Governor-General in Council, and have the force of law.

Progress of revenue and expenditure and of messages

The revenue and expenditure of the Department and the number of messages sent, during the five years ending 1918-19, are entered in the table below :—

	Revenue	Expenditure	Surplus + or Deficit —	NUMBER OF MESSAGES					
				Inland			Foreign		
				State	Private	Total	State	Private	Total
	R	R	R						
1914-15 . .	1,70,59,934	1,40,66,947	+29,92,987	1,732,490	13,186,529	14,919,019	35,688	1,235,659	1,271,347
1915-16 . .	1,85,78,406	1,42,20,653	+43,57,753	1,888,269	14,189,039	16,077,308	62,307	1,403,273	1,465,580
1916-17 . .	2,07,82,482	1,36,74,010	+71,08,472	1,877,832	15,126,819	17,004,651	84,088	1.631,097	1,715,185
1917-18 . .	2,46,85,087	1,27.30,656	+1,19,54,431	1,988,370	15,159,860	17,148,230	110.576	1,878,249	1,988,825
1918-19 . .	3,23,60,223	1,47,12,321	+1,76,47,902	2,119,434	16,032,665	18,152,099	139,018	2,036,951	2,175,969

The total receipts of the Telegraph Department in 1918-19 amounted to R3,24 lakhs and the working revenue charges to R1,47 lakhs, as against R2,47 lakhs and R1,27 lakhs, respectively, in the preceding year. Thus the gross revenue increased by 31·1 per cent, and the expenditure by 15·6 per cent. The surplus amounted to R176½ lakhs as against R119½ lakhs in 1917-18. The increase in revenue is due to the rise in the telegraph rates which had effect from 1st September 1918, the extended use by the public of foreign fully paid cables due to the uncertainty of the mail service, and the delays to deferred traffic, the conditions of trade which were brisk throughout the greater portion of the year and which resulted in heavy commercial traffic, and to the increase in State traffic which continued to expand at a very rapid rate. The chief items of receipts were fees on telegrams (R253 lakhs), claims from railways and canals (over R31 lakhs), rent for telephone connections (R12 lakhs), claims from guarantors and royalties from telephone companies (over R2 lakhs).

Expenditure debitable to capital account incurred during the year 1918-19 was over R37 lakhs, bringing the grand total of such expenditure to the end of the year to R13,69½ lakhs.

The telegraph system was extended by 100 miles of line and 9,566 miles of wire and cable, and consisted on the 31st March, 1919, of 87,814 miles of line and 357,472 miles of wire and cable.

* With effect from the 1st January, 1920, the rate for telegrams exchanged between India and Mesopotamia has been increased to twelve annas a word.

The total number of inland telegrams was 18,152,099, of which 2,119,434 were State telegrams and 16,032,665 private telegrams, showing an increase of 6·6 per cent and 5·8 per cent, respectively. The revenue derived from them amounted to R38½ lakhs and R154 lakhs, showing an increase of 33 per cent and 43 per cent, respectively. Number of telegrams

Foreign telegrams were 2,175,969 in number, realising nearly R60 lakhs, showing an increase of 9 per cent in number, and 35 per cent in value. State foreign telegrams, numbering 139,018, with a revenue of over R10 lakhs, showed an increase of 26 per cent in number and 75 per cent in value. Private foreign telegrams on the other hand advanced by 8 per cent in number and 29 per cent in value.

The gross rental received for telephones provided by the Telegraph Department excluding those supplied to railways and canals was R12,41,115 in 1918, as against R11,99,213 in the preceding year. There are now in use 241 telephone exchanges owned and maintained by Government, of which 61 are operated by the Telegraph Department. The total number of exchange connections at the end of 1918 was 7,066 as against 6.905 on the 31st December 1917. There were also 1,047 officers connected to independent non-exchange circuits compared with 1,127 in the previous year. Telephones

There are ten Radio telegraph offices open for communication with ships. Messages for ships can be booked at any telegraph office open for the purpose as advertised in the Telegraph Guide. Wireless Telegraphy

Table No. 98 shows the general statistics of the Indo-European Telegraph Department. The total number of words telegraphed in 1918-19 was 17,198,046 and the revenue derived from messages amounted to £332,786. The total receipts of the Department amounted to £338,634 and the working revenue charges to £162,146. The expenditure debitable to capital account at the end of the year 1918-19 was £1,236,256. [These statistics have no connection whatever with those of the Indian Telegraph Department dealt with in the preceding paragraphs.] Indo-European Telegraph Department.

RAILWAYS

[FOR TABLES, SEE PAGES 197 TO 203]

The tables in this volume are compiled from the statistics given in the Report on the Administration of Railways in India issued by the Railway Board, except table No. 100 (Revenue account of the railways in respect of which Government is financially responsible) which is compiled from the Finance and Revenue Accounts of the Government of India. The Administration Reports published up to 1912 had reference to the working of each calendar year. Owing to the adoption, by the principal railway administrations, of the Government financial year (1st April to 31st March) for all accounts and statistical purposes, the Administration Reports have, with effect from 1st April, 1913, been published for the financial year. Sources of statistics

The number of miles of all railways open for traffic at the end of 1918-19 was 36,616, as compared with 31,614 in 1909-10, the increase in the decade being thus 5,002 miles or 16 per cent. Of this, 17,995 miles were of the standard-gauge (5½′), 15,078 miles of the metre-gauge (3′ 3⅜″), and 3,543 miles of other gauges (2½′ and 2′). 15,623 miles of the standard-gauge, 9,456 miles of the metre-gauge, and 1,337 miles of other gauges were owned by Government. Open mileage

Up to the close of the year 1918-19 the capital outlay on all railway lines open for traffic amounted to R5,49,74 lakhs, as compared with R4,29,83 lakhs at the end of 1909, the increase in the decade being 28 per cent. Of this total capital outlay of R5,49,74 lakhs, the outlay on State railways amounted to R4,82,43 lakhs. The outlay incurred during 1918-19 on lines in which the State is financially interested amounted to R6,24 lakhs. Capital outlay

The gross earnings of all Indian railways during the year 1918-19 amounted in round figures to R86,28 lakhs, compared with R77,36 lakhs in 1917-18, or an increase of R8,92 lakhs or 12 per cent. This total amount of R86,28 lakhs of gross earnings consisted of goods traffic R49,14 lakhs, coaching traffic R34,20 lakhs, electric telegraph R17 lakhs, steam boat R22 lakhs, and sundries R2,55 lakhs. The working expenses were R41,80 lakhs, as against R35,37 lakhs in 1917-18, an increase of 18 per cent. The net earnings thus amounted to R44,48 lakhs against R42,00 lakhs in 1917-18, or an increase of R2,48 lakhs or about 6 per cent. These net earnings yielded a return on the capital outlay (R5,49,74 lakhs) on open lines, *i.e.*, on mileage earning revenue, of 8·09 per cent, as compared with 7·75 per cent in 1917-18 and 6·96 per cent in 1916-17. Details of the results of working in 1918-19 of each railway system, which includes branch lines and lines under the same management, are shown in table No. 102. Results of working: earnings

Up to the end of 1898-99 the railways in respect of which Government was financially interested worked at a loss to the State, but with the termination of the guarantee of the Great Indian Peninsula Railway the revenue has, excepting the single set-back in 1908-09, a famine year in North-Western India, exceeded the expenditure. The net gain to the State in 1918-19 was R15,85 lakhs as against R14,87 lakhs in 1917-18. This surplus gives a net profit to Government (after paying all charges including interest) of 3 per cent on the capital outlay on State railways; but, as already stated above, the net earnings of all railways yielded a return of 8·09 per cent on the total capital outlay. Financial results of working of State railways

The total number of passengers carried by Indian railways in 1918-19 was in round numbers 460 millions as against 430 millions in the preceding year, or an increase of about 7 per cent. This total comprised 1,048,000 first class passengers, 5,119,000 second class, 8,722,000 intermediate class, 404,387,000 third class passengers, and 40,456,000 for trips which the holders of season and vendors' tickets are assumed to have made on the prices paid for their tickets. The total earnings from passenger traffic amounted to R28,98 lakhs, or an increase of 15 per cent over the preceding year. Passenger traffic

Goods traffic

The total quantity of goods carried during the year 1918-19 was 91,161,000 tons, as compared with 85,472,000 tons in the preceding year. or an increase of about 7 per cent; and the total earnings from goods traffic increased from R44,50 lakhs in 1917-18 to R49,14 lakhs in 1918-19, *i.e.*, by 10 per cent. The average rates charged per mile per passenger of each class and per ton of goods carried during the year 1918-19 are stated in the margin as compared with those ten years ago.

		1909	1918-19
		Pies	Pies
Passengers	First class	12·89	15·28
	Second class	5·94	7·15
	Intermediate class	3·06	4·17
	Third class	2·28	2·86
	Season and vendors' ticket holders	1·42	1·49
Goods (per ton)		5·78	4·26

Rolling-stock

The total number of locomotives at the end of 1918-19 numbered 8,928, of which 1,755 were employed exclusively on passenger, 2,786 on goods, and 4,387 on mixed working. The number of coaching stock was 24,719 and that of goods stock 191,128.

Train-mileage and earnings per train mile

The total train-mileage (including miscellaneous train miles) was 158,588,000 in 1918-19, as against 157,036,000 in the preceding year. Of this, coaching train miles numbered 44,117,000 and goods train miles 74,283,000. The gross earnings per train mile worked out to R5·44, the working expenses to R2·64, and the net earnings per train mile to R2·80.

Railway staff

The total number of servants in railway employ at the close of the year 1918-19 was 685,965, as against 654,008 in the preceding year. Of this number, 6,706 were Europeans, 10,456 Anglo-Indians, and 668,803 Indians.

Railway accidents

The total number of persons killed by railway accidents during the year 1918-19 was 2,563, as against 2,394 in the preceding year. Of this number, 343 were passengers, 456 railway servants, and 1,764 other persons. The total number of persons injured in 1918-19 was 2,585, of whom 1,119 were passengers, 842 railway servants, and 624 other persons.

IRRIGATION

[For Tables, see pages 204 to 219]

Irrigation has been resorted to in India from time immemorial as a means of supplementing the natural rainfall and of storing water for use at critical periods. In general it may be said that the security of the harvest depends on the existence of some form of irrigation in almost all parts of India, except in tracts such as Eastern Bengal, Assam, Lower Burma, and the Malabar Coast where the average rainfall is not less than 70 inches in the year.

Types of irrigation works

Irrigation works are of three great types—lift, storage, and river works—which are represented by wells, tanks or reservoirs, and canals. The wells and smaller tanks are often the property of private individuals, but the larger tanks and the canals are generally undertaken by Government. The statistics given in this volume relate only to works constructed or maintained by Government.

Irrigation canals are not always suitable for navigation, and many canals have been constructed for navigation which do not irrigate a single acre. Not one navigable canal is directly remunerative, and in many cases the navigation receipts do not cover the working expenses. The great rivers are navigable by steamers all the year round, and there are innumerable small rivers, tributaries, creeks, and backwaters, which are fully utilised by small craft.

Classes

Financially considered, irrigation works are classed as "major" and "minor," the former being subdivided into (1) Productive, and (2) Protective, works. The most important irrigation works in India are those

Productive

classed as "Productive works" or works the capital cost of which has been wholly or mainly provided from borrowed money in the expectation that they will prove directly remunerative and that the net revenue derived from them will fully cover all charges for interest within a reasonable time (10 years) after their completion.

Protective

"Protective" irrigation works are those which have been sanctioned in consideration of their value in protection against famine, but without any expectation of their becoming directly remunerative. The cost of their construction has been met from the grant under Famine Relief and Insurance. Capital and revenue

Major works

accounts are kept for all major works, and the revenue due to them, whether directly in the form of water-rates and miscellaneous receipts or indirectly on account of enhancements of land revenue due to irrigation,

Minor works

is shown in the Finance Accounts. Minor works are constructed from funds provided from the ordinary revenue of India, and, broadly speaking, consist of irrigation systems which are not sufficiently important to be treated as major works. Some of them are old works constructed by the former rulers of this country, and extended or restored by the British Government; some are works which have been constructed by the British Government; others, again, are village works originally provided by private or communal effort, the control of which the State has been obliged to assume owing to disputes between the parties interested or their inability to maintain the efficiency of the works. Minor works are of three classes, namely:—(1) Works for which capital and revenue accounts are kept. All expenditure incurred in the construction and development of minor irrigation works of this class is met from the ordinary revenue. There were 118 works so classed in 1917-18, the majority of which are in Bombay and Madras. (2) Minor works for which only revenue accounts are kept, either because the works are too small or because they have not been constructed by Government, which has simply undertaken their improvement or maintenance. They are credited with a share of the land revenue depending on their maintenance and are debited with all expenditure incurred on construction, extension, improvements, and maintenance. (3) There is a third class of minor works, chiefly existing in the Madras Presidency, for which neither capital nor revenue accounts are kept.

Table No. 109 shows the principal results of the operations for the year 1917-18, while table No. 110 shows the mileage of canals in operation and the area irrigated. Table No. 111 gives the financial results of the works at the end of each year from 1897-98 to 1917-18. The chief features of these tables are given in the margin. At the end of 1917-18 the total mileage of major works was 49,299 and of minor works 5,012 as against 48,468 and 4,907, respectively, at the end of the previous year. The area irrigated during the year 1917-18 was 18,006,000 acres, of which productive major irrigation works covered 15,844,000 acres, minor irrigation works 1,723,000 acres, and protective major irrigation works 439,000 acres. The capital outlay to the end of the year 1917-18 was above R75 crores, divided between the last mentioned classes in the proportion of 76 per cent, 6 per cent, and 13 per cent, respectively. The net revenue realised during the same year amounted to R5,25 lakhs, namely, R4,85 lakhs from productive major irrigation works, R35 lakhs from minor irrigation works, and R1 lakh from protective irrigation works. In the last ten years the net revenue from irrigation and navigation works has increased by 44 per cent—from R3,65 lakhs in 1908-09 to R5,25 lakhs in 1917-18.

Table No. 112 shows for each province the mileage of different main canals in operation and the area irrigated at the end of each year from 1913-14 to 1917-18. The details for 1917-18 are given in the margin. Madras and the Punjab account for about 12,000 and 15,000 miles of productive major irrigation works with an area of 2 million and 8 million acres, respectively. The United Provinces come next with nearly 10,000 miles and an area of about 3 million acres, and Bombay, and Bihar and Orissa each about 3,000 miles with 1,308,000 and 798,000 acres, respectively. The protective major irrigation works are the largest in the United Provinces with 1,600 miles and about 200,000 acres, Bombay and the Central Provinces accounting for about 600 and 800 miles with 70,000 and 54,000 acres, respectively. Under minor irrigation works Bombay stands foremost with 2,400 miles and 928,000 acres.

	Productive			Protective		Minor irrigation		Navigation
	Number of works	Mileage	Area	Mileage	Area	Mileage	Area	Mileage
Bengal . .	1	325	...	..	..	..	..	29
Madras .	16	12,117	2,179,876	231	48,776	1,262	152,807	304
Bombay . .	17	3,379	1,307,765	600	69,972	2,409	928,345	..
United Provinces .	7	9,773	2,871,087	1,600	199,831	580	138,507	..
Bihar and Orissa .	2	3,220	798,068	266	65,971	23	..	..

Central Provinces .	3	689	74,794	822	54,324	110	4,114	..
North-West Frontier	4	800	361,902	..	..	..	..	..
British Baluchistan	..	..	..	..	..	108	16,846	..

The Ganges Canal, the Lower Ganges Canal, and the Eastern Jumna Canal are the most remunerative works in the United Provinces. In the Punjab the greatest amount of net revenue is obtained on the Lower Chenab Canal, which promises developments due to recent extension. The Upper Bari Doab Canal, the Lower Jhelum Canal, the Western Jumna Canal, and the Sirhind Canal are also very remunerative. The Godavari, the Kistna, and the Cauvery Delta Systems are the most remunerative works in Madras.

Table No. 113 gives the details of irrigation and navigation in each province in each year from 1913-14 to 1917-18. The details for 1917-18 are summarised in the marginal table. Of the total irrigated area the Punjab contains about 9 million acres, Madras nearly 4 million acres, the United Provinces 3·6 million acres, Bombay 2·5 million acres, Bihar and Orissa nearly a million acre, and Burma 872,000 acres. The average water rate per acre is R5 in Ajmer-Merwara, R4 in Madras, and in the Punjab, R3 in the United Provinces, British Baluchistan, Burma, Bihar and Orissa, North-West Frontier Province, and Bombay; and about R2 in Bengal and R1 in the Central Provinces.

	Area irrigated	Water rate per acre	Navigation

* Revised figures

(*a*) Increase due to inclusion of 7 "Shipbuilding and Engineering Works" employing 7,316 persons

(*b*) The Kumardhubi Engineering Works, Manbhum, employed 4,863 persons

(*c*) Did not work

(*d*) Including one Electrical Engineering Workshop employing 80 persons

(*e*) " " " " " 60 "

(*f*) " " " " " 76 "

(*g*) " two " " " 180 "

(*h*) One canvas waterproofing works in 24-Parganas employed 2,300 "

No. 6.—NUMBER of PERSONS employed in DIFFERENT INDUSTRIAL ESTABLISHMENTS in

* Compiled from special official returns

(a) Capital of four mills. [See also footnote (g)]

(b) The quantity produced by one of the mills was not reported

(c) Capital of four mills only. [See also footnote (h)]

(d) Excluding 42,000 blankets the weight of which has not been given

(e) One of the mills in the Punjab was closed

(f) Excluding 150,000 blankets the weight of which has not been given

(g) Capital of five mills only. The increase in 1914 is due to the New Egerton Mill having increased its authorised capital from R12 lakhs to R1,00 lakhs

(h) Capital of four mills. The increase in 1915 is due to the Cawnpore Mill having increased its authorised capital from R25 lakhs to R1,50 lakhs.

* Compiled from the annual report of the Port Officer and Registrar of Wrecks, Calcutta
‡ Incomplete, the tonnage of some vessels not being known
§ The unusually large number of British vessels lost in 1914 is due to the depredations of German cruisers in Indian waters after the outbreak of war
(*a*) Excluding the tonnage of one British Indian Vessel not given
(*b*) Excluding the tonnage of six British Indian Vessels not given

MERCHANDISE MARKS*

(*a*) For earlier figures, see the 13th issue of Financial and Commercial Statistics of British India and the 1st and 6th issues of "Statistics of British India," Part III

(*b*) Figures up to 1900-01 relate to the old circle "Assam" and those from 1905-06 to 1913-14 relate to the old circle "Eastern Bengal and Assam"

(*c*) Figures up to 1913-14 relate to the old circle "Bengal"

(*d*) The figures for Rajputana and Central India are not Indian State figures but figures of the Imperial Post Office for the Central India Circle (now abolished) and the Rajputana Circle (which has also now been merged in the "Central Circle")

(*e*) Abolished from the 1st July, 1894

(*f*) Abolished from the 1st July, 1907, and incorporated with the Punjab and Bombay circles. Includes figures from April to June, 1907

in each CIRCLE, from 1870-71 to 1918-19

* Excludes lines for which information regarding "capital outlay," "gross earnings," etc., is not available
† Capital outlay on lines open, *i.e.*, on mileage earning revenue
(*a*) Estimated
(*b*) The decrease is due to the revision of the capital outlay in consequence of the substitution of the actual expenditure incurred on the construction of lines purchased by the State from Guaranteed Railway Companies as shown in rupees in the accounts of these Railways at date of purchase for the total purchase price converted at £1=R10, which was erroneously taken in stating the Capital expenditure in previous Railway Administration Reports
Note.—From 1913-14, the financial year, 1st April to 31st March, has been adopted for reasons explained in the Introductory note

and TRAFFIC of ALL RAILWAYS, from 1853 to 1918-19

PASSENGER TRAFFIC		AVERAGE RATE CHARGED PER PASSENGER PER MILE					GOODS TRAFFIC						
Earnings	Percentage of earnings to gross earnings	1st Class	2nd Class	Intermediate Class	3rd Class	Season and vendors' tickets	Quantity	Average rate charged for carrying a ton of goods one mile	Earnings	Percentage of earnings to gross earnings	Net earnings per mile open	Net earnings per train mile
